It will shortly light up once you press the button. TVModeButton The TVModeButton switches your remote control into TV control mode to control your preprogrammed TV. It will shortly light up once you press the button. see Chapter 12 TVMode setup on page 75 NumericKeypad Enter a service number to directly access the option by using the Numeric Keypad. The service numbers are on the left side of the service list.

<http://superbia.lgbt/flotaganis/1653295715>

The Numeric Keypad can also be used to enter the teletext page number when you are in TVControlMode and if your TV is teletext capable. The TV station has to submit teletext information;

otherwise this feature cannot be used. ArrowLeft and ArrowRightButton The ArrowLeft and ArrowRightButton enable you to jump back and forth between the last 20 channels you have watched. If you have selected a sub service see Chapter 3.6 Sub Services on page 18 you can use these buttons to switch to the next sub service. Additionally these buttons can be used to delete characters during text input. MuteButton Pressing the MUTEButton mutes the Volume. A crossed speaker symbol will appear on the TV screen. The MuteButton deletes a character during text input. EXITButton You can leave all menus and service lists by pressing the EXITButton. INFOButton If no OSD menu is visible on the screen and you are in TV or RADIOMode, pressing the INFOButton will reveal the EPG information of the chose channel if it is available. MENUButton If you are in TV or RADIOMode, pressing this button will bring up the OSD main menu. The OSD main menu has the following options You can switch to the needed option by pressing the NavigationButtons . If you are in the service list, pressing the MENUButton brings up the service menu. The shown options may vary depending on the service list you selected. NavigationButtons In general the menus are controlled using the NavigationButtons on your remote control. To get into a submenu you have to press the OKButton. OKButton By pressing the OKButton you confirm a selection in the menu or service list navigation. If no OSD menu is present on your screen, the infobar is shown once you press the OKButton. AUDIOButton Pressing the AUDIOButton gives an overview of the provided audio tracks. 7 Depending on the menu you currently are in the options will change and will be named differently. These buttons are multiassigned. They are also used for controlling the Playbackmode.

TVButton Pressing the TVButton activates the TVMode. This button is also used for STOP in Playbackmode. You can see the black square below the button. RADIOButton Pressing the RADIOButton activates the RADIOMode. TEXTButton The TEXTButton activates the Teletext. HELPButton Pressing the HELPButton shows the help menu. Important notes about operation All functions of the Dreambox can be controlled via OSDMenu OnScreenDisplay. This makes the handling of the Dreambox very easy for you. All options are indicated by four colored dots or beams red, green, yellow, blue in the OSDMenu and can be started with the OptionButtons on the Remote Control. Depending on the chosen Menu, these options do vary. The OptionsButtons of your remote control have multiple functions. You will notice control symbols below the four colored OptionsButtons, the TV and the RADIOButton. In PVRMode these buttons are used to control the digital recording according to their symbols. INFO MENU In general the menus are controlled using the Navigation Buttons on your remote control. OK To get into a submenu you have to press the OKButton. AUDIO VIDEO EXIT All Menus and Service lists are closed with the EXITButton. 8 At least use the hdmiinterface for getting the best picture quality through digital transmission. You can use the supplied HDMI cable for connecting the dreambox with the hdmiinput of your television.If you are using a switchable power socket please shutdown your Dreambox into deep standby before switching off the power socket. Detailed information can be found under Chapter 3.1 Turning your Dreambox on and off on page 16. Please note that the factory setting for the video format is CVBS FBAS. 2.3 Start wizard If you switch on your Dreambox for the first time, you will see the setup wizard. The setup wizard will guide you through the first time installation. Follow the instructions on the screen and use the Navigation Buttons and the OKButton.

With the red OptionsButton you can choose the desired language. Video output selection You will be shown different video output modes for roughly 10 seconds, after you have connected and switched on your Dreambox. Once you see a clear picture on your TV screen press the OKButton to select it. If you prefer a different output than the selected one you can use the NavigationButtons and the OKButton to select it. Language selection With the NavigationButtons choose your desired language and confirm with the OKButton. 14 Otherwise you will be asked to perform a service scan. Detailed information about the service scan can be found in Chapter 7.4 Automatic scan on

