Totally Reprise - Anonymous Archive asked: Waight that strange fetish was in spies? Porca whore, you have no idea. I don't know if you saw him after the discovery-the-internet, but the whole show was an excuse for the animators to create material for their dark fetish. Fetish Fuel wiki, who traces the inclusion of strange fetishists in the popular media, introduces the entertainment article by saying â € cood episode of Totally Spies! It turns to a different fetish. Really.â € Inflation, bondage, brainwashing, filling and weight gain, locked, gigantess, and up and up. I mean, the foundation of the show involves three teenage girls wearing latex clothes. The shit is disturbing. There are a lot of examples of disturbing adult animators who carry their divertart-esque fetishes to fruit through television, but â € œTotally Spies! Â € is the example. What is the mystery? you have two broken pictures links, the last photo of Hunter x Hunter Bruh. I liked this fucking show, artists and animators are strange in general. They just ended up having the free kingdom here. You're saying it like it's a bad thing. Do you remember that episode where one of them became a girl of cats and almost shit in a public fountain? The show was fucking wild. I looked back at him the day I was in high school jr or high school jr or high school, too old for it, but he still had no steam and nothing on so fucking tivo. It was good. Hunter x Hunter bisky looks different I looked at him for science. it was fun though, as a childThat stuff. Above my head passion patties. First episode I've ever seen. Never forgotten. I loved this as a child lol, he never noticed anything strange, then hate the internet. Everything is a meme or something edgier then understood. Creator needed a grip for their knots and their children are too stupid to know better. Totally the lights must come back, it was a fun show. Ahhh, Passion Torties .... I remember seen it as a child and I'm having a lot of fun. There was another similar with a blond boy with a cave man as a partner of him and a chick that kills the aliens or a strange shit I liked I too. There was another similar with a blond boy with a cave man as his partner and a chick who kills the aliens or a strange shit that I also liked it. Martin Mystery who also made a crossover episode with TP if I remember correctly. I had seen some episodes again during the day they showed them on the cartoon network, but I didn't remember the fetish stuff until you see mentioned online in recent years. Yes ... it's quite cheeky. Difficult to say if I was too naive at that time to recognize it or not just noticeable to children. Wait for this is not an anime? Yes ... it's quite cheeky. Difficult to say if I was too naive at that time to recognize it or not just noticeable to children. I certainly didn't realize it when I was used to watching him at the moment, until he is introduced to the deviant art and things that appear on the front page over the years ... even if the id says that the show was Rather domestic compared to that. This is not the first, nor the last, cartoon that has a so high quantity of "fetish fuel". I remember the episode that characterized the Android Cheerleader. I feel like you could find practically the same images exact from shows like the Dexter laboratory or the PowerPuff girls? Page 2 All these fetishes and yet they have not faced the most common fetish: the fetish of the foot Sam was the best, Alex was fantastic, it didn't care much about clover. This is a real chicken and the situation of eggs, though. Which came first: fetish or fetish fuel? I saw the whole series the month On Amazon Prime as well as the film on the official YouTube channel. Never thought that felt fetish. I also remember being jealous in the snes days because the only people who got the dragon ball z fighting games on snes over the japan was the france because the cartoon was on the air there I think. then there is the japan that takes the French character to lubn it and creates a series around his descendant lupin iii. So, yeah, a lot of japan and france connections and I have no idea why. two separate episodes of kitten tf? They weren't slender. I liked the show. watch clover and mandy constantly fighting was hilarious. Sam is one of the reasons I like lipsticks....... Friggin Ouiaboos... I lost the spies boat, so I was pretty entertained by the saberspark videos a little back. Wakfu is shit. Growing up is going from Clover to Alex as your favorite spy. I was young and silly. Now I saw the light. I looked at the show and the only thing I remember clover as a skater of amazon figures. It was advertised as something of an action show for girls if I remember correctly, but in 7th degree each guy in my class looked while the girls thought it was just OK. Haha is true. My sister looked at her and looked at her boundage fanservice so that's why I loved it so much. I'm laughing so loud about this wire, shit. When your favas. It's so weird, but the French people are going to hustle! That's why he was so ahead of his time! Yo, this show was great. I loved it when I was a kid. This and some Canadian cartoons on rescuers in planes were some of my favorite shows only on google and probably it's French. The name of the show is the Flight Team. Page 4 Physics aside, did Wat stop you from firing the laser to the door directly? A little simplification but IRL uses mirrors so that the laser does not "fute completely" while exciting electrons to emit more and more identical photons, which greatly amplifies the power of the laser. Normally a mirror will be partially reflective which is where the laser comes out. They almost approach the real mechanism, so do points for effort at least. I think it is difficult to find popular 80/90s cartoon show that it did not have innuendo of some kind. But my favorite is Johny Bravo as the whole show is Johny's joke that can't pick up (my favorite at 0:27) This is totally different from Dan Schneider because they are not taking advantage of young actresses. I had no idea that this was a French show despite being French and watching it as a child Their costumes alone, especially in real-life cosplay, solidified my fetish for tight vinyl dresses: Off topic, but why is French animation clearly inspired by Japanese France, Spain and Italy were bastions of souls west from the 70s. But to be honest, even if I am Spanish, I always thought that TOTALY Spies and Martin Mystery were deaf American Style show from that moment. For example Wakfu is 100% French/Japanese style through and through the mind, and it doesn't look like anything that has been done in America. I looked at the show as a child and I am 100% sure it is worse in my head, their was an episode in