This was a fantastic game before the added features; Now it's an even more surprising game !! In my reviews, we like most games, I always say that they should add more functionality !! This is the first 5-star evaluation I gave any app for a while !! I think I'm easy to do with stars but there are not only many new games (they will not get tired after playing the 1st times) those who are good, I feel that they are thrown together and dev is not really being at Step with them! So many new is not worth spending a real dollar! This is one of the few games that I would spend real money! There is nothing better for a great price player (don't take advantage or make it impossible to go anywhere without spending real money) and a team of dev which takes care of customers, listen to them ongoing updates and adds functionality sometimes ! My family has played for years! It's really nice that even after acquiring popularity, you're still updating and continues to listen to people !! Thank you guys! :) I hooked myself to this game a few years ago and I can't stop playing. Illerò other games once every now and then, but in the end they are deleted for lack of play. Seriously, no game brought me this excitement. I'm practically being cycling at the moon level for hours. His face annoys me So much so that when I do a neck, flip and die, it's not bad. I've never done reviews, but respect this game enough to do. My wife will ask me [À ç à](#),~ "What did you do, dirt by bicycle on the moon? [À, â](#),~ The answers usually yes. If you don't have this game, take it, plays through the hill level until You can't buy the bike of dirt. So use it on the hill to save for the moon level. Once you're on the moon, the points add up Crazy and in a very short time, your bike will be updated to the maximum and wasting your time to play this game as I do. Have fun! Hi I'm in love with Hillclimd. It is an extraordinary game. If you are reading this and I don't have the game, download it. It really is an explosion. If you are a developer or [À ç à](#),~ "Fixer<sup>À ç à</sup>,~ of the game. Please adjust the trophy truck, I almost my truck almost to the maximum and no matter what the level is, if I hit the soil too hard (first the wheel) my top descend or dies instantly. Please for the love of God fixed that I almost beat my documents countless times and then suddenly died :( I also have some suggestions for the game improvements. I like the new bar at a distance. I think you could improve on this already fantastic add making it more than a graph of the line that is related to the upcoming track. I cheat out of the points not because I don't know my elevation. Maybe launch red dots on the line to simulate the next gas cans instead of counting ... Only the suggestions, Except the instant death bug of the trophy truck. Please adjust this. Game game overall thought! Continue it. It is very appreciated. The developer, FingerSoft, indicated that the Privacy Practices of the app They can include data management as described below.