page 60. Parental Control Parental control makes it possible to lock selected channels. Chapter 4.7 Parental control on page 31. Detailed information can be found under Network The network wizard will assist you with the network setup of your Dreambox. Detailed information can be found under Chapter 6.6 Network on page Both functions differ in their Standby about 1 Second higher power consumption DeepStandby about 12 Minutes less power consumption Standby To put your Dreambox into StandbyMode either press the StandbyButton on your remote control or directly on your Dreambox. In this mode the OLEd only shows the current time. With the NavigationButtons choose the option Deep Standby and press the OKButton. 3. Alternatively you can push down the StandbyButton on your Dreambox for 5 seconds. If no OSD Menu is visible on the screen this will also put your reambox into DeepStandbyMode. If the OSD Menu is still open press the EXITButton. All your settings will be saved now and your Dreambox goes into DeepStandbyMode afterwards saves energy!. In this mode the OLEDDisplay doesn t display anything. Sleeptimer Put your Dreambox into Standby after a duration of time that can be chosen freely. Chapter 3.12 Sleep timer on page 27 See Standby Puts your Dreambox into Standby mode.

Restart Your Dreambox will be rebooted. With the NavigationButtons choose the desired option and press the OKButton. 3.2 Service selection Pressing the NavigationButtons on your Dreambox remote control will take you to the previous or next service. Pressing the 0 on the NumericKeypad will enable you to skip back and forth between the two most recently watched services. This feature is quite useful during commercial breaks since it enables you to watch another channel and quickly check if your movies is back on. Using the NavigationButtons you can switch to the 20 last viewed services. 3.3 Changing channel using the service list Pressing the NavigationButtons activates the service list. Pressing the MUTEButton mutes the volume. A crossed speaker symbol will appear on the screen. 3.5 Changing the audio track Pressing the AUDIOButton in TV or Radio Mode. Use the NavigationButtons to move to desired audio track. Press the OKButton to select. The contents of this menu will vary from service to service. Pressing the green OptionsButton in TV or Radio mode will reveal the sub services menu. With the Navigation Buttons choose one of the sub services, then press the OKButton to select. By pressing the TV or EXITButton you can quit the RADIOMode. 18 24 3.8 Subtitles Follow this steps 1. In TV or Radio Mode press the AUDIOButton. 2. By pressing the yellow OptionsButton a list with the available subtitles will show up. 3. With the NavigationButtons select a desired subtitle and press the OKButton to activate. The screenshot on the left shows you an example of how a subtitle looks. Note Keep in mind that not every station offers subtitles. If no subtitles are available, the subtitle list will stay empty. To deactivate subtitles follow this steps 1. In TV or Radio Mode press the AUDIOButton. 2. By pressing the yellow OptionsButton a list with the available subtitles will show up. 3.

With the NavigationButtons select the activated subtitle and press the OKButton to deactivate. 19 25 3.9 Infobar The Infobar appears when switching a channel and shows all necessary Information about the selected service. By pressing the OKButton you can open the Infobar if needed. Active tuner Signal level Error rate Channel name Current time Progress bar Current show Next show Remaining time Is highlighted yellow as soon as a show is broadcasted encrypted. Is highlighted yellow as soon as a show is broadcasted in Dolby Digital. Is highlighted yellow as soon as a show is broadcasted in 169 aspect ratio. Is highlighted yellow as soon as a station transmits Teletext information. Lights up during the recording process. Subservices Extensions 20 26 3.10 Electronic Program Guide EPG The Electronic Program Guide EPG shows information regarding the current tv service similar to a TV guide. By pressing the INFOButton in TVMode you are supplied with detailed information about the current show and by pressing the Navigationbutton afterwards about the next show. Pressing the yellow OptionsButton activates the ChannelEPG see Chapter 3.10 SingleEPG on page 22 and pressing the blue OptionsButton activates the MultiEPG see Chapter 3.10 auf Seite 23. The Dreambox automatically searches for similar broadcasts in the background. If one or more similar broadcasts are found the label Similar will appear in the red window. Pressing the red

OptionsButton opens a listing of similar broadcasts. By pressing the green OptionsButton you can set a timer for this rerun. For additional information about recording by timer please see Chapter Recording by timer on page 27 SingleEPG In this view you are supplied with detailed information about the currently selected channel s programming. Follow this steps 1. Press the INFOButton. 2. Press the yellow OptionsButton for getting the SingleEPG view. You can also access this view by pressing 1. Press and hold the INFOButton for about 2 seconds.

