holiday of Eid al-Adha in Dhaka, Bangladesh. The population of Bangladesh is over 163 million people. Population growth was 2.14%. In 1967, that number rose to 3.28%, then dropped to 1.52% in 1973, and jumped again to 2.76% in 1979. Since
the 1980s, Bangladesh's population growth has been on a downward trend. In 2020, the country's population growth rate was the lowest ever - 1.01%. It is assumed that by 2050 this indicator will decrease to 0.15%. 9. Russian Federation - 144 373 540 Busy day on Red Square in Moscow. With more than 144 million inhabitants, Russia is the most
populous country in Europe. In 1954, the annual growth of the Russian population was 1.68%. This number declined significantly in the mid-1950s, and 1970s, but then recovered slightly in the 200s, and 1970s, but then recovered slightly in the 200s, and 1970s, but then recovered slightly in the 200s and 1970s, and 1970
effectively lost population. It was not until 2009 that Russia's population growth was only 0.04%, and statistics show that the country will start losing people again from 2025. 10. Mexico - 127,575,530 people cross a pedestrian
crossing in the Zocalo, Mexico City, central Mexico. The second most populous country in Latin America is Mexico with almost 127.6 million inhabitants. Annual population growth in the country was more or less stable in the late 1950s and early 1960s, but began to decline in the 1970s. In 1959 the rate was 3.17%, but by 2020 the rate had fallen to
1.06%. Mexico's population growth is projected to continue to slow through 2050, even as the countries and are among the ten most population growth is projected to continue to slowing population growth, although Nigeria continues to struggle. The
opposite problem is occurring in Russia, where trends indicate that the country will lose population is not at risk if current trends continue. But on the contrary. Read moreStates by Population The 2010 census showed that Alabama had a
population of 4,785,448, an increase of 2.36% to 4,887,871 in 2018. According to the latest estimates, Alabama is home to approximately 1.47% of the total US population. Alabama is the 24th most populous state in the United States and has
an above-average population density of 97 people per square mile. Montgomery, the state capital, has shown slow but steady population is Birmingham. Alaska is a unique state due to its unusual daily routine and extreme cold.
Although it is the largest state by area, it is almost the least population! More specifically, Alaska has 663,267 square miles and the next largest state is Texas at 268,581 square miles. The only area in the US less populated than Alaska is the District of
Columbia, and the difference is less than 25,000 people! Anchorage, Alaska's largest city, is home to over 40% of all Alaskans. Alaska is one of 11 states with a decline in population of 713,906. The decline is measured at 0.23%, reducing the population
from 737,4382018. Arizona. As of the most recent census, Arizona had a population of 7,171,646 in 2018. This number makes Arizona the fourth fastest-growing state in 2018. From July 2017 to July 2017, more than 81,000 people arrived in Maricopa County,
or more than 200 people per day. Home to cities such as Phoenix, Mesa, Chandler, Scottsdale, Tempe, Glendale, and many others, Maricopa County was the fourth most populous county in the U.S. and attracted more net migration than any others, Maricopa County was the fourth most populous county in the U.S. and attracted more net migration than any others, Maricopa County was the fourth most populous county in the U.S. and attracted more net migration than any others, Maricopa County was the fourth most populous county in the U.S. and attracted more net migration than any others, Maricopa County was the fourth most populous county in the U.S. and attracted more net migration than any others, Maricopa County was the fourth most populous county in the U.S. and attracted more net migration than any others, Maricopa County was the fourth most populous county in the U.S. and attracted more net migration than any others, Maricopa County was the fourth most populous county in the U.S. and attracted more net migration than any others, Maricopa County was the fourth most populous county in the U.S. and attracted more net migration than any others, Maricopa County was the fourth most populous county in the U.S. and attracted more net migration than any others was the fourth most populous county in the U.S. and attracted more net migration than a fourth most populous county in the U.S. and attracted more net migration than a fourth most populous county in the U.S. and attracted more net migration than a fourth most populous county in the U.S. and attracted more net migration than a fourth most populous county in the U.S. and attracted more net migration than a fourth most populous county in the U.S. and attracted more net migration than a fourth most populous county in the U.S. and attracted more net migration than a fourth most populous county in the U.S. and attracted more net migration than a fourth most populous county in the U.S. and attracted more net migration than a fourth most populous county in the U.S. and attracte
square mile. Arkansas Arkansas, named after the Siouan Quaapo Indians, is a landlocked state with a diverse geography that includes the Ozark Highlands and Arkansas Timberland Forests, the Mississippi River Lowlands, and the Arkansas Delta. According to the 2010 census, the population of Arkansas increased by 3.57% from 2.9 million to
3,013,825 in 2018 and 3,026,412 in 2019. The population density is below average at 58 people per square mile, making Arkansas the 34th most population, with a population of nearly 200,000. California is the most populous state in the
United States with 39,747,267 people, or nearly 12% of the country's total population. According to the 2010 census, California had an increase of 6.5%. The Golden State has an exceptionally high population density for its size, ranking 13th in terms of population density with a population density of 255 people per square mile. The Greater Los
Angeles Area and the San Francisco Bay Area are the 2nd and 5th most populous city in the united States after New York City. The state of California has a larger economy than
any other state and is the second largest local economy in the world after Sao Paulo, Brazil. Bordered by Oregon, Nevada, Arizona and Baja California is located on the west coast of the United States overlooking the Pacific Ocean. Nevada, Arizona and Baja California is located on the west coast of the United States overlooking the Pacific Ocean. Nevada, Arizona and Baja California is located on the west coast of the United States overlooking the Pacific Ocean.
