Guide on Every Stage of the Game This guide is being imported from my kongregate topic. I have been playing since February 20, 2015 and i'm already at the very late game. Early Game FAQs (Up to 300 for all business): Q: When should you do your first reset? A: This depends but generally around 50-300 is a good rule of thumb. I personally did the
first reset at 107 angels. anything beyond 100 takes a long time at this early part of the game.Q: After my first reset when should i reset?A: Generally you want to wait until you at least double the number of angels from the total amount of angels from 
second reset so you wait until you have 600 angels and continue.Q: Should i reset before going to sleep or waiting until morning?A: Generally it's best to reset when you wake up, this way you have a few hours to get everything back to what it use to
be before you can afk and let the game pile up the cash for you while your away. In short if you don't have 2-3 hours to dedicate to the game you shouldn't reset so you can continue to pile up extra angels rather than resetting and going afk and not getting any angels because you haven't established the game to where it was at before you did the
reset. As you continue to do resets the time it takes to establish goes down. Early on it can take 2-3 hours but later on you will notice you only need less than 2 hours to sit there and get it back to what it was before the reset. Q: Best business to invest in?A: That's easy the oil company. It is the business that pays the most and also has the highest
payout per second in the game. sure it takes longer than the rest but you end up with the biggest payouts per second = faster lifetime earnings = faster angels. I've heard that later on in the game lemonades and newspaper become the money makers but in this early stage of the game the oil company is hands down the
best business to put all your hard earned cash into.Q: What is the best way to approach getting angels the fastest?A: Well this method i found took some trial and error by testing 2-3 saves at the same time using the export/import and using multiple sites to compare. Here it is:basically it turns out that you want to get every business to each tier before
moving on to the next business. What i mean is you climb the ladder from 25 then 50 then 200 then 300 for those 50% time reductions for all the businesses. You start with lemonade and you take it to 25 then you move onto newspaper and get that to 25 then do the same for car wash, etc.. until you get oil company to 25 aswell. However
before u get each business to 25 you want to get that businesses x3 payout first. So after u get 25 lemonades it's best to first buy the Newspaper to 25 and your done. by that time you'll have enough cash to buy everything you need for the car wash, then
rinse and repeat until you get to oil company. After you reset you can do the opposite starting method. That is you buy 1 of each business are at 1 (don't forget to buy every business x3 payout though), this method is a little slower at first but then you quickly get
more cash as oppose to climbing the ladder to start because you are going down the ladder to start because you are going down the ladder to start because you are going down the ladder to start because you are going down the ladder to start because you are going down the ladder to start because you are going down the ladder to start because you are going down the ladder instead. After you have oil company to 25 you want to stay and
get oil company to 50 but make sure you buy the oil company x3 payout before u begin to invest the remaining 25. once you get it to 50 for oil company, you want to go down the ladder instead so you go bank, movie, hockey, etc... all the way down to lemonades making sure to buy each business x3 payout before starting on that business. After each
 business is at 50 you want to start the process over to get them all to 100 so you start at oil company again and work your way down the ladder like before and making sure you get the x3 payout upgrade right before you start working on that business. once everything is at 100 you do the same thing again until they are all at 200. Once they all get to
200 the game gets really stale and you have to start waiting to double your angels to do the next reset ASAP, since the cost to get to 300 is a real pain at this point without resetting due to the cash multipliers. And by the time you get to 200 you should have between 1500-5000 angels already. At this point you should also have cash leftover to buy the
Holy Moola Upgrade right before u reset so you get the extra 1% per angel on reset. Myself i have 1805 angels with another 3502 that will be gained on restart so i basically will restart with over 5000 angels and i have only done about 4 resets so far with a lifetime earnings of $1.331 quintillion. So this method works really good for accumulating
angels in the least amount of time and the least amount of the early fame (300 for each business) and are still in the early stages of mid game.Q: Ok so what changes now in Early/Mid Game?A: The short answer is that only a
few things change now. You are still relying on Oil Company to make the most cash per second but now the smaller businesses such as Bank and Oil Company. The key thing to remember here is that now every dollar you make really starts to matter. You have to
analyze and look at each business and say to yourself: "this business cost xx times more than this other business, is it worth putting the money into this business when the other business might pay more cash per second". An example would be a comparison between Bank and Oil Company. The cost of 1 bank would cost let's say 10x less than 1 oil
company, but now we have to look at the cash per second for both bank and oil company is producing more than 10x what the bank does than no you don't want to purchase the bank because that is a bad investment (basic economy 101). On the other hand if the oil company produces 4x more than the bank than yes you want to buy
the bank instead because you'll get a better return on investment rather than dumping the cash into the oil company and getting your money back alot longer as a result.Q: Can i still get all the business to the same time?A: No, that worked in early game but now you can't do that anymore. This is because of what was said earlier about
the smaller business costing a lot more than the bigger businesses. In short if you tried to get every business to 400 at the same time you will quickly notice that the money you invested into the same time than what
should i do now? A: You have to really take the previous answers from this portion of the game and combine them all to figure out what business needs your money next because every dollar counts now. You have to do math analysis and sacrifice angels to get past this portion of the game. I'll give you an example my businesses are as follows: 760
Lemonades, 350 newspaper, 350 Car Wash, 360 Pizza, 370 Donuts, 370 Shrimp, 400 Hockey, 410 Movie, 440 Banks, 500 Oil Companies. As you can see i no longer try to get everything to 400 because at this point it is way too expensive to do that. Generally you want to invest more into the bigger businesses and less to the smaller businesses with the
exception of Lemonades because they are cheap for the entire game so you can easily purchase lemonades in batches of 100 easily because you will end up having a lot of extra spare cash laying around and will say to yourself for example: "hmm i have $1 septillion and it only costs $16 sextillion to purchase 100 lemonades". Q: Can i still use the tips
from early game for the cash upgrades? A: Yes and no, short answer is that you still can but as you progress closer to 400-500 oil company and all profits x3 upgrades. You still need to save up for those but sometimes you will notice that the oil company upgrade will cost $800 in the cash upgrades. sextrillion and that you can purchase 100 oil companies for around $160 sextillion. You just have to do some quick analysis now and say to yourself: "If 100 oil companies costs about 80% less than the cash upgrade than why should i save up for the cash upgrade than why should is ave up for the cash upgrade first". And the answer is you don't save up for the cash upgrade than why should is ave up for the cash upgrade than why should is ave up for the cash upgrade than why should is ave up for the cash upgrade first.
