Controllers are required to be familiar with the provisions of this order that pertain to their operational responsibilities and to exercise their best judgment if they encounter situations that are not covered by it. We are here to help with all the Bad Boy Parts to keep your Bad Boy Mower going so you can continue to Mow with an Attitude. SoftwareX also aims to stress the importance of the software developers who are, in part, responsible for this impact. To this end, SoftwareX aims to support publication of research software in such a way that The software is given a stamp of scientific relevance, and provided with a peerreviewed recognition of scientific impact; The software developers are given the credits they deserve; The software is citable, allowing traditional metrics of scientific excellence to apply; The academic career paths of software developers are supported rather than hindered; The software is publicly available for inspection, validation, and reuse. Above all, SoftwareX aims to inform researchers about software applications, tools and libraries with a proven potential to impact the process of scientific discovery in various domains. The journal is multidisciplinary and accepts submissions from within and across subject domains such as those represented within the broad thematic areas below Mathematical and Physical Sciences; Environmental Sciences; Medical and Biological Sciences; Humanities, Arts and Social Sciences. Originating from these broad thematic areas, the journal also welcomes submissions of software that works in cross cutting thematic areas, such as citizen science, cybersecurity, digital economy, energy, global resource stewardship, health and wellbeing, etcetera.

MUSIC INSTRUMENT AMP. MODEL 1333 (Ch. 185.806)

SCHEMATIC DIAGRAM COURTESY SEARS, ROEBUCK and CO.

https://skazkina.com/ru/bose-lifestyle-5-music-system-manual

SoftwareX specifically aims to accept submissions representing domainindependent software that may impact more than one research domain. Domain independent underpinning software tools and technologies have for too long been underrepresented in academic literature. We wish to ensure that these software items get academic recognition and welcome submissions of software tools and services that may otherwise not have a publication home. Examples include mathematical or image processing libraries or methodologies, visualization tools, data management, etcetera. Through the quality of the description and of the potential impact of the software deposited we aim that significant reuse will occur both within and without the original developing domain and therefore encourage consideration of this reuse factor when submitting and in the language used within the description. Submissions to SoftwareX consist of two major parts A short descriptive paper of max. 6 pages; An open source software distribution with support material. Go to the SoftwareX GitHub repository. In addition, it also specifically aims at domain independent underpinning tools and technologies. We encourage highquality original software submissions which contain nontrivial contributions. The software must adhere to a recognized legal license, such as OSP approved licenses. Importantly, the software will be a full publication that is able to capture your software updates as they are released. To acknowledge the author's software work, your software will be fully citable as an Original Software Publication, archived and indexed and made available as a complete online "body of work" for other researchers and practitioners to discover. See the detailed Submission instructions, and more information about the process for academically publishing your Software here.

http://clinicafootcenter.com/images/canon-ae-1-program-repair-manual.pdf

When preparing your manuscript, please make sure that you strictly adhere to the Template for Original Software Publications and the Template for Software Updates. Submission checklist You can use this list to carry out a final check of your submission before you send it to the journal for review. Please check the relevant section in this Guide for Authors for more details. Ethics in publishing Please see our information pages on Ethics in publishing and Ethical guidelines for journal publication. Studies in humans and animals If the work involves the use of human subjects, the author should ensure that the work described has been carried out in accordance with The Code of Ethics of the World Medical Association Declaration of Helsinki for experiments involving humans. The manuscript should be in line with the Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals and aim for the inclusion of representative human populations sex, age and ethnicity as per those recommendations. The terms sex and gender should be used correctly. Authors should include a statement in the manuscript that informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed. The sex of animals must be indicated, and where appropriate, the influence or association of sex on the results of the study. Declaration of interest All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence bias their work. Note Please do not convert the.docx template to another file type. Author signatures are not required. If there are no interests to declare, please choose Declarations of interest none in the template. This statement will be published within the article if accepted. More information.

https://jdleducation.com/images/canon-adding-machine-manual.pdf

Submission declaration and verification Submission of an article implies that the work described has not been published previously except in the form of an abstract, a published lecture or academic thesis, see Multiple, redundant or concurrent publication for more information, that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyrightholder. To verify originality, your article may be checked by the originality detection service Crossref Similarity Check. Preprints Please note that preprints can be shared anywhere at any time, in line with Elseviers sharing policy. Sharing your preprints e.g. on a preprint server will not count as prior publication see Multiple, redundant or concurrent publication for more information. Use of inclusive language Inclusive language acknowledges diversity, conveys respect to all people, is sensitive to differences, and promotes equal opportunities. Content should make no assumptions about the beliefs or commitments of any reader; contain nothing which might imply that one individual is superior to another on the grounds of age,

gender, race, ethnicity, culture, sexual orientation, disability or health condition; and use inclusive language throughout. These guidelines are meant as a point of reference to help identify appropriate language but are by no means exhaustive or definitive. Authorship statements should be formatted with the names of authors first and CRediT roles following.