since the 2010 census. The population increased by 14.31% in 2018 from 5,048,281 in 2010 to 5,695,564 people. The upward trend continues, with the population increased traffic! Despite this increased by 14.31% in 2010 to 5,695,564 people. The upward trend continues, with the population increased by 14.31% in 2010 to 5,695,564 people.
remains below average, even though the state itself is the eighth most populous state in the United States. This number is probably due to the difficult terrain and climate, as well as the vast range of the Rocky Mountains. Located on the east coast, Connecticut is one of the six states that make up America's "New England". It is a rare state with a
steady decline in population since the 2010 census. There are only three other such cases: Illinois, West Virginia, and Puerto Rico Territory. Connecticut's decline in growth rate was gradual, although its population declined from 3,579,125 in 2010 to 3,567,871 in 2019. However, the state has an exceptionally high population density for its size; its
737 inhabitants per square mile is significantly higher than the average of 87 per square mile. This figure is surprising considering that the country ranks 48th out of 50 by area. Delaware belaware belaware population grew from 899,595 in
2010 to 967,171 in 2018 and then to 975,033 in the 2019 Census. This small state has 500 people per square miles. Although Dover is the capital, the largest city is Wilmington. Alaska and Delaware are comparable in terms of population, at 0.22% and 0.29% of the US population, respectively, although
their population density and state size are very different. District of Columbia, informally known as Washington DC, is the capital of the United States. The word "district" refers to an established area, which is not technically a state, but a federal designation. For statistical purposes, the Census Bureau considers the District of
Columbia the equivalent of a state. The area is unique in that commuters from the surrounding suburbs of Maryland and Virginia push the city's daily weekday population to one million, although the actual population is 711,571, according to the 2019 Census. This number shows a slight increase of 1, 3% from the 2018 population of 702,455.
Washington, DC has the highest population density in the country at 11,665 per square mile based on its very small area. Florida is the third most population of 21,646,155 as of the 2010 census of 18,845,785 people. Florida is the third most population of 21,646,155 as of the 2010 census of 18,845,785 people.
beaches and warm climate make the state a trendy destination for vacationers and those looking to live year-round. The Sunshine State is so popular that the 2020 census projected Florida's population to exceed 22 million. Jacksonville alone is home to over 900,000 people, more than Wyoming, the southern state of North Dakota. Alaska, Vermont,
and the District of Columbia. Tallahassee, the state capital, has a population of nearly 200,000. Florida's population density of 404 people per square mile is more than 4.5 times the eighth most population of nearly 200,000. Florida's population of nearly 200,000.
10.63 million, ahead of Michigan for eighth place and accounting for about 3.2% of the US population. Located in the southeastern corner of the North American continent, Georgia is the 21st largest state by total size (by area). The most populous
city in Georgia is Atlanta. The most populous county is Fulton County, with more than a million residents, which is almost more than any other state except Texas, which has 254 counties. The most sparsely populated county in Georgia is Taliferro County, with a
population of just 1,608 in a total area of 195 square miles. Hawaii Hawaii's population is currently estimate of 1,420,491. There are eight main islands in Hawaii: Oahu, Hawaii, Maui,
Molokai, Lanai, Niihau, and Kahoolawe. All but the last one are inhabited. Honolulu is the largest city and county in the US: Kalawao County in the 
considered a county. It has 88 inhabitants! Although Hawaii is small, it is a beautiful and desirable countryits high population density: 221 people per square mile in 10,931 square miles. Idaho Idaho is one of the largest states in the United States, although its population does not match its area. With a population density of just 22 people per square
mile across its 82,747 square miles, Idaho is home to approximately 1.79 million US residents. Only six other states in the US have a lower population density than this one: Alaska, Wyoming, Montana, North and South Dakota, and New Mexico. The current number of inhabitants also reflects an increase of around 2.05% from 1.75 million since 2018.
