Given text: paraphrased CargoSmart offers a range of innovative products to help you transport your belongings safely and efficiently on road trips and outdoor adventures. Their cargo bags are designed for extra space, weather protection, and ease of access, making them perfect for camping, sporting events, or vacation travel. The rainproof rooftop cargo bag features a durable outer material and urethane-coated zipper to keep contents dry, while the adjustable crossbars expand carrying capacity and provide extra storage space in the vehicle. For larger or heavy items, CargoSmart's hitch-mounted cargo platform is a great solution, providing a secure and corrosion-resistant way to transport valuables. Additionally, their universal cross bars and ratcheting cargo bar offer additional security features for luggage, bikes, and pets during travel. The CargoSmart product line offers a variety of solutions for securing bikes, pets, and cargo in vehicles. The Hitch Mounted Bike Rack can hold up to four bikes and features a heavy-duty steel construction with a ratcheting mechanism that won't bend. The Trunk Mounted Bike Rack holds three bikes and is designed for pickup trucks, while the Adjustable Truck Net keeps cargo safe and secure in most standard truck beds. The CargoSmart Pet Barrier allows owners to create a separate area for their pets. The company also offers innovative ramps designed for loading and unloading smaller-wheeled equipment into trucks, trailers, sheds, and haulers. The Hybrid Ramp features a unique polymer construction with a smooth S-Curve design for excellent grip, while the Aluminum Folding S-Curve Ramp includes rustproof aluminum construction with a wide tread design. Other options include the Tri-Fold Ramp with treads and the Aluminum Fixed S-Curve Ramp, each offering unique benefits and load capacities. The CargoSmart ramp system features a wide tread design for excellent grip traction, with a 1500 lb. per pair distributed load capacity. The S-Curve design provides a smooth transition when loading and unloading, while the LED hybrid lights illuminate the folded ramp to create a lit runway. The ramps are made of durable materials, including aluminum and hybrid polymer, ensuring extra durability and traction. They also come with adjustable safety straps for secure loading and rust-proof construction. The CargoSmart Centerfold Ramp is ideal for small vehicles like push mowers and garden tillers, while the Fixed Arched Ramps are suitable for low clearance vehicles. The ramp plates are perfect for loading ATV's, motorcycles, and lawn equipment, with a 1500 lb distributed load capacity per ramp. They come in two sizes, including 8" and 12", and include rubber protective pads and fasteners.
