## Capm sample test free

```
Passing the CAPM with specific CAPM Practice Exams will triple any exam takers' chances. We have gathered a list of 5,017 questions that you can practice exams, so try to do as many as possible. Remember to take notes when practicing CAPM questions and
answers, especially regarding the mistakes you make. It's okay to get them wrong, but you want to ensure you learn from your mistakes and avoid them in the actual exam. As a guideline when taking exam simulators: CAPM Practice Exam Scored Over 70% -> We recommend score to sit for the CAPM exam confidently. CAPM Practice Exam Scored Over 70% -> We recommend score to sit for the CAPM exam confidently.
Below 70% -> We don't recommend a score to sit for the CAPM exam. Regardless of your career stage CAPM® is an asset that will help you stand out in the job market. It is the perfect introduction to standardized project management. It shows the employer that you are committed and dedicated to project management. It reveals your eagerness to
learn and become more effective in your field. It speaks a lot about your credibility as an aspiring project manager. A benefit of the new PMI "Authorized Training Partners" program is that all ATPs get access to official CAPM Exam questions from PMI; hence, the updated simulators will provide a better sense of the type of questions you will be
facing. This is why we encourage you to consider selecting an exam simulator developed by an ATP organization to get proper training. Premium CAPM Practice Exam Simulators Master of Project - FREE CAPM Questions and Answer (Sample Test Questions) PMI
CAPM Questions in PDFBoth PMP® (Project Management Professional) and CAPM® (Certified Associate in Project Management Institute) certifications. This article will compare CAPM and PMP and discuss their similarities and differences. In general, the PMP® is relevant to project managers who manage projects
from start to finish. The CAPM® is a great way to get introduced to project management processes and techniques. The PMP® is an advanced certificate only suitable for project managers as the perquisites
require experience in all project life-cycle areas. Shane Drumm, holding certifications in PMP®, PMI-ACP®, CSM, and LPM, is the author behind numerous articles featured here. Hailing from County Cork, Ireland, his expertise lies in implementing Agile methodologies with geographically dispersed teams for software development projects. In his
leisure, he dedicates time to web development and Ironman triathlon training. Find out more about Shane on shanedrumm.com and please reach out and connect with Shane on LinkedIn. CAPM is the world's most prestigious certification in the project management field. CAPM certification exam has 150 questions and requires a good CAPM study
plan to pass the exam successfully. Making practice exam, take notes especially for the mistakes you make. Then, go back to the related project management knowledge area and reread the
topic to strengthen your knowledge. Hint: You must check our 100% FREE CAPM Study Guide to pass the CAPM exam in your first attempt, as the capma for the countries with a 99.6% first attempt pass rate, we have
prepared a seven-step CAPM study plan. Read this CAPM questions CAPM practice test and answers in this post. We will be giving rationales for each CAPM questions. You will see the relationship of each CAPM questions in the CAPM practice test with the project
management knowledge areas of PMBOK. CAPM Practice Test Question #1 A manager and the head of engineering discuss a change to a major work package. After the meeting, the manager contacts you and tells you to complete the paperwork to make the change. This is an example of: A-) Management attention to scope management. B-)
Management planning. C-) A project expediter position. D-) A change control system. Answer is C. In this situation, project manager does not have any authority and power. Project manager does only paper work

It will begin in three months and is valued at 2m USD. You are the project manager for an existing project. What is the FIRST thing you should do once
you hear of the new project? A-) Ask management how the new project will affect your project C-) Crash your project C-) Crash your project that your company is going to
execute, you need to be sure whether it will impact your project. Knowledge Area: Integration Management Knowledge Area Watch our "CAPM® exam questions and answers" video CAPM Practice Test Question #4 You are a new project manager who has never managed a project before. It would be BEST in this situation to rely on _____ during
planning in order to improve your chance of success. A-) Your intuition and training B-) Stakeholder analysis C-) Historical information about similar projects in the organizational process assets library of
the organization. Knowledge Area: Integration Management Knowledge Area CAPM Practice Test Question #5 During project executing, a team member comes to the project executing, a team member comes to the project executing, a team member comes to the project executing a team member comes to the project execution at the project execution 
Dictionary B-) Activity List C-) Project scope statement D-) Scope management plan Answer is A. WBS Dictionary. Work packages in a Work Breakdown Structure contain only nouns or a couple of words regarding a work or deliverable. Detailed information on what needs to be done, responsible, prerequisites, successors, due date etc. are included in
the Work Breakdown Structure Dictionary. Knowledge Area: Scope Management Knowledge Area Enroll in our CAPM exam simulator once you complete your capman exam simulator once you capman exam simulator once you capman exam simulator once your capman exam simulator once you capman exam simulator
to add work to the project scope. The project scope. The project scope mentioned by these stakeholders, The BEST thing for the project manager to do is to: A-) Let the sponsor know of the