Idaho's small population can be attributed to the Rocky Mountains and vast lakes, as well as Hell's Canyon, which is 7,900 feet deeper than the Grand Canyon. The most sparsely populated city, Warm River has a staggering three residents. Illinois The
population of Illinois is estimated to be approximately 12,700,381 in 2019, a negative growth rate of 0.32% compared to a 2018 estimate of 12,741,080. Surprisingly, Illinois is one of four states experienced tremendous growth in the 19th century, but despite its current
population decline, Illinois remains the sixth-largest state in the United States. Illinois has a total area of over 57,900 square miles and a population of the state in the Chicago metropolitan area. The population of Chicago is approximately
2.72 million people, which is almost the size of the entire state of Kansas. Hardin County, the smallest county in Illinois, has 3,910 residents. Indiana, the Hoosier state known for its rustic individualism, shares its northern border with
Illinois. The population is estimated at approximately 6,718,616, up about 0.4% from the 2018 estimate and representing just over 2% of the total population makes it the 16th most populous state in the country, with a population
density of 181 people per square mile. Indiana's largest city is its capital, Indianapolis, with a population of over 863,700, making it more population of just 2,061 in 2019. Iowa Iowa is located in the Midwest of the United States and borders the states of Wisconsin,
Illinois, Missouri, Nebraska, South Dakota, and Minnesota. The state is made up of 99 counties and is the 23rd largest state by area. The 2010 Iowa Census reported a population of 3,050,767, with the most recent estimate showing an increase of approximately 3.84%, with a current
population of 3,167,997. Iowa's population is sparse and densely population density is due to the country's large agricultural area. Because the state's economy is primarily agricultural, demand for Iowa's farmland is high. Des
Moines, the state capital, is the state's most populous city with a population of over 217,400 and was once considered America's richest city. However, Urbana, Iowa is the smallest city in the state with less than 1,500 residents. It is estimated that Kansas, located almost in the center of the United States, is home to about 2.9 million people. This
figure shows a moderate growth rate of about 1.8% from an estimated population of 2.85 million in 2010, making it the 36th largest state by land area, covering more than 81,800 square miles. Given this population and area, Kansas' population density of nearly half the national average should come as
no surprise. In fact, there are more than 6,000 ghost towns in the state due to rural-urban migration, also known as peasants. However, metropolises are developing rapidly. Wichita Dwight D. Eisenhower National Airport. Kentucky Formerly the state
of Virginia, Kentucky has grown into its own territory and has now grown and developed to become the 26th most population in 2010. Also known as the Bluegrass State, Kentucky is the 36th largest state at
39,728 square miles. A population density of 114 people per square mile indicates an above-average density that is surprisingly equal in rural and urban areas, although rural areas have higher rates of poverty across the country. Counties in Kentucky are seeing an interesting mix of growth and decline, even though the state is experiencing an overall
population growth rate. The largest area, Jefferson County, has a growth rate of 3.84%, close to the 2010 statewide growth rate of 3.12%. Scott County with a decrease was Martin County with a decrease of 12.31%, although its population is
only 11,323, which is likely, will not be significantly affected. of the country's total population. Louisiana Located on the Gulf of Mexico in the Mississippi River Delta, Louisiana has approximately 4,652,581 people in 64 parishes (as of 2019). There are 25US state by population. Although Baton Rouge is the capital city, the city of New Orleans is the
largest city in terms of both population and area. While Louisiana's population has increased by 2.38% since the 2010 statewide census, from an estimated 4,544,532 to 4,659,978 in 2018, growth slowed slightly to 0.159% in 2019. These current estimates correspond to 108 people per square mile, which is higher than the US average of 87 people per
square mile. However, only 11 of 52 regions, including Louisiana. Maine Located at the extreme northeastern tip of the United States, Maine, or the Pine Tree State, is one of the ten least populated states in the United States,
although it has shown some growth over the past decade. Maine's population is estimated at 1,342,097, an increase of about 1.09% from the 2010 census. The natural hilly landscape and rocky coastline easily explain Maine's low population density, which is nearly half the national average population density of 44 people per square mile, compared to
an average of 87 residents. However, this number makes it the least population lives in the Portland metropolitan area, which has nearly 70,000 residents. The smallest city, Eastport, is actually the easternmost city in the United States. It has a population of just over 1,200 and consists
almost entirely of islands connected by roads. Maryland Maryland may be one of the smallest states in the country, but it certainly makes a difference. It may lack size, but it makes up for it in size and population density. With an estimated population of 6.06 million, Maryland is the 19th most populous state in the United States and covers an area of
just 9,774 square miles. This figure works out to a density of 625 people per square mile, which is seven times the population of the tiny state is also growing inexorably: it is estimated that by 2020 there will be 6.3 million inhabitants.