which a bad man was guickly cruise ship and turning them into animals. Theirs is a scene where spies are caught and the villain gloat while wearing a coat of fur then proclaims the captain. For some reason he kept with me because even as children, the image of someone who turned someone in an animal, then shaking them made me feel bad, like those new levels of Pinocchio of settles. Besides, what is on the wrong earth with portraying women as muscularly? Why is he bad now? Like it and it was one of the few shows I saw with my sister. But where is the love for Martin Mystery and his myth-based monster / reading? Even so the show, perhaps because it frightened me, like Scooby Doo but for the older children. The rat monster still scares me to this day! There was so much control of the mind in this show. Wasn't there a spin-off / sequel? I don't think anyone said it was a bad thing. Looking around the internet will make you realize that bulky women fall into the category "fetish" which (everything seems to be labeled as "fetish" nowadays TBH) a fetish is an abnormal sexual fixation, so, yes, anything can be a fetish. Off Topic, but why is French animation clearly inspired by Japanese France is, outside Japan, the largest manga and animated consumer, and it has been for the last 30 years or perhaps more. We had souls in the 1970s (!!!) in France. People who grew up watching the "Dorothétà club © e" (mainly the most famous program of the child in France that existed in the 1980s and early 1990s, Airing Dragon Ball, Hunter, are now animators, manufacturers, authorized persons, etc. In addition, many children show nowadays are co-production, French Japanese! The great present is obviously miraculous, huge phenomenon in France, but also in other countries in Europe. Basically a mix of ... Super-Hero / Super Sentii / magic girl, set in Paris. Surprised No one bothered to ask the creators what the deal was with all those things and what was intentionally playing fetishes. This is when you realize that all she's ever done is sex that I loved so much :(I want to go back in time the foot gifs died. A quick sheet of traditional cartoon artist Twitter confirms that these people are horny. I'm surprised at the lack of parental complaints. I remember seeing him as a child with my parent not beating an eye. Like someone looking at the sailor's moon and the Powerpuff girls as a kid, what was the hook to this one I missed? The show? Yes, I looked at Kim as possible, but it was only a change of channel when it happened, I guess. Well, he didn't take his way and it would be strange to start. It is up to first for streaming. It's nice if you like Sailor Moon. ETA: I've never noticed how bad it was animated in the season 1. The last season, broadcast a decade after others, seem to incorporate Adobe Flash. For the best. Also in the United States on Netflix and Disney XD. Look at this as a child, but obviously he didn't see anything wrong with it; I suddenly remember that this existed at 16 and then came to mind that the girls went to a lot of transformations in every episode. The realization scared me. I distinctly remember the girls who encountered the throws that did not stop in front of them and seemed terrified for a second, but the gods turned their belts into a sort of luck nunchakus and were raised? He should have been your favorite from the jump, Clover was angry from what I remember I didn't know better. The same goes for Martin Mystery's sister who was annoying, but she liked it. Even their mom was a milf but we are not ready to have that convo the film preguel and some episodes are free to look at the official YouTube channel if someone is curious to give the series a shot. The complete series is streaming on Amazon Prime, although cropped on widescreen (only season 6, which was broadcast in 2013/2014, is not cropped). I looked at a few weeks ago and I had a great time watching him. Personally, it didn't seem fetish as I said in my previous post soon in the thread ... but maybe it's just me. The show only seemed to try to go the most stupid possible. Hey. Welcome to the official home of Totally Spies on YouTube! Totally Spies is a fantastic and fun TV show on three girls with a touch ... I'm totally Spies As we never got a live action movie Totally Spies It's a good thing. I doubt it would be fun, even though I'm sure Disney banged it like a DCOM chance. Nobody, not even the target audience, wants16-year-old girls have put in these situations but in a way rooted or realistic. See: That Jem disaster in a movie. I looked at this as a child but obviously did not see anything wrong in it; I remember suddenly remembering this existed at the age of 16 and then I realized that the girls who meet some goons that slapped the belts in front of them and seemed terrified for a second, but the Goons turned the belts into a sort of luck character and were relieved? Wasn't it the last season of absolute garbage? That's good. I highly doubt it would be fun, although I'm sure Disney squeezed it as a DCOM option. No one, not even the target audience, wants to see 16-year-old girls put in these situations, but in a rooted or realistic way. See: That Jem disaster in a movie. I think it was 16 only in the first seasons. They moved to university at some point there is no third show from the same creators of TOTALY Spies and Martin Mystery that took place in space or something? The last two seasons had attended the University of Malibu. I've been watching him recently, and I thought he was on the same quality as the rest of the show. Season 6 and the film also introduce several continuity problems, however. I see. I'm going to rewind the series at some point. I really need to get it. For what it's worth, I thought Martin Mystery was much lighter on sexual implications and it was the much better show than the two, but also that he had some step brother X step sister teased. Did the girls finally get a boyfriend? I really remember that you like this guy also there was a crossover episode with Martin Mystery Passion Patties is responsible so much, I'm sure. Just so much. I've seen a lot of this show along with Spider Man the animated series a boring summer when I came to England to be with my grandparents. I guess Kid Me was too innocent, because I didn't notice didn't notice anything about the weird shit and I just took the show to the nominal value. Because Jennifer Hale always flies the best characters. Last modified: 2 June 2020 This show was really fun when I saw it as a first teenager. I don't remember much of the plot, but I liked the dynamics of the characters. I must have been more innocent then honestly, I was more a fan of the mystery of Martin and the strange mystery of Archie. Mystery