stakeholders' requests. B-) Evaluate the impact of adding the scope cannot be added. D-) Add the work if there is time available in the project schedule Answer is C. Tell the stakeholders the scope cannot be added. D-) Add the work if there is time available in the project schedule Answer is C. Tell the stakeholders the scope cannot be added. D-) Add the work if there is time available in the project schedule Answer is C. Tell the stakeholders the scope cannot be added. D-) Add the work if there is time available in the project schedule Answer is C. Tell the stakeholders the scope cannot be added. D-) Add the work if there is time available in the project schedule Answer is C. Tell the stakeholders the scope cannot be added. D-) Add the work if there is time available in the project schedule Answer is C. Tell the stakeholders the scope cannot be added. D-) Add the work if there is time available in the project schedule Answer is C. Tell the stakeholders the scope cannot be added. D-) Add the work if there is time available in the project schedule Answer is C. Tell the stakeholders the scope cannot be added. D-) Add the work if there is time available in the project schedule Answer is C. Tell the stakeholders the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be added. D-) Add the work if the scope cannot be
the approved changed requests. If there is not an approved change request, existing scope baseline must be valid and project team must work on to deliver that scope only. In the scenario, scope is defined already but some stakeholders ask to add new work to the scope. This cannot be done unless there is an approved change request. Therefore,
stakeholders must be informed that this new work cannot be added. Knowledge Area: Scope Management Knowledge Area CAPM Practice Test Question #7 Your project management that is too long If the project network diagram cannot change but you have extra personnel resources, what is the BEST thing to do?
A-) Fast track the project. B-) Level the resources. C-) Crash the project. B-) Monte Carlo analysis. The answer is C, crash the project. Because, in first sentence, it is mentioned that you have extra personnel resources. If you have
resources, you can put more resources in an activity to complete it in a shorter time. And this is actually a description of crashing an activity or c
resources and distributing the tasks to all your resources uniformly. And Monte Carlo analysis was another estimating tool which is irrelevant choice as well. Therefore, here the best answer is C. Knowledge Area: Schedule Management Knowledge Are
day 13, an early finish (EF) of day 9, and a late finish (LF) of day 19. The activity: A-) Is on the critical path. Because if you look to the early start and late start values of the activity, you can find the float or the slack of activity's time by
subtracting early start, 3 days, from the late start, 13 days. And it gives 10 days of float for this activity. You will find the same result if you go through subtracting the early finish, 9 days, from the late finish, 19 days. Since the float of activity or the slack of the activity is greater than zero, it's not on the critical path. Remember the critical path
analogous estimating. It would be BEST to: A-) Agree to analogous estimate D-) Try to convince the sponsor to allow expert judgment because it is typically more accurate. Answer is A. Agree to analogous estimating, as it
is a form of expert judgment. Since analogous estimating is a type of expert judgment you can accept it. This is a tricky question. Knowledge Area: Cost Management Knowledge Area CAPM Practice Test Question #10 A schedule performance index, SPI, of 0.75 means: A-) Project is over budget. B-) Project is ahead of schedule. C-) Project is
progressing at 75% of the rate originally planned D-) Project is progressing at 25% of the rate originally planned Answer is C, project is progressing at 75% of the rate originally planned Answer is C, project is progressing at 75% of the rate originally planned. A, is irrelevant because SPI is a schedule performance index. B, is not
correct because SPI is less than one, therefore, the project is behind schedule. And D, says that you have completed 25% of the work that you have completed 75% of your work that you have originally planned. Knowledge Area: Cost Managemented 25% of the work that you have completed 75% of your work that you have originally planned. Knowledge Area: Cost Managemented 25% of the work that you have originally planned.
Knowledge Area Attend our 100% Online & Self-Paced One-Hour Free CAPM Training. CAPM Question #11 You are the program level manager with several projects activities underway. In the executing process group, you begin to become concerned about the accuracy of progress reports from the projects. What would BEST support your opinion
applied in the projects that you are responsible of, you can conduct a quality audit and find out whether there is really a problem. Therefore, here the best answer is A, Quality Audits. Knowledge Area: Quality Management Knowledge Area CAPM Practice Question#12 You are a project manager for a major information systems project. Someone from
the quality department comes to see you about beginning a quality audit of your project. The team, already under pressure to complete the purpose of a quality audit is: A-) Part of an ISO 9000 investigation B-) To check if the customer is following its quality
the quality standards, whether you are following the quality processes. Or it is not related about accuracy of costs submitted by the team. Knowledge Area: Quality Management Knowledge Area CAPM Practice Test Question #13 During every project
team meeting, the project manager asks each team member to describe the work he or she is doing, and the project manager assigns new activities to team members. The length of these meetings has increased because there are many different activities to team members. The length of these meetings has increased because there are many different activities to team members. The length of these meetings has increased because there are many different activities to team members.