The state is divided into 23 districts, 16 of which are contiguous. tidal water. The most populous county is Montgomery County with over one million residents and a growth rate of 7.81% since 2010. In comparison, the entire county has the same population as the entire state of Rhode Island. Rhode Island has about one-sixth the population of
Maryland but only about one-tenth the land area. Massachusetts Despite being the sixth smallest state in the country, Massachusetts is one of the most populous states in the United States. The people of this tiny state do a great job covering every
available inch of its 7,840 square miles given the population density of 890 people per square mile is more than 10 times the national average! Massachusetts alone has about 2.09% of the US population, making it the most populous state in New England as well as the fastest growing state. Massachusetts classifies its communities as cities, and with
this structure Gosnold in Dukes County is the smallest city in the state with only 75 residents. The capital, Boston, is the most populous city with an estimated population of 694,784. Michigan Surrounded by the Great Lakes, Michigan is a Midwestern state and the only U.S. state that consists of two peninsulas. In 2019, the state was home to about
10.02 million people, which is about 3% of the US population, representing a population growth rate of about 1.45% from 9,877,535 in 2010. The 20th most populous state. largestMichigan is Detroit is experiencing exponential urban decline due to an unstable car-
based economy. Many residents who leave the city do not actually leave the state; they are moving to the suburbs, even though the numbers undeniably show that some of the population of 5,655,925 in 2019. The most recent
confirmed population figures are from the 2010 census with a population of 5,310,843, showing a population density is surprisingly lower than the average population density is surprisingly lower than the average population density is surprisingly lower than the average population density of 71 people per square mile, compared to an average of 87, although this can be attributed to the state's large area: 79,610 square
miles. Minnesota's geography also contributes to a lower-than-average population density due to large bodies of water and hilly areas in the landscape. About 60% of the population lives in the Minnesota is
Rush City, with a population of only 3,186. Mississippi is located in the southeastern United States and is the 35th most population of 2,987,895. This estimate shows an increase of about 0.58% since 2010. Mississippi is located in the southeastern United States and is the 35th most population of 2,987,895. This estimate shows an increase of about 0.58% since 2010.
the state's population is scattered and lives mostly in rural areas. The state borders Tennessee, Alabama, Louisiana, Arkansas, and the Gulf of Mexico. Jackson, the state capital, is the only city in Mississippi with a population of more than 100,000, and the state's most populous county has shrunk since 2010. Territories up to 300 inhabitantsthey are
classified as villages, and there is one in Mississippi called Satartia with only 55 inhabitants. The main reason for the decline in population in the federal state, even if there is no apparent decline in growth, is the attractiveness of labor markets elsewhere. Missouri Inland Missouri borders eight other states: Iowa, Illinois, Kentucky, Tennessee,
Arkansas, Oklahoma, Kansas, and Nebraska. It covers an area of 68,886 square miles and has a population of 6,147,861, giving it an approximate population growth of 2.53% in the 2010 census and is projected to reach 6.8 million by 2030. Missouri's current and approximate population growth of 2.53% in the 2010 census and is projected to reach 6.8 million by 2030. Missouri's current approximate population growth of 2.53% in the 2010 census and is projected to reach 6.8 million by 2030. Missouri's current approximate population growth of 2.53% in the 2010 census and is projected to reach 6.8 million by 2030. Missouri's current approximate population growth of 2.53% in the 2010 census and is projected to reach 6.8 million by 2030. Missouri's current approximate population growth of 2.53% in the 2010 census and is projected to reach 6.8 million by 2030. Missouri's current approximate population growth of 2.53% in the 2010 census approximate population growth of 2.53% in the 2010 census approximate population growth of 2.53% in the 2010 census approximate population growth of 2.53% in the 2010 census approximate population growth of 2.53% in the 2010 census approximate population growth of 2.53% in the 2010 census approximate population growth of 2.53% in the 2010 census approximate population growth of 2.53% in the 2010 census approximate population growth g
population estimate ranks it as the 18th most population is unevenly distributed. . Larger urban areas have population, with about a third of its residents living in rural areas. Kansas City, Missouri's
largest city, is the sixth largest city in the Midwest and has a population of approximately 501,094. The state has seven county, Mercer Coun
"Big Sky Country" states, is one of the ten most sparsely populated states in the country, at a shocking three people per square mile. This low
population density can be explained by the geographical location, which is largely unsuitable for development. Montana is the only US state bordered by threeProvinces: Alberta, British Columbia and Saskatchewan. Counties with 6 or fewer residents per square mile are called border counties, and forty-six of Montana's fifty-six counties fall into this
category. The state has several large urban areas that appear to be expanding rapidly, while rural areas are slowly becoming less populated. This trend is a general trend in many states. The largest city in Montana is Billings with a population of 110,668. The smallest town that can technically be classified as a village is Ismay, with 21 inhabitants.
