Storage my phone

How to free up storage on my phone. What should i delete when my phone storage is full. How much storage do i need on my phone. How do i get more storage on my phone. What is other on my phone storage. Why is my phone storage full. Can i buy more storage for my phone. How can i get more storage on my phone.

Everyone wants more space on their phone. You can take tons of photos or create a lot of videos. Maybe you download and use many apps or downloads and listen to a wide variety of music. Maybe when you bought your phone, you opted for less storage space than it would be ideal to save some money. In any case, we all know the feeling of controlling the quantity of free storage space, we left and seeing that the memory of the device is uncomfortably near full. We all know that we can eliminate the apps, for example, to clarify some space. But if you want a quick way to free the storage on your phone, the fastest solution is actually to download another app or two. Listen to us: there are actually some useful apps that make it faster and easier to maximize storage on your phone. Some help you find and delete unnecessary files. Others make it easy to get rid of duplicate photos. And others help you identify which app you are not using and can eliminate. Continue reading to check our best choices. We promise you that I would have an extra space for the apps and photos you love in a very short time. 1. CCleaner If you have an Android device, download CCleaner | iStock.com/yuran-78 CCleaner is a highly classified Android app that offers a quick way to clean up the garbage files and get rid of unused slots and bloatware. It is possible to recognize the name from the company's PC and Mac software - which probably makes it obvious that this app is seriously seriously on cancellation of garbage, improving performance and helping you to check what your phone is doing and what Android files present the largest percentage of your deposit. 2. Clean the master clean master will clean your Android phone | iStock.com/ Kikovic Clean Master is still quoted and still as one of the best apps to clean an Android phone. It helps you uninstall the apps you don't use and remove the data that is only taking valuable space. In fact, just to get rid of garbage files is a great way to free up space for things that are more fun and more useful. The app can also clean notifications. It even promises to help your phone faster, Android and can also scan malware-infected files., 3. Duplicate cleaning Cleanup Duplicate Contacts Contacts It is useful for cleaning your address book | iStock.com/ridofranz Cleanup Duplicate Contacts is an appropriate app that, well, clean up duplicate contacts that could clutter your address book. Be clear: this is not a great way to free up a lot of space. But if you are in the process of cleaning up your phone and you want to do a truly complete job, this quick download will make a short job to streamline your address book. Duplicate contacts of duplicate contacts will help you simplify your address book | iStock.com/PattonMania Duplicate Contacts Android is the Address-Book Slimming App for you if you have an Android phone (and many repetitive entries that clutter the list of contacts). Especially if you have dozens or even hundreds of duplicate contacts, this is a quick and easy way to simplify your address book. Which can be quite satisfactory - even if it was not to free a considerable amount of storage space. Android Flic Flic will help you clean your photos | ostock.com/max-kegfire Flic is the perfect app for you if you just want a quick way to eliminate unnecessary photos without going through the problem of organizing and categorization of everything. Flic is shaped after the bait. So everything you have to do is scroll through your photos to quickly eliminate all the shots you don't need. Scroll it to the left to delete a photo and scroll through the right to keep it. Cleaning the camera roll is a quick way (and with Funny) To free up storage space on your phone. 6. Google Photos Google Photos holds you organized | ostock.com/lewistsepulilung Photo Google is the perfect solution for anyone who has many photos but still needs at least some space for apps on their phone. The Android or iOS app cannot only organize your photos, but can support them and even eliminate them to delete them Local device store to free up space. It is a winning situation. Get an unlimited cloud store for high quality photos and you can delete the space at any time of need. 7. Imyfone Umate Imyfone Umate helps delete trash files from your iPhone | ostock.com/ridofranz imyfone Umate is a Mac app that allows you to quickly free space on your iPhone. Once your iPhone has been connected to your computer, the app scans your device. Eliminate hidden, temporary and garbage files. Also, eliminate caches associated with the camera roll, photographic flow and photographic library. You can select photos for mass cancellation or choose instead to compress photos. Also, you can find and remove large files and remove unnecessary apps. 8. Phoneclean Phoneclean is the definitive app to clean the phone | iStock.com/anyaberkut FoneClean is a great way to remove all types of garbage from your iPhone. This Windows or Mac app can delete app caches, app cookies, temporary app files, temporary files download logs, iTunes radio straps, user storage files, iOS IOS Invalid data, the photo caches of the camera, the photo filter cache, photos of the others, photos, photos, photos you have inserted in the garbage, in the cache of the artwork material and in large multimedia files or old. Do you need more? 9. Power Clean Power Clean can even monitor the use of data | iStock.com/zhudifeng Power Clean is an all-class useful application for iPhone owners trying to get rid of part of the garbage that accumulates for months (or years) to use their phones. This app can scan your photos and identify the blurred, duplicate or boring ones so you can delete them. They can also identify videos that are taking a lot of storage space. Furthermore, it can monitor the use of data and test network speed. Useful, right? 10. The roll roll helps you organize your photos | iStock.com/astarot The Roll Allows you to organize your camera roll, find your best photos and get rid of those that don't cut. Using image recognition technology, not just groups the photos based on their content, but it can also highlight the best. The app will automatically tag your photos and show them into categories. You can then identify your best shots and choose to eliminate anything that doesn't look after the rest. By Daniel P. 17 October 2012, 12:02 pm 75 on this day and the smartphones of great screens that are becoming more and more like media consumption devices, storage caveat for our personal information or 1080 video recorders, How much memory is enough? There was a brouhaha lately on the worrying tendency of unibody smartphone projects that do not find a place for a slot for a microSD card to expand the memory that producers have decided to incorporate there. Many phones, from the iPhone, through the HTC a series, for the new Nokia Lumia 920 or the LG Nexus 4 still not announced, are ready to be castigated for the lack of expandable deposit. This is why we wanted to ask you, dear readers, how much memory actually bring your phone - we mean the internal storage that came with your phone, as well as a possible memory card located there. So how many gigabytes do you carry with your phone in total? Check your quantity in the survey below, and Chime in the comments What do you feel right for you at this point. point.