Lack of a responsibility assignment matrix C-) Lack of resource leveling. If you read the clauses again, here the project are not clear. So, the reasons of these ambiguities, or these unclear points
about the tasks that will be performed can be lack of a WBS. If you could not decompose your project activities and creation of WBS, then this might be causing the ambiguities in your project will have unclarity about who will do
what in the project. Also, if the team was not involved in project planning, maybe you could not have identified the required tasks, activities that need to be performed in the question. However, lack of resource leveling might be causing a scheduling
problem. Resource leveling is a technique used in schedule management knowledge Area. Resources Management knowledge Area CAPM Question #14 Conflict resolution techniques that may be used on a project include confronting, smoothing, forcing,
and: A-) Withdrawing B-) Directing C-) Organizing D-) Controlling Which of the options is a conflict resolution technique? Answer is A. Knowledge Area: Resources Management
Knowledge Area CAPM Question #15 All of the following about communication models is true EXCEPT: A-) Sender encodes his thoughts and sends to receiver with the assistance of medium. C-) Receiver acknowledges if he agrees with the information he received. D-) Message is decoded by the
receiver into thoughts. Which one is not correct about communication models? The answer is C, Receiver acknowledgement was saying that the received message, but it does not mean that he or she agrees with the received message. Acknowledgement means only
that the message sent by the other party has been received. Therefore, it does not mean an agreement, and here the best answer is C. Knowledge Area: Communications Management Ma
Test Question #16 A project manager is quantifying risk for her project. She needs expert opinion in this process and related experts are spread over to different geographical locations. How can she continue? Using Monte Carlo analysis online Applying the
Delphi Technique Answer is D, applying the Delphi Technique was asking the experts opinion on a topic or on a problem and collecting their responses again. And reiterating this
process until a consensus is reached by all participants, by all experts. Therefore, since expert opinion is important for this case and experts are spread over different geographical locations, we can use Delphi Technique. Knowledge Area: Risk Management Knowledge Area: Risk Management Knowledge Area CAPM Sample Question #17 During risk management activities, 236 risks
 have been identified which are caused by 13 root causes. You could eliminate the 234 risks by your risk management activities. For remaining 2 risks, you, together with your team, could not find a way to mitigate or insure the risks. Also these 2 risks cannot be outsourced or removed from project scope. What is the best solution? A-) Accept the risk
B-) Mitigate the risk C-) Avoid the risk D-) Transfer the risk Answer is A, accepting the risk. When you read the case, the project manager tried first to eliminate the risk should be accepted by the project team and continuous reserves should be
allocated in order to accommodate risks or in order to overcome the bad impacts of these risks when they occur. Therefore, the best answer here is accepting the risk and also planning contingency reserves. Knowledge Area CAPM Question #18 The project team is arguing about the prospective sellers who have
submitted proposals. One team member argues for a certain seller while another team to focus on in order to be awarded to a different seller. The BEST thing the project manager should remind the team to focus on in order to make a selection is the: A-) Procurement audits C-) Evaluation criteria D-) Evaluation crite
management plan Answer is C, evaluation criteria. The source selection criteria defined in plan procurement management process actually defines, in an objective way, how quantitatively, the potential sellers will be evaluated in conduct procurements process. Therefore, if you have applied specific metrics, specific categories to
evaluate, or assess a potential seller in conduct procurement process, then you have to use that metrics, use that categories to evaluate each seller one by one. And the sellers, which got the highest scores should be awarded with contract. Therefore, the team members should not go in argument about the sellers, which got the highest scores should be awarded with contract.