Nebraska Nebraska is the fifteenth largest state by area and the 38th most populous state in the country. The 76,872 square miles are home to 1.94 million people, an increase of about 6.09% since the 2010 census. 89% of Nebraska's cities have fewer than
1,000 residents. Only one city in the state has a population of over 300,000: Omaha. The population is estimated at 452,061, nearly double that of the state average of 87. Nebraska's counties continue to experience population
decline as urban areas grow. For example, Cortland, Nebraska's smallest city by population, has only 466 people. Nevada covers an area of 109,826 square miles, making it the seventh largest state in the country. This state is very poorly filled; Only eight states are less populated than Nevada: Alaska, Wyoming,
Montana, North and South Dakota, New Mexico, Idaho, and Nebraska. The current population of Nevada is estimated at 3,087,025, an increase of 14.23% from the 2010 census. A small part of the population lives in rural areas, and approx. The culture of Nevada is incredibly different from the culture of metropolises such as Reno and Las Vegas
These metropolitan areas tend to be the most populous in Nevada. Nevada's capital, Carson City, has a population of 54,321, is classified as an independent city, and is not part of any of the state's seventeen counties. The largest city in Nevada is Las Vegas with a population of 664,304. Las Vegas is the 28th most populous city in the United States
and is known for its hotels, casinos, shopping malls and gourmet restaurants. New Hampshire is one of six New England states in the Northeastern United States. It borders Massachusetts, Vermont, Maine and the canadian province of Quebec. It is also the seventh largest state by area and the tenth largest state. New Hampshire is one of six New Hampshire is one of si
was one of the first 13 states to support cultural tourism to some degree. While there are only six states smaller than New Hampshire has an estimated population of 1.36 million, with a growth rate of 3.58% from the 2010 estimate. The state's
largest city is Manchester, which is also the largest city in northern New England with a population of 8,492, although many towns in the area have populations of around 10,000. New Jersey is one of thirteen original colonies. The only states smaller than Nev
Jersey are Connecticut, Delaware, Rhode Island and Hawaii. Bordered by the Atlantic Ocean to the south, New Jersey is located at the northeastern tip of the United States. The estimated population in 2019 is 8,922,547, an increase of 1.4% from 8,799,624 in 2010. The New Jersey area is heavily used, with an incredibly high population density of
1,213 people per square mile, making it the most heavily populated. In the United States. The only more populous area in the country is the District of Columbia, which is not technically a state. Every country in New Jersey is classified by the Census Bureau as a city. Despite its high population density, there are only four cities in the state with
populations over 100,000: Newark, Jersey City, Paterson, and Elizabeth. Most New Jersey residents live in counties near New York, Philadelphia, and the Jersey Shore. New Mexico had a population of approximately
2,059,179, exceeding two million for the first time. The estimate represents an impressive 14.5% increase in the estimated population over the previous decade. New Mexico is the fifth largest state by area, covering 121,356 square miles. In 2019, the population was estimated at 2,096,034, which means that the population is very rarely spread out.
New Mexico's average population density is just 17 people per square mile, well below the national average of 87 people per square mile. In fact, New Mexico is the sixth most sparsely populated area in the country. Its mountain ranges, deserts and dense forests create difficult living conditions. Most of the state's population lives in Bernalillo Country.
Although Bernalillo is the second largest county in the state by area, it is home to over a third of the state's population. The smallest town in New Mexico has only 31 people! New York, known as the Empire State, is one of the most populous state on the
east coast and the fourth most populous state in the country. For a community of nearly 20 million people, nearly half live in New York, the most populous city is actually more than 33 times the size of New York's second largest city, Buffalo. The state capital, Albany, has a population of
98,469, making it the sixth largest city in the state. Despite its huge population, New York City's growth rate has actually slowed since 2018: its population decreased by 0.26% from 19,542,209 in 2018 to 19,491,339 in 2019. Despite its slowing growth, New York City still has a staggering average of 414 people per square mile, which is well above the
national population density of 87! North Carolina North Carolina is located on the east coast of the United States and is the ninth largest state with an estimated population of 10,497,741. The growth rate is approximately 1.13%, ranking 14th nationally. Although North Carolina is located on the east coast of the United States and is the ninth largest state with an estimated population of 10,497,741. The growth rate is approximately 1.13%, ranking 14th nationally.