More details and an example Changes to authorship Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor. To request such a change, the Editor must receive the following from the corresponding author a the reason for the change in author list and b written confirmation email, letter from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum. Article transfer service This journal is part of our Article Transfer Service. This means that if the Editor feels your article is more suitable in one of our other participating journals, then you may be asked to consider transferring the article to one of those. If you agree, your article will be transferred automatically on your behalf with no need to reformat. Please note that your article will be reviewed again by the new journal. More information. Copyright Upon acceptance of an article, authors will be asked to complete an Exclusive License Agreement see more information on this. Permitted third party reuse of open access articles is determined by the authors choice of user license. Author rights As an author you or your employer or institution have certain rights to reuse your work. More information.

http://www.cargeacrew.com.br/wp-content/plugins/formcraft/file-upload/server/content/files/1627480e6c8dfd---brother-ce5500prw-sewing-machine-manual.pdf

Elsevier supports responsible sharing Find out how you can share your research published in Elsevier journals. If the funding sources had no such involvement then this should be stated. Open access Please visit our Open Access page for more information. The open access publication fee for this journal is USD 500, excluding taxes. Learn more about Elseviers pricing policy. Elsevier Researcher Academy Researcher Academy is a free elearning platform designed to support early and midcareer researchers throughout their research journey. Feel free to use these free resources to improve your submission and navigate the publication process with ease. Language usage and editing services Please write your text in good English American or British usage is accepted, but not a mixture of these. Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elseviers Author Services. Submission Our online submission system guides you stepwise through the process of entering your article details and uploading your files. The system converts your article files to a single PDF file used in the peerreview process. Editable files e.g., Word, LaTeX are required to typeset your article for final publication. All correspondence, including notification of the Editors decision and requests for revision, is sent by email. Full Online Submission Please submit your article via Guidelines for a SoftwareX submission Submissions to SoftwareX are made through the EVISE. In this document you will find a few simple instructions for a correct submission. The manuscript you submit must be regarded as a brief accompanying note. Instructions for submission 1. The submission website for SoftwareX is located at. You may need to establish a new user account, and later can consolidate it with any prior Elsevier user accounts. 2.

Every manuscript submitted must comply with the SoftwareX article template. You will find both a Word and a Latex template in this guideline package. Additional Information SoftwareX aims at having a transparent and quick editorial process. All submitted articles conform to the SoftwareX format will undergo a formal peerreview process. The method used to evaluate the article is described by this list of criteria that all reviewers will follow. Authors are invited to revise and resubmit their manuscript when reviews are overall positive and request textual adjustments only. If extensive modifications to the software are required, authors will be advised that their manuscript cannot be accepted for publication. Of course, every author will be welcome to resubmit their manuscript anew in the future. When submitting, you will be give the option to provide a list of suitable potential reviewers including their name, institutional email addresses, and institutional affiliation. When compiling this list of potential reviewers please consider the following important criteria they must be knowledgeable about the manuscript subject area; must not be from your own institution; at least two of the suggested reviewers should be from another country than the authors; and they should not have recent less than four years joint publications with any of the authors. However, the final choice of reviewers is at the editors discretion. Peer review This journal operates a single blind review process. All contributions will be initially assessed by the editor for suitability for the journal. Papers deemed suitable are then typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles. The Editors decision is final. More information on types of peer review. It is important that the file be saved in the native format of the word processor used.

The text should be in singlecolumn format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the word processors options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts see also the Guide to Publishing with Elsevier . Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. See also the section on Electronic artwork. When preparing your manuscript, please make sure that you strictly adhere to the Template for Original Software Publications. LaTeX You are recommended to use the Elsevier article class elsarticle.cls to prepare your manuscript and BibTeX to generate your bibliography. Use this LaTex Template to generate your article. When submitting a manuscript created with LaTex, build a PDF of your manuscript source files and attach it with item type Manuscript. Bundle all manuscript source files in a single archive and attach it with item type LaTeX source files. Source files include LaTeX files, BibTeX files, figures, tables, all LaTeX classes and packages that are not included in TeX Live and any other material that belongs to your manuscript. For detailed submission instructions and other information on LaTeX, see. Article structure Subdivision numbered sections Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 then 1.1.1, 1.1.2,., 1.2, etc. the abstract is not included in section numbering. Use this numbering also for internal crossreferencing do not just refer to the text.

