LF125, LF150, LF200, LF620, Breez. In 1992, the Chinese company Lifan was founded. Today it is known as a manufacturer of budget cars, but the first goal of its activity was the repair of motorcycles. After some time, acquiring experience, the company turned to a Produce your bikes, and hasn't lost. Because of their low cost, the Moto Chongqing High Tech Auto RESEARCH CENTER (which is what the current Lifan was called then) it has become very popular in China, and after only 5 years, the property of the property ten of its establishments. In 1997, the management has decided to change the name to the one with which we know it now. Then the company first looked towards the production of cars. The first brand models were licensed by Honda and Mitsubishi Marche. Furthermore, the agreement has been concluded with the Japanese company DAIHATSU, which has transferred its technical know-how for the Chinese brand, which made it possible to launch the first-owned company models in 2005. Page 2 Preface The manual Describes the basic operation and maintenance for the bike, which should be read carefully before driving. Properly use, assistance and maintenance can maintain safe driving so as to minimize motorcycle problems and keeps it to an optimal performance, which can extend the period of use. Secure driving index of the motorcycle 2 ..... washing and assembly safe driving standards ..... 2 of the fuel net filtering switch ..... 10 protection device ..... 2 gas passage inspection inspection ..... 10 change of the vehicle. .. ..... 2 Operation and control and load of goods ..... protective signaling: To avoid injuries and damage to the device, driving the motorcycle while Must Take To ensure your driving safety, you should put on a helmet. Dus t Hoo d a visor de gloves tools etc.protective. Note of traffic security. You can't drive until the motorcycle control carefully the silencer of the motorcycle is the highest part of the temperature, to avoid secure guide rules ... Accessories: Our accessories that produce has crossed the special design and exceeded Test on the bike. Being is impossible for us to try all other factories products, so if you do not select our components, resettlement and use that will allow yourself if you put them in accordance with safe driving regulations EO Bey T has F Ollowings Evinalp Oints: Carefully check components, without hindering the view, reducing the distance from the protruding land and side, angle, limiting suspension and steering structure Movement, limit and control operation without reinsitting the cooler of the generator ..... 3 OFF: When Th eK Ey is off circuit A` f, engine fig.8 can ts tart, the eye kc an t ake or ut (1) left handlebar: when t has k ery it is turned on, the circuit is ` On, Switching Switching (2) to the left of the engine handlebar switch can start, the key cannot take ...