With the NavigationButtons choose the option show single serviceepg and press the OKButton. or 2. Press the NavigationButtons to open the services list. With the NavigationButtons choose one channel and then press the InfoButton. This way you can very quickly and easily access the SingleEPG of every service. By pressing the ArrowLeft or ArrowRightButtons you can switch to EPG of the previous or next service. 22 28 MultiEPG Follow this steps 1. Press the InfoButton. 2. Press the blue OptionsButton for switching to MultiEPG view. Use the blue and yellow OptionsButtons to switch between the now, next and more views. Pressing the green OptionsButton will give you the possibility to automatically copy the start and end time of the selected show into a recording timer. If you have set the Multi bouquets option to yes see Chapter6.2 Customize on page 45 a selection of your bouquets will appear. Select the bouquet for which you want the MultiEPG view. This view shows the currently airing shows on the services listed in the left column. A progress bar showing the progress of the currently airing show is placed next to the service s name. With the NavigationButtons you can select a service, just like in the service list, and change to the selected service by pressing the red OptionsButton. General overview of the following programming. A window will appear where you can enter a time and date. After you have entered the desired time and date press the OKButton to activate you selection. Graphical MultiEPG You have another option to view the EPG of different services and successive shows. The Graphical Multi EPG displays the EPG overview of the upcoming hours can be set to 15 hours with the Buttons 15 on the NumericKeypad for the chosen bouquet. Using the NavigationButtons you can browse the shows.

More detailed information about the sleected show is displayed in the bottom part of the EPG. After you have entered the desired time and date press the OKButton to activate your selection Teletext Videotext Press the TextButton to enter the Teletext. With the EXITButton you can leave teletext. Keep in mind that not every station transmits Teletext. Teletext regular navigation If you are viewing any Teletext page you can enter the interactive mode by pressing the OKButton. Use the NavigationButtons to select a text page number and press the OKButton to call this page. You don t need to type in a text page number in this mode, but it is still possible. Press the MuteButton a couple of times to toggle between transparentmode, invisiblemode and full mode. Press the VolumeupButton to toggle between double high from the upper half, double high from the lower half and full view text page. Press the VolumedownButton to activate or deactivate the PIGMode Picture in Graphics. Same view from Text page and Program picture. best results are show on 169 TV s during 43 transmission. Teletext configuration menu If the Teletext page 100 is shown you can press the MENU Button to enter the Teletext configuration menu. You have the following options Teletext Selection Select the Search option and press the OKButton to start searching for Teletext information on other services without having to leave the service that you currently are watching. After the search is finished you can use the NavigationButtons to select the Teletext of another 25 31 service without having to switch services. Press the OKButton to select the desired Teletext. This option is only available if more than one service on the current satellite transponder actually transmits Teletext information. If this is not the case you cannot make a selection. Press the OKButton to enable or disable this option. The default setting is disabled. Note On some older 43 TV s these Modes may not work.

If you are using a 43 TV, we suggest not to enable these modes. Brightness Here you can adjust the

brightness of your Teletext. Press the NavigationButtons to adjust the brightness. Transparency Here you can adjust the transparency value of your Teletext. Press the NavigationButtons to adjust the alpha value. The default setting is enabled. If disabled, use the NavigationButtons , to choose your codepage. 26 32 3.12 Sleep timer Using the sleep timer you can put your Dreambox into standby or turn it off after a predetermined amount of time. Sleep timer Shutdown Dreambox after Set the number of minutes after you wish the predetermined shutdown action to be executed. TimerStatus Set this option to enabled to activate a set sleep timer or to disabled to deactivate a set sleep timer. Press the red OptionsButton to change the status. Sleep timer action Select Deep Standby to completely turn off you Dreambox or Standby to put it into standby mode. Press the green OptionsButton to toggle the sleep timer action. Ask before shutdown If this option is set to Yes a safety window will appear once the sleep timer is executed asking you if you really want to turn off your Dreambox. Press the yellow OptionsButton to toggle this option. Use time of currently running service Press the blue OptionsButton to take over the remaining time of the service as shutdown time. Once you have set all options to your liking press the OKButton to save your settings. A short note will tell you that the sleep timer has been activated. 27 33 Chapter 4 Edit the channellist What is a bouquet. A bouquet can be thought of something like a folder. Every channel equals a page in this folder and the pages are sorted into categories. This way you can create a bouquet called Kids, for example, under which you file all children's stations. Another example would be to create a bouquet called Sports where you put all sports channels. This way you can create several topic related bouquets.

