

HeathZenith

Motion Sensor Security Light

Model 8421

Model 8422

PRE-INSTALLATION
For easy installation, select an existing light with a wall switch for replacement. **IMPORTANT:** Do NOT use with dimmers or timers.
For best performance, mount the fixture about 8 ft. (2.4 m) above the ground. Note: If fixture is mounted higher than 8 ft. (2.4 m), aiming the sensor down will reduce coverage distance.

Note: Light fixture and sensor should be mounted as shown above when installed (depending upon type of installation). Model 8421 shown above.
1. Remove mounting bracket from back of light fixture.
2. Ensure the long fixture screws are finger tight against the mounting bracket.

- Features**
- LED motion light.
 - Automatically operates at night only.

- Package Contents**
- Security Light (see model above)
 - Short Bracket Screws (2x)
 - Long Fixture Screws (2x)
 - Decorative Nuts (2x)
 - Wire Connectors (2x)
 - Mounting Bracket (1x)

- Requirements**
- The light control requires 120-volts AC.
 - Some codes require installation by a qualified electrician.
 - This product is intended for use with a junction box marked for use in wet locations.

Please enter your email address and we will send you a password It should be steady and robust so that you can place the ironing appliance on it. The board should be perforated to allow the steam to pass through the fibres of the fabric to soften it and make ironing easier. The ironing board cover should also be suitable to allow the flow of steam through. How do I use it As the steam produced is very hot, it softens the fibres and removes creases. Note Never use the vertical steam function on an item being worn by anyone. This allows you to obtain steam on the lowest heat setting, e.g. silks. However, when the iron temperature control is set to the lowest setting you must also set the steam output control dial depending on the model to the low position, otherwise water droplets may appear in the steam. We would advise ironing dark clothes inside out and using the correct temperature.

<http://gbb.global/blog/3kva-generator-service-manual>

If ironing mixedfibre fabrics, set the temperature for the most fragile fibre. Important The iron takes longer to cool down than to heat up. We recommend that you start with fabrics to be ironed at a low temperature. However, some softeners, especially those that use chemicals such as salt, can cause white or brown stains. This is particularly the case for filter jugs. Such additives can affect the steam properties and at high temperatures, form deposits in the steam generator chamber, which are likely to stain your laundry and cause premature ageing of the appliance. Do not use any maintenance or descaling product to clean the soleplate or the base unit. Never hold the iron or its base unit under a running tap. If you live in a hard water area, do this more often. Most of all, do not use any descaling products to clean the boiler as they could damage it. Warning The use of iron cleaner will cause damage to your soleplates autoclean coating. This is completely normal and is just the pump injecting water into the boiler or the steam valve opening. Some waterdrops could appeared underneath the ironing board and fall on the flooring. You can also check the removable water tank depending on model is pressed down firmly in place and press the restart button located on the control panel. Also the steam output control dial may be set at minimum depending on Model; therefore turn the dial up to increase the steam. Do not fill it right to the top. You need to get the generator checked by an authorised service agent. Ensure that you have rinsed your clothes thoroughly in order to remove soap deposits or chemicals from new garments which could stick to the iron. Please clean the Irons surface. There is nothing wrong with it. This is due to the flow of cold water into the boiler that contains hot water. If it still does not work, do not try to dismantle or repair the appliance yourself and take it to an approved repair centre.

<http://astucesvoyages.com/images/bowflex-routine-manual.pdf>

To avoid any danger, have it replaced by an approved repair centre. Is there any risk The benefit is that this halves your ironing time and produces fantastic ironing finishes. A steam station is similar to an ordinary iron but has a larger water tank. The water is pumped up to the iron and the steam is generated in the iron not a separate boiler unit. The steam output is constant but not as powerful as a steam generator. However, the tank should be rinsed after 10 uses to avoid lime scale deposits. However, if you notice that the cable is damaged, have it repaired by an approved repair centre. Its active coating eliminates fibres and impurities that often become stuck to the plate and end up reducing its glide. Leave it at a local civic waste collection point. What should I do It should be steady and robust so that you can place the ironing appliance on it. The board should be perforated to allow the steam to pass through the fibres of the fabric to soften it and make ironing easier. The ironing board cover should also be suitable to allow the flow of steam through. How do I use it As the steam produced is very hot, it softens the fibres and removes creases. However, some softeners, especially those that use chemicals such as salt, can cause white or brown stains. This is particularly the case for filter jugs. Such additives can affect the steam properties and at high temperatures, form deposits in the steam generator chamber, which are likely to stain your laundry and cause premature ageing of the appliance. Do not use any maintenance or descaling product to clean the soleplate or the base unit. Never hold the iron or its base unit under a running tap. If you live in a hard water area, do this more often. Most of all, do not use any descaling

products to clean the boiler as they could damage it. For easier, noncorrosive cleaning of your irons soleplate, use a damp sponge on the soleplate while it is still warm. Warning The use of iron cleaner will cause damage to your soleplates autoclean coating. This is completely normal and is just the pump injecting water into the boiler or the steam valve opening. Some waterdrops could appeared underneath the ironing board and fall on the flooring. You can also check the removable water tank depending on model is pressed down firmly in place and press the restart button located on the control panel. Also the steam output control dial may be set at minimum depending on Model; therefore turn the dial up to increase the steam. Depending on the model of generator, when ironing on a low temperature, decrease the steam output by adjusting the steam output dial on the control panel. Do not fill it right to the top. You need to get the generator checked by an authorised service agent. You should never put these products in the water tank. Ensure that you have rinsed your clothes thoroughly in order to to remove soap deposits or chemicals from new garments which could stick to the iron. Only spray starch on the reverse of the fabric to be ironed. Please clean the Irons surface. There is nothing wrong with it. This is due to the flow of cold water into the boiler that contains hot water.

If it still does not work, do not try to dismantle or repair the appliance yourself and take it to an approved repair centre. To avoid any danger, have it replaced by an approved repair centre. Is there any risk The benefit is that this halves your ironing time and produces fantastic ironing finishes. A steam station is similar to an ordinary iron but has a larger water tank. The water is pumped up to the iron and the steam is generated in the iron not a separate boiler unit. The steam output is constant but not as powerful as a steam generator. However, the tank should be rinsed after 10 uses to avoid lime scale deposits. However, if you notice that the cable is damaged, have it repaired by an approved repair centre. This means that less electricity is used and therefore slightly less steam is generated. Its active coating eliminates fibres and impurities that often become stuck to the plate and end up reducing its glide. Leave it at a local civic waste collection point. What should I do.