Any subsection may be given a brief heading. Each heading should appear on its own separate line. Appendices If there is more than one appendix, they should be identified as A, B, etc. Concise and informative. Please clearly indicate the given names and family names of each author and check that all names are accurately spelled. You can add your name between parentheses in your own script behind the English transliteration. Present the authors affiliation addresses where the actual work

was done below the names. Indicate all affiliations with a lowercase superscript letter immediately after the authors name and in front of the appropriate address. Clearly indicate who will handle correspondence at all stages of refereeing and publication, also postpublication. This responsibility includes answering any future queries about Methodology and Materials. If an author has moved since the work described in the article was done, or was visiting at the time, a Present address or Permanent address may be indicated as a footnote to that authors name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes. Highlights Highlights are optional yet highly encouraged for this journal, as they increase the discoverability of your article via search engines. They consist of a short collection of bullet points that capture the novel results of your research as well as new methods that were used during the study if any. Please have a look at the examples here example Highlights. Highlights should be submitted in a separate editable file in the online submission system. Please use Highlights in the file name and include 3 to 5 bullet points maximum 85 characters, including spaces, per bullet point. Abstract A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions.

An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, References should be avoided, but if essential, then cite the authors and years. Also, nonstandard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself. Graphical abstract Although a graphical abstract is optional, its use is encouraged as it draws more attention to the online article. The graphical abstract should summarize the contents of the article in a concise, pictorial form designed to capture the attention of a wide readership. Graphical abstracts should be submitted as a separate file in the online submission system. Preferred file types TIFF, EPS, PDF or MS Office files. You can view Example Graphical Abstracts on our information site. Authors can make use of Elseviers Illustration Services to ensure the best presentation of their images and in accordance with all technical requirements. Keywords Immediately after the abstract, provide a maximum of 6 keywords, using American spelling and avoiding general and plural terms and multiple concepts avoid, for example, and, of. Be sparing with abbreviations only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes. Abbreviations Define abbreviations that are not standard in this field in a footnote to be placed on the first page of the article. Such abbreviations that are unavoidable in the abstract must be defined at their first mention there, as well as in the footnote. Ensure consistency of abbreviations throughout the article. Acknowledgements Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. It is not necessary to include detailed descriptions on the program or type of grants and awards.

When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding. If no funding has been provided for the research, please include the following sentence This research did not receive any specific grant from funding agencies in the public, commercial, or notforprofit sectors. Math formulae Please submit math equations as editable text and not as images. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be displayed separately from the text if referred to explicitly in the text. Footnotes Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list. A detailed guide on electronic artwork is available. You are urged to visit this site; some excerpts from the detailed information are given here. Formats If your electronic artwork is created in a Microsoft Office application Word, PowerPoint, Excel then please

supply as is in the native document format. TIFF or JPEG Color or grayscale photographs halftones, keep to a minimum of 300 dpi. Color artwork Please make sure that artwork files are in an acceptable format TIFF or JPEG, EPS or PDF, or MS Office files and with the correct resolution. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online e.g., ScienceDirect and other sites regardless of whether or not these illustrations are reproduced in color in the printed version.

For color reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article. Please indicate your preference for color in print or online only. Further information on the preparation of electronic artwork. Illustration services Elseviers Author Services offers Illustration Services to authors preparing to submit a manuscript but concerned about the quality of the images accompanying their article. Elseviers expert illustrators can produce scientific, technical and medicalstyle images, as well as a full range of charts, tables and graphs. Image polishing is also available, where our illustrators take your images and improve them to a professional standard. Please visit the website to find out more. Figure captions Ensure that each illustration has a caption. Supply captions separately, not attached to the figure. A caption should comprise a brief title not on the figure itself and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used. Tables Please submit tables as editable text and not as images. Tables can be placed either next to the relevant text in the article, or on separate pages at the end. Number tables consecutively in accordance with their appearance in the text and place any table notes below the table body. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules and shading in table cells. References Citation in text Please ensure that every reference cited in the text is also present in the reference list and vice versa. Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text.