You can only delete channels in the favorites view. You cannot delete the channels in the All view. The use of the All view is to keep an internal list of all available stations. If you start a new channel search the result would be saved to the All view for example. Your favorites bouquet will stay untouched. This way you can easily add newly found channels from the All list to your favorites bouquet. To see how it is done refer to Chapter 4.2 Add a service to favorites on page Adding a bouquet To be able to add a bouquet you have to set the Allow multiple bouquets option to yes. Chapter 6.2 Customize on page 45. Refer to 1. Press the NavigationButtons to open the channellist. 2. Press the blue OptionsButton to switch to the bouquet view. 3. By pressing the MenuButton the Channellist menu will open up. 4. With the NavigationButtons choose the option add bouquet and press the OKButton. 5. Use the NumericKeypad on your remote control to enter the name for the new bouquet. The according letters are printed on button. The MuteButton deletes a character. 6. Press the OKButton to add the new bouquet to your favorites list. You will be taken back to the Channellist menu. 28 34 4.2 Add a service to favorites If you want to add a service to your Favoritesview you can choose from services in the All, Satellitesand Providerviews. You can switch views by pressing the red, green, yellow and blue Options Buttons. At this point we only describe the process from the AllBouquet since it is the same for the others. 1. Press the NavigationButtons to open the channellist. 2. Press the red OptionsButton to switch to the All view. 3. With the NavigationButtons choose the MENUButton to open the Channellist menu. 4. With the NavigationButtons choose the option add service to bouquet and press the OK Button. If you are using more than one bouquet this option is named add service to bouquet instead and you will get a list of your bouquets afterwards.

You can choose to which bouquet you want to add the currently selected service. As an alternative you can press the blue OptionsButton and select the desired bouquet. After that select a service and switch to it by pressing the OKButton. 3. By pressing the MENUButton the Channellist menu will open up. 4. With the NavigationButtons choose the option enable bouquet edit and press the OK Button, the Allview will open up. 5. All services that are in the selected bouquet for which you just enabled the option enable bouquet edit are highlighted red. With the NavigationButtons choose a desired service and press the OKButton to select. The service will be highlighted red. Using this method you can select additional services that you want to add to the bouquet. Once you have

selected all services that you want to add, press the MenuButton. The Channellist menu will open up. 6. With the NavigationButtons choose the option End bouquet edit and press the OK Button. All highlighted services will now be added to the bouquet that you selected in the beginning. If you are only using one bouquet, which is the default setting, the selected services will be added to your favorites list. 29 35 4.4 Remove a service from favorites 1. Press the NavigationButtons to open the channellist. 2. With the NavigationButtons choose the channel you want to delete. 3. By pressing the MENUButton the Channellist menu will open up. 4. With the NavigationButtons choose the option remove service and press the OKButton. The selected service will be deleted from your favorites list. 4.5 Moving a service to favorites 1. Press the NavigationButtons to open the channellist. 2. By pressing the MENUButton the Channellist menu will open up. 3. With the NavigationButtons choose the option enable move mode and press the OK Button. 4. With the NavigationButtons choose the service you want to move and press the OKButton. The service will be highlighted red. 5.

With the NavigationButtons move the channel to the desired position and press the OK Button, to place the service at its new position. You can move services as long as the move mode is activated. 6. Press the NavigationButtons to open the channellist. 7. With the NavigationButtons choose the option disable move mode and press the OK Button. 4.6 Adding a marker to favorites With the help of markers you will be able to switch fast to a certain position within a bouquet. Afterwards choose a channel with the NavigationButtons. The marker will be added above the selected service. 3. By pressing the MENUButton the Channellist menu will open up. 4. With the NavigationButtons choose the option Add Marker and press the OKButton. 5. Use the NumericKeypad on your remote control to enter the name for the new bouquet. The MuteButton deletes a character. 30 36 6. Press the OKButton, to add the marker to your favorites list. If you have added two markers use the ArrowLeft and ArrowRightButtons to jump between those two markers. 4.7 Parental control Parental control makes it possible to lock selected channels. Follow these steps 1. Press the MenuButton to open the main OSD menu. 2. With the NavigationButtons choose the option Setup and press the OKButton. 3. With the NavigationButtons choose the option Parental control and press the OK Button. Lock a service 1. With the NavigationButtons choose the option Enable parental control and switch the yes with the NavigationButtons. 2. With the NavigationButtons choose the option Parental control type and choose between the options Whitelist and Blacklist with the NavigationButtons. Whitelist means that all channels NOT in the parental control list will be locked. Blacklist means that all the channels in the parental control list will be locked. 3. With the NavigationButtons choose the option Edit Channellist and press the OK Button. 4.