population density is impressive, averaging 196 people per square mile, which ranks North Carolina with a population of 827,097, almost as many as South Dakota. North Carolina was one of the original 13 colonies, and while the state was
historically considered a rural area, urbanization has increased over the past three decades, with most areas now considered urban and suburban. North Dakota North Dakota, also known as the Peace Garden State, the Roughrider State, and the fourth least
populous state. Although its economic development has led to an increase in population and a decrease in unemployment, its population is estimated at only 760,900 people. North Dakota currently has one of the highest growth rates in the United States, second only to the District of Columbia, and the state's population is estimated to surpass the
800,000 mark. The only city in North Dakota does not define its territories by population. North Dakota does not define its territories by population. North Dakota does not define its territories by population.
being the 34th largest state, Ohio is the 7th most populous and the 10th most populous state in the nation, growing at just 0.67%, making it ranks 43rd in the country. While Ohio's population growth rate is slow, it is still higher than most of the
country. Ohio's population density is 287 people per square mile, well above the national average of 87, making it 10th in the nation with a total area of 44,825 square miles. Interestingly, Ohio's cities vary widely in height and population. For example, Columbus has been growing at a rapid rate of nearly 10% per decade, while Cleveland has been
losing people at a rate of 23 per day for nearly five decades. Oklahoma is estimated at approximately 3,948,950. The state has a relatively low population density, which corresponds to its size and population ranking. Oklahoma is the 19th largest state by area, covering 68,667 square miles, with an average of 55
people for every square mile in the state. This number makes Oklahoma the 35th most populous state in the country. Oklahoma residents live in the Oklahoma city and Tulsa metropolitan areas, which are among the largest cities in the
United States. Oklahoma City, the state capital, is the state capital, is the state has a population of 403,045. Both cities have a population density of less than 55 people per square mile. Oregon covers 95,997 square miles of
land, making it the ninth largest in the United States, although its population is sparsely spread across its territory. The natural geography of the country plays a significant role in this; Mountain ranges and vast forest areas make the area unsuitable for larger settlements. Despite the country's large area, the state's 2019 population is estimated at
4.25 million. Parts of Oregon are governed by geographic features that make the area unsuitable for housing, resulting in an average population density of only 44 people per square mile. This number makes Oregon the 39th most densely population density of only 44 people per square mile.
Portland has a population of 667,589 and is the 26th most populous city in the United States. The state capital Salem is a state in the Northeastern Great Lakes and Mid-Atlantic regions of the United States. It borders Delaware, Maryland, West
Virginia, Ohio, New York, New Jersey, Lake Erie, and Ontario. Pennsylvania's current growth rate is just 0.24%, ranking it the sixth most population the nation. Although Pennsylvania has a small land area, the population density is relatively high,
as are most of the eastern states. It is now the ninth largest state in the nation with a population density of 286 people per square mile. Most of the state's population lives in and around Philadelphia, as the city owns it1.56 million inhabitants. That's more than the entire island of Hawaii! Puerto Rico Puerto Rico, Spanish for "rich port" and officially
"Commonwealth of Puerto Rico," is an unincorporated territory of the United States located in the northeastern Caribbean Sea, about 1,000 miles southeast of Miami. Florida. If Puerto Rico were a full state in the United States located in the northeastern Caribbean Sea, about 1,000 miles southeast of Miami. Florida. If Puerto Rico were a full state in the United States located in the northeastern Caribbean Sea, about 1,000 miles southeast of Miami. Florida. If Puerto Rico were a full state in the United States located in the northeastern Caribbean Sea, about 1,000 miles southeast of Miami. Florida. If Puerto Rico were a full state in the United States in the United States located in the northeastern Caribbean Sea, about 1,000 miles southeast of Miami. Florida. If Puerto Rico were a full state in the United States located in the northeastern Caribbean Sea, about 1,000 miles southeast of Miami. Florida. If Puerto Rico were a full state in the United States located in the northeastern Caribbean Sea, about 1,000 miles southeast of Miami. Florida States located in the United States located in the northeastern Caribbean Sea, about 1,000 miles southeast of Miami. Florida States located in the northeastern Caribbean Sea, about 1,000 miles southeast of Miami.
