SheilaA 1.0 out of 5 stars So not happy with thatSo I thought I would splash out on Bosch, big mistake. After being seduced by a few other cheap brands over the years I thought, yup lets splash out again on Bosch. Trouble is Bosch have gone downhill. The trouble is that whenever I go to use it after a little while the battery is flat, in all 3 that I brought. So when ever you want to use it after a while be prepared to wait for a few hours while it charges. Come on Bosch get it together!However had I known this prior, and also known that the new model charger is less than half the price of replacing the old one I would have gone down that road. Anyway. In comparrison the new drill is a lot smaller and seems flimsy, certainly not the robust sturdy feel I have come to expect from Bosch. I recently used it for driving dozens of No8 screws into tanalised wood.

This it did with ease though this really is the bottom end of the scale. The drill was on offer at 52 which isnt bad though I would have been peeved had I paid the RRP of 110 or even the original Amazon price of 75. Perhaps I am doing it a disservice, only time will tell. Watch this space.Of course glowing reviews also made up my mind. Its a lovely drill, nice weight, fits in the hand nicely. What really let it down for me was the charger. When it arrived I thought I would check to see that the batteries were fully charged and ready for work. I put a battery in the charger and a green light came on. Great I thought, theyre already fully charged. I removed the battery and put the other one in. Green light straight away. I checked the instruction manual for the charger. According to the manual the green light just means the charger is on and a battery is in it. There is no cut off or indication when the battery is fully charged. Sorry, according to the manual, you can tell the battery is charged when it starts getting hot. I have never heard anything so stupid for years. I suppose if you dont notice the battery getting hot, the next indication will be flames coming from the shedI was giving basic simple instructions as to what drill he wanted 18v, cordless and the ability to make holes in walls and this drill ticked all the boxes. The drill comes in handy carry case with a spare battery so you can continue working with the spare when your one runs out. The battery doesnt take too long to charge either, probably 5 hours or so and according to my boyfriend the power is good. The drill also doubles up as an electric screwdriver if that is even the correct term and I bought my boyfriend the Bosch accessory pack which contained magnetic screw heads for this purpose. The drill has come in handy on so many occasions since Christmas and my boyfriend has not found one downside with it. As a novice I seem to have done very well I would recommend this drill for household DIY.

<http://www.drupalitalia.org/node/73420>

I cannot comment on any hard labour as it will not be used for that in our house. I would recommend the accessory pack that Amazon sells. It is a great addition to the drill.Sorry, we failed to record your vote. Please try again Son petit eclairage surprend. Un seul point negatif la charge des deux Accu est assez aleatoire. Mais cest quand meme un bon produit.Sorry, we failed to record your vote.

Mais surtout, les batteries sont manifestement deja anciennes a la vente, et ne tiennent pas la charge !Sorry, we failed to record your vote.
