Book Descriptions:

canon speedlite 430ez manual

This batteryoperated, hotshoemounted flash unit is dedicated to the EOS system, and is a direct replacement for the Speedlite 420EZ. Slide back the nonremovable cover, and swing it up on its hinge to expose the battery compartment. Check the polarity diagram, then insert the AA cells. The backlight will automatically extinguish after 8 seconds. Flash Test Switch your flash ON and wait for the flash to charge. When the READY light glows, push the test button on the flash. Automatic Operation Auto Zoom By default, the angle of flash coverage can be automatically matched to the lens and camera used. The primary feature of ATTL was the addition of a infraredfiltered second flash tube and a forward pointing flash exposure sensor on the front of the Speedlite. As soon as the shutter button was halfpressed, an invisible preflash was emitted and the reflected signal from the subject measured to determine the subject reflectance, and indirectly, the subject distance. The 430EZ was the first Speedlite to have a high voltage port. It can take a Quantum Turbo, Canon Transistor Pack or other high voltage battery, and recycle the flash in less than 1.5 seconds after a full power manual pop. Diffuser Flash coverage can be modified or widened by the use of accessory third party diffusers. Click below to see the full manual. NJ.