indicated that the population of Puerto Rico is approximately 3.73 million. The latest census estimates show that the total population has decreased since the 2010 census, as well as in the 2018-2019 census. The decrease in 2018-2019 is a significant decrease, measuring 2.55%. The largest city in Puerto Rico is the capital of the island, San Juan. It
has an estimated population of about 395,326 people, making it the 46th largest city in the United States. With an average of 900 inhabitants per square kilometer, Puerto Rico is one of the most densely population and population density are
no joke. The estimated population in 2019 was 1.06 million, more than seven other states in the country. The last official census results in 2010 showed a population declined by 0.05% between 2018 and 2019. The state covers only 1,545 square miles
giving it an impressive density of 1,022 people per square mile. Rhode Island is second only to New Jersey in terms of population density. This tiny state has only five counties: Providence, Kent, Washington, Newport and Bristol counties. Providence County has a population of 646,084 and is the only countyIn the remaining four counties, the
population decreased by 1.31%, 0.73%, 0.76% and 2.34%, respectively. South Carolina is one of the smallest states in the country. Despite its size, it has a high population density and is expected to continue to grow. South Carolina's population was estimated at 5.15 million in 2019,
up from 5.08 million in 2018, making it the 40th largest state in the nation, it has an average population of 171 people per
square mile. South Carolina's largest city is Charleston with 140,178 residents, closely followed by the capital, Columbia, with 135,299 residents. The smallest town in the state is Sallie with only 430 inhabitants. South Dakota is estimated at 892,631, an increase of 1.17% from the 2010 census and ranks 11th in
the nation in terms of growth. Its current population ranks it the 47th most population is relatively small in comparison. Despite an area of 75,885 square miles, there are only 12 people per square mile. As in North Dakota, geographic features prevent
mass urban settlement. This, along with the lack of job opportunities, has contributed to migration to other parts of the country. This "rural exodus" is becoming more common in many Great Plains states, although some areas of South Dakota are experiencing population growth. Sioux Falls is one of the fastest growing cities in the entire country and
is growing the fastestState area with 182,574 inhabitants Tennessee The 36th largest state in the country is Tennessee, which is located in the population of Tennessee in 2019 is estimated at 6,833,793 compared to the 2010 census
which showed 6.34 million. The 2010 state census confirmed that Tennessee had a population of 6,346,105, an 11.5% increase from the 2000 census. The 2016 population of 655,770, Memphis is the largest city
in Tennessee. The next largest is Nashville with 654,610 residents. Although Memphis is the largest city, Nashville has a metropolitan population of 1,757,912 compared to 1,341,746 for metro Memphis. Shelby County is the most population of 1,757,912 compared to 1,341,746 for metro Memphis is the largest city, Nashville has a metropolitan population of 1,757,912 compared to 1,341,746 for metro Memphis is the largest city, Nashville has a metropolitan population of 1,757,912 compared to 1,341,746 for metro Memphis is the largest city, Nashville has a metropolitan population of 1,757,912 compared to 1,341,746 for metro Memphis is the largest city, Nashville has a metropolitan population of 1,757,912 compared to 1,341,746 for metro Memphis is the largest city.
County with 461,860 residents. Texas Located on the US-Mexico border in the south-central part of the country, Texas is the largest of the 48 states. The population of Texas in 2010 was 25.1 million; However, with a current growth rate of 1.80% (3rd in the nation), the estimated population of Texas in 2019 is 29,087,070. With a population of
25,145,561 at the 2010 census, Texas was the second most populous state and Texas reached an all-time high in 2019 with over 27 million people. Texas is second only to California in terms of population and second to Alaska in terms of population and second to Alaska in terms of land area. This state has an area of 268,581 square miles and only 105.2 people per square miles. Dallas, Houston
and San Antonio are the three largest cities in Texas, each with a population of over one million. El Paso, Fort Worth and Austin are state capitals, each with a population of over 500,000. Harris Countyas many as 4,652,980 people, in Dallas County - 2,618,148. These are the largest counties in Texas; in both areas, the current growth rate exceeds
10%. Utah has an estimated 2019 population of 3.22 million, a significant increase from the 2010 census of 2.76 million. In 2010, the state's latest census showed that Utah's population increased by 2,763.88%5, up from 20%. Numbers are recorded in the 2000 census. Utah's current growth rate (1.6%) makes it the 4th fastest growing state in the
nation, however its 2019 estimated population makes it the 34th most populous state. The majority of Utah residents (80%) live in the Salt Lake City area, leaving many uninhabited. While Utah is the 13th largest state by area, many uninhabited areas may contribute to its 34th most populous state. Utah has an area of 84,899 square miles and
an average population of 33.6 people per square mile, while Salt Lake City has 1,666 people per square mile. Salt Lake City, with a population of 1.3 million, is the largest metropolitan area. More than 2 million Utahs live in cities along the Wasatch Front, a metropolitan area stretching north to south along the Wasatch Mountains. Vermont Vermont is
also known as the Green Mountain State. It ranks 49th in terms of population and 45th in area. The 2015 census reported that Vermont's population of 626,042; by these estimates, Vermont's population and 45th in area. The 2015 census reported that Vermont had a population of 626,042; by these estimates, Vermont's population and 45th in area.
