Your on line guide to healing energies, metaphysical properties, legendary uses and the meaning of purchasing the Rodonite Introduction to the meaning and uses of the Rodonite Extraordinary Stone of the Chakra of the Heart, Rodonite shares more of the beautiful pink color of its twin stone, the Rodocrosite. While both expose emotional wounds and scars of the past to heal, restore and invigorate, Rhodochrosite focuses on feeding the self inside and recover all that you are destined to be. The Rhodonite, richer in colors with deeper and lasting effects, takes over and allows you to reach the full potential, concentrating your gifts and your energies outward for the improvement of all. It is a stone of purpose, cooperation and community, altruism and generosity of spirit. It is a talisman to promote the "brotherhood of humanity". [Simmons, 329][Ahsian, 330][Megemont, 155][Melody, 564][Hall, 246] Rhodonite is recognised as an emotional healer and to bring back to the center in times of stress. It is a key "first aid stone" to calm emotional shock and panic, and provides solid support during the process of dealing with painful problems. Rhodonite has a strong resonance with forgiveness and give the soul the love it needs to heal. It gently releases self-destructive tendencies, resentment and rotting anger, and allows you to see both sides of an issue in order to reach conciliation. It encourages love for others, and alignment with the spirituality of the universe to recognize its purpose and how its gifts and abilities can be used to bring about changes on Earth. [Melody, 564][Hall, 246-247][101 Hall, 170] Rodonite is an inosilicate of manganese (chain silicate) belonging to the pyrosenoid mineral group. It occurs mainly in massive habits or compact groupings, coxcomb aggregates, and rarely in the form of transparent crystals in thick tabular form, often with rounded edges. In massive, massive form, it is more often pink to red with black dendritic veins or stains of manganese oxide flowing through it, even if it may be orange-red or brunastro-red. The rare transparent crystals are red or orange, rarely exceed 1 gm in weight, and can be cut into excellent gems. [en.wikipedia.org][www.erefereendeesk.com][www.minerals.net][www.gemdat.org][Simmons, 329] Rhodonite was first discovered in the 1790s in the Ural Mountains of Russia near Malone Sideinikov, and was called orlez by locals, Russian for the Stoney eagle © People began to notice eagles in the region often carrying small pieces of stone to their nests. Soon it became tradition to put the little stones of Rhonite in their children's cradles as well. The custom was subsequently extended to give Rhonite to travellers as a protective stone. The massive blocks of orlez containing Rhonites and other manganese minerals weighing up to 48 tonnes per head have been extracted from this position and many mines throughout the Urals, used for ornamental inlays, massive inlays and beautiful jewels made famous by Czars and nobles. It became the national stone of Russia in the 1913's. [gems.minsoc.ru][www.boliviana.com][www.malachit.ru] [skylineminerals.com] This mineral has been officially named Rhodonite in 1819 by Christoph Friedrich Jasche, from the Greek rhodon, which means 128, rose, and refers to its characteristic pink colour. It was called Peach Blossom Jade, Vermilion Jade, or Pink Marble; and in the Urals like orletz, bakan, hornstone, or ruby spar. It is extracted in many locations around the world, including Massachusetts, the United States, where the official state gem was declared in the 1979. Rhonite is sometimes confused with Rhodosschromate manganese carbonate, as well as with high pressure, low temperature polyoxate. While Rhodochrosite is softer with white band than may be necessary to make a distinction. [Melody EN, 691] [www.mindat.org] [gems.minsoc.ru] [www.gemselect.com] [www.ememelect.com] [www.erefereendeesk.com] Hold Rhodonite to dispel anxiety and stay centered in difficult situations.