already a quantitative metric to evaluate which seller is best matching to your source selection criteria. Knowledge Area CAPM Example Question #19 A project manager is in the middle of creating a request for proposal (RFP). What part of the procurement process is she in? A-) Conduct procurements B-)
Plan Procurements C-) Control Procurements D-) Close Procurement documents are prepared in plan procurements process. Because procurement document as well. Therefore, it is prepared in plan procurements process. RFP
was defining what the buyer is requiring from the seller. Knowledge Area: Procurement Management Knowledge Area CAPM Practice Test Question #20 You want to group your project stakeholders based on their authority and involvement in the project. Which of the following is appropriate model for this? A-) Power/Interest Grid B-)
Power/Influence Grid C-) Influence Grid C-) Influence/Impact Grid D-) Salience Model Answer is B. Power/Influence Grid. Knowledge Area: Stakeholder represents the influence Grid. Knowledge Area: Stakeholder Management Knowledge Area: Stakeholder represents power of the stakeholder and involvement of a stakeholder represents power of the stakeholder and involvement of a stakeholder represents power of the stakeholder repres
Area You might want to check our CAPM Exam Questions post as well. the CAPM certification exam, including the types of questions to expect and the exam structure. They also provide a free webinar on CAPM certification questions to free tutorials. Depending on your learning style and budget, you
may find some more useful than others. It's important to review each option to determine which best fits your prepared and strategic on exam day can significantly increase your chances of success. Here are some expert tips to
help you excel: Understand the Exam and Certification Process: Familiarize yourself with the CAPM exam is based on the PMBOK® Guide, covering various knowledge areas of project management. Strategize Your Exam Approach: Don't rush through questions, especially the
straightforward ones. Take the time to read each question and all choices carefully, watching out for qualifiers like "MOST correct," "NOT," "EXCEPT," and "BEST possible". Utilize Your Strengths: Focus on questions that play to your strengths early in the exam to build confidence. If you're good at mathematical questions, tackle those first. Prep
with the PMBOK Guide and CAPM Handbook: Read the PMBOK Guide thoroughly and refer to the exam, write down important formulas and information on the paper or electronic whiteboard provided. Practice with Sample Questions: Familiarize yourself
with the exam format and question types by practicing with sample questions. This helps in understanding the logic behind each question and improves time management. Review Training Materials and Participate in Simulators: High-quality training materials and exam simulators can provide you with essential concepts and allow you to practice
under conditions similar to the actual exam. Connect with Others and Consider Joining a PMI Chapter: Engaging with online communities and local PMI chapters can provide additional resources, answer queries, and even offer mentorship. Focus Beyond Memorization: While memorization of formulas and PMBOK guide wording is necessary,
understanding concepts and being able to apply knowledge is crucial. The exam tests application, analysis, and knowledge, with many questions designed to have multiple correct answers. Plan Your Exam Day Carefully: Ensure a good night's sleep before the exam, stay focused and relaxed during the test, and remember that the allotted time is
generally sufficient to carefully consider each question. Stay Relaxed and Confident: It's crucial to approach the exam with a calm and confident mindset. Anxiety can impair your ability to think clearly and affect your performance negatively. Arrive Early: Arriving at the exam center early can help reduce stress. It gives you ample time to settle in and
adjust to the environment before the exam starts. Follow a Healthy Routine: On the day before the exam center. Layering is a good strategy as it allows
you to adjust to the room temperature. Bring Necessary Items: Check the list of allowed items you can bring to the exam center and prepare them in advance. This usually includes your Exam time in a way that allows you to carefully read and
consider each question. Remember, rushing can lead to careless mistakes. Use the Process of Elimination: For multiple-choice guestions, if you're unsure about an answer, try to eliminate the most obviously wrong choices first. This strategy can increase your chances of selecting the correct answer. Review Your Answers: If time permits, review your
answers, especially those you were unsure about. Sometimes, reviewing can help you catch and correct mistakes. Stay Positive and Hopeful: Maintain a positive outlook throughout the exam. Remember, preparation is key, and if you've followed a comprehensive study plan, you are well-equipped to succeed. Plan for a Post-Exam Activity: Having
something enjoyable planned after the exam can give you something to look forward to and can help reduce exam day stress. Incorporating these strategies into your CAPM exam preparation will help streamline your study process and enhance your study process and enhance your study process and enhance your study process.
maximize the benefits of your new certification and set the foundation for your career in project management. Here are the strategies and steps you can take post-exam, based on insights from PMTraining and discussions on the PM PrepCast Forum: Verify Your Exam Results: Initially, check your exam results to confirm your pass status. After
hours after the exam, detailing their score and overall performance. Understand Your Certification is globally recognized and indicates your understanding of PMI's project management standards. This credential can significantly impact your career, offering higher average salaries and international recognition. The
certification is based on PMI's latest Exam Content Outline (ECO) and the PMBOK® Guide - Seventh Edition. Ensure you are familiar with the domains covered in the exam and the knowledge areas, as this understanding can guide your application of project management principles in real-world scenarios. Plan for Certification Maintenance: While the
CAPM certification does not require PDUs like the PMP, staying informed about any changes or updates to the PMI's certification requirements is crucial. Engage in continuous learning to keep your project management skills sharp and up-to-date. This proactive approach will prepare you for any future requirements to maintain or upgrade your
certification. Apply Your Knowledge: Begin applying the knowledge and skills you've gained through your CAPM certification in your current role or seek new opportunities that allow you to utilize and grow your project management capabilities. This hands-on experience is invaluable and can prepare you for more advanced certifications in the future.
such as the PMP. Network and Continue Learning: Join PMI chapters and project management forums online. Engaging with a community of project management professional development. Continuous learning through webinars, workshops, and industry events can further enhance
your skills and knowledge. Consider Further Certifications: Once you've gained more experience, consider pursuing advanced certifications such as the Project Management Professional (PMP). These further credentials can open more experience, consider pursuing advanced certifications such as the Project Management Professional (PMP).