of 625,741 showed little growth. by 2.8% compared to the 2000 census data. However, Vermont makes good use of its small area. For each of its 9,614 square mile is 67.9, making Vermont the 30th most populous state. Country. Because of Vermont's small population, it is not surprising that
there are no large urban areas. Only three of Vermont's nine cities have more than 10,000 residents, with Burlington at 18,791. The fifth place is occupied by the capital of Vermont, Montpelier, with a population of 7,892 people. Virginia The 35th largest state in the Union is Virginia. It is
located in the central-eastern corner of the country and with the current growth rate of 1.15% ranks 13th in the country. In 2010, the most recent densus showed that the population exceeded 8 million for the first time in Virginia's history. As of 2019, Virginia's population is estimated at 8.57 million, an increase of 380,000 over that number. The
latest support figure was 8,001,024 in 2010, a 13% increase over the 2000 census. Covering an area of 42,775 square miles, with 202.6 inhabitants per square miles, with 202.6 inhabitants. Of the 11 urban statistical areas, Hampton Roads, Northern Virginia and
Richmond-Petersburg are the most populous. Richmond is the capital of Virginia and has a metropolitan area of nearly 1.3 million people; however, Virginia Beach is the most populous city in Virginia Beach is the most populous city in Virginia Beach is the most populous. Richmond is the capital of Virginia Beach is the most populous city in Virginia Beach is the most populous city in Virginia Beach is the most populous.
northwest corner of the United States, Washington State has a population of 7,666,343 and 7,299 square mile. In 2019, Washington's population grew from 7,535,591 in 2018. Washington's population of 6.72 million in 2010 grew to
approximately 7,170,351 in 2015, according to the Census Bureau. The 2010 state census showed that Washington state had a population of 6,724,540 at the time, a slightly over 14% increase from the number recorded in the 2000 census. Washington's largest city is Seattle, with a population of 684,451; its density is 7,962 people per square mile.
Seattle's Tacoma-Bellevue metropolitan area has a population of 3.73 million, more than half of Washington's population. King and Pierce, with a population of 2,188,649 and 876,764 respectively, are the most population. King and Pierce, with a population of 2,188,649 and 876,764 respectively, are the most population.
in the Central Sector of the United States and has an estimated at 1.79 million, it shows a decline from the 2010 census, which put the population at 1.853 million. According to the latest 2010 US Census Survey, West Virginia's
population in 2010 was 1,852,994. This calculation represents a slight increase of 2.5% from the 2000 Census. West Virginia may be losing residents. Moreover, with an estimated population in 2019 of only 1.79 million, they estimate the same. It has an area of 24,230
square miles, with an average of 77.1 people per square mile. The largest city is Charleston, which is also the state capital, with a population of 49,736; behind Charleston is Huntington at 48,638 and Parkersburg at 30,991. Wisconsin in
2019 is estimated at 5,832,661 with a growth rate of 0.33%. Its area is 65,497.82 square miles; it is the 2010 census, the population is 5,686,986 and the 2019 population is 5,686,986 and the 2010 census, the 2010 census, the 2010 census of the 2010 census, the 2010 census of the 2010 census 
US Census in 2010 and the 2019 Census. Wisconsin's vast area has an average of 105 people per square mile, With a population of 248,000, Green Bay with a population of 105,207, and Kenosha with a population of 99,858 are the next
largest cities. The Milwaukee metropolitan area is estimated to have a population of 1.55 million. Milwaukee and Dane counties in Wisconsin. Wyoming Located in the central northwestern sector of the United States, Wyoming is the 10th largest state in the US
with an area of 97,813 square miles, but its population of 572,381 is the lowest of any state in the Union. While Wyoming is experiencing a 1.13% growth, its estimated population in 2019 increased only slightly from the 2010 census. An average of only 5.85 people per square mile of the least populous state in the
Union. The only other US state with a lower population of 63,335. However, Casper, with a population of 60,285, is not far away, and Laramie is
the largest with a population of 98,327, while Natron has 79,547. At least one of the state's 13 largest municipalities had almost 51% of residents in 2005. 2005
