Ap miss fortune aram guide.

Love Tap (Passive) is one of the main reasons for this. Not only is Miss Fortune is really strong early game but once she gets a few items she can deal a lot of damage in the late game with auto attacks and Bullet Time (Ultimate). Most of the time you are the main damage output, so if you are caught by yourself and die then your team is in really big trouble, so make sure you stay safe at all times. The most important thing to note with barrier is that it does not last a long time so you need to make sure you use it when you are about to take damage. This will make the ability bounce from the target minion to the champion and deal a lot of damage. Serylda's Grudge allows Miss Fortune's abilities to slow so it's much easier to land the perfect Bullet Time that the enemies can't escape and Edge of Night grants Miss Fortune with a spell shield that blocks the next hostile ability. Miss Fortune has a very aggressive playstyle that might suit some people. Hunter - Titan As an AD Carry, you will always find yourself with getting a lot of kills or assists which works well with this rune. So try and swap and attack different targets every time to utilize this passive. Ghostblade helps Miss Fortune move around the map quicker and can help when trying to escape enemies. You deal bonus damage whenever you attack a new target. You will gain health each time you get a unique takedown. Ghostblade, Serylda's Grudge and Edge of Night are all great armor penetration items that give Miss Fortune a lot of damage. Miss Fortune has one of the best team fight ultimate's out of all the AD carries. You want to stay as far back from the enemies as possible and allow your front line to go in front of you to tank all the damage. They will bounce and deal a lot of damage to the champion behind them. Make sure you're always with your team as you're quite vulnerable when isolated. As Miss Fortune, you want to be aggressive early game. Brutal This allows Miss Fortune to get more early game damage off to try and get an advantage on your enemies. Follow your Support or other allies around in the mid and late game. Use your Double Up (1st Ability) on a ranged minion at the back and try to aim it so the enemy champion is just behind the minion. Flash Barrier For summoner spells, Flash is a must on most champions. You can also use Make it Rain (3rd Ability) to pike down the enemies and help you attack your mana flow lane. Use your Q on minions that are slightly in front of the enemy champion. If you want to take advantage of the early game and snowball into the mid and late-game then Miss Fortune is the right champion for you. Thank you for reading this guide! Feel free to follow me and ask any questions on YouTube/Twitter/Discord/Twitch/Instagram/Good luck on the rift summoners! If you are at risk, avoid Ulti R entirely or be prepared to cancel your channel prematurely. Miss Fortune is a dragon lane champion that focuses on attack damage to kill the enemy team. It's a great spell to get you out of a bad situation or allows you to flash into the team to get that killing blow! The go-to 2nd spell is Barrier. Muramana Youmuu's Ghostblade Serylda's Grudge Edge of Night Guardian Angel Mercury's Treads - Protobelt Miss Fortune does well when building a lot of attack damage and armor penetration items because her 2nd Ability (Strut) gives her attack speed. Before channelling your Ultimate R, ask yourself if you're in a good position and out of range of incoming CC or damage. Miss Fortune is a great early game champion and does a lot of damage compared to other AD Carries. Manaflow Band With Make it Rain (3rd Ability) being an easy spell to hit the enemies it's really easy to get stack on this rune to gain more mana which helps a lot as the game goes on. But be very careful because you won't be able to move when using the ability. You have one of the highest damage outputs of any AD carry. You can get stacks and get the extra damage from this rune easily and it will help a lot. It's always best as an AD Carry to stay grouped with your team. Onto the runes, we have: Conqueror As an AD carry you will be attacking a lot and using your abilities to do damage.
