The Emergency Call key on the back of the Emergency Call function must be activated before Doro AB and its affiliates, licensees and retailers assume AB and its affiliates or licensees assume no responsibility. Safety Instructions. Areas with explosion risk. The unit and the accessories contain small parts. Keep all of the equipment out of the reach of small children. Operating environment. Follow the rules and laws that apply wherever you are, and Only use the unit in its intended environment. This unit complies with guidelines for radiation when it is used. Make sure that the distance between the unit and the body is at least 20 cm. Parts of the unit are magnetic. The unit can attract metal objects. Medical units. FCC Notice. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: 1. This device may not cause harmful interference, and 2. This equipment has been tested and found to comply with the FCC rules. This equipment generates, uses, and can radiate radio frequency energy and, if not used properly, may cause interference to other equipment. If this equipment does cause harmful interference, you may need to take certain measures. Doro has not approved any changes or modifications to this unit. The use of equipment that transmits radio signals, for example, a mobile phone, can interfere with the operation of this unit. Consult a doctor or the manufacturer for more information. Hospitals and Pacemakers. The Health Industry Manufacturers Association recommends that a pregnant woman carry a mobile phone in her belt bag or purse, not in her bra. If you have any reason to suspect that interference is taking place, stop using the unit. Hearing aid compatibility. This model phone meets the government's requirements for hearing aid compatibility. This phone is designed and manufactured not to exceed the government's exposure standard for wireless mobile phones. The highest SAR value for the model phone as reported to the FCC is 1.6 W/kg. While there may be differences between the SAR levels of different phones, the FCC has granted an Equipment Authorization for this model phone. Use of other enhancements may not ensure compliance with the FCC rules. If you do not use a bodyworn accessory and are not wearing a hearing aid, these rules require an M3 microphone or higher value. The M value, shown on the label, generally indicates that a device model is TTY compatible. This unit does not support TTY signaling. If you intend to use the unit while driving, please read the Care and Maintenance. Driving safely.

Always turn off the unit when you are in an area where there is a risk of explosion or fire. In these areas, sparks can cause explosion or fire that can turn off the unit at filling stations, and any other place that has a risk of explosion or fire. Follow the restrictions that apply to the use of radio equipment. Emergency calls. Important! Mobile phones such as this unit use radio signals. Radio signals can affect electronic systems in motor vehicles. Do not keep or transport flammable liquids, gases or vapors. Do not place objects, including fixed or portable radio equipment, near the unit. It is prohibited to use the unit while in flight. Turn off the unit when you are in an aircraft. Using wireless telecom units. If you use this unit while driving or riding a bicycle, keep the unit out of your reach. Using a mobile device while driving may be distracting. If you find it disruptive or distracting while operating any vehicle, stop using the unit. These features help you to place your call without taking your eyes off the road. See the applicable portion of the user manual. Add an extra layer of convenience and safety to your unit. Use of a headset or other handsfree device may be legally required in some areas. County and municipal ordinances may also limit or ban the use of mobile phones while driving. For SMS text messaging, it is a recommended safety measure to position the phone within easy reach. Keep your eyes on the road. If you get an incoming call, assess the traffic before dialing, or place calls when you are stationary. Try to plan calls when your car will be stationary. Never let the person you are speaking with know you are driving.

<http://www.statcardsports.com/node/10743>

If necessary, suspend the call in heavy traffic or hazardous conditions. Do not take notes, look up phone numbers, or perform any other task that may distract you from driving. Jotting down a todo list or flipping through your address book. Do not engage in stressful or emotional conversations. Make people you are talking with aware of your situation. Warranty and technical data. Use of an unqualified battery may void the warranty. The advice above applies to the unit, battery, AC power, and the phone. If the phone is not working, this product is guaranteed for a period of 12 months from the date of purchase. In the unlikely event of a malfunction, this guarantee will not apply to a malfunction caused by an accident, misuse, or unauthorized modifications. Furthermore, this guarantee does not apply if the batteries are consumables and are not included in any warranty. This guarantee does not apply if the batteries are other than DORO batteries. Battery disposal and recycling information. Your unit is a technically advanced mobile phone.