more from getting a quick x2 from buying the 100 oil companies and saving a quick 80% of your cash at the same time rather than saving up 80% more cash to get a x3. once the oil company gets too expensive than you go and buy the cash upgrade for it like you were doing in early game. Q: Ok so now that i know all this is there anything else i need
to know? A: Yes make sure you start sacrificing angels at this point. Don't be afraid to spend more than 1% of your angels in order to get over humps a lot more quickly. As long as you don't spend more than 25% of your angels in order to get over humps a lot more quickly. to the middle of the ranks and Oil Company is now the 3rd worst businesses. Q:Anything Else? A: Yes from this point forward all the businesses all the right side all now only reach the next tier upgrade at every 250 instead of the 100 like before. The same goes for lemonades. The other remaining 4 businesses (Newspaper, Car Wash, Pizza, and
Doughnuts) still have their upgrades at 100 so take advantage of these changes and make sure not to be dumping cash into the businesses that require 250 if you don't have the 250 to get the upgrade when using that cash on a 100 tier businesses that require 250 if you don't have the 250 to get the upgrade when using that cash on a 100 tier businesses that require 250 if you don't have the 250 to get the upgrade when using that cash on a 100 tier businesses that require 250 if you don't have the 250 to get the upgrade when using that cash on a 100 tier businesses that require 250 if you don't have the 250 to get the upgrade when using that cash on a 100 tier businesses that require 250 if you don't have the 250 to get the upgrade when using that cash on a 100 tier businesses that require 250 if you don't have the 250 to get the upgrade when using that cash on a 100 tier businesses that require 250 if you don't have the 250 to get the upgrade when using that cash on a 100 tier businesses that require 250 if you don't have the 250 to get the upgrade when using that cash on a 100 tier businesses that require 250 if you don't have the 250 to get the upgrade when using that cash on a 100 tier businesses that require 250 if you don't have the 250 to get the upgrade when using that cash on a 100 tier businesses that require 250 if you don't have the 250 to get the upgrade when using the 250 tier businesses that require 250 tier businesse
where it will take you a few days just to get over the Very Late Game Hump because now everything gets really longer and slower because now everything gets really longer and slower because now everything gets really longer and slower because now each money tier only has 4 upgrades (example 1,250, 500, 750 then repeats for every money tier after).Q: Okay so what is different now?A: Not much has changed. Doughnut is now the complete king of all
the businesses with Car Wash coming in 2nd, Bank is 3rd, and Newspaper at 4th. Newspaper gets very expensive now so to buy the next 100 upgrade is a very long and slow process but eventually newspaper will start climbing the ranks until it eventually becomes the new king on the block. Q: Anything else I need to know? A: Yes, waiting to double
your angels is very hard to do because you start getting angels very slowly now. sometimes it's best to reset when you are close to the your current angels like before. End Game FAQ:Q: What is different in End Game?A: I don't know haven't
gotten there yet will edit this when i get there :)that's it for the FAQs now on to my stats for each stage of the game after Mid Game:Mid Game (reached these stats on Day 15):1100 lemonades = $13.867 decillion / sec600 pizza = $52.493 nonillion / sec700 donuts =

 secas you can see Shrimp at this stage in the game is the big money maker followed close behind is Doughnuts. At this point Oil company is the 3rd worst company producing my cash flow while Lemonades dropped all the way to the middle of the pack at #5. I was a bit shocked to see Bank as the worst business at this stage aswell. Even newspaper
shocked me that it is now 3rd highest money maker.at this point when a business gets to 3000 you no longer get bonuses and unlocks every 100 it now becomes every 250 instead which means you have to manage your businesses and unlocks every 100 it now becomes every 250 instead which means you have to manage your businesses and unlocks every 100 it now becomes every 250 instead which means you have to manage your businesses and unlocks every 100 it now becomes every 250 instead which means you have to manage your businesses and unlocks every 100 it now becomes every 100 it now 100 it now

and Oil is in the middle of the pack. this was accomplished yesterday or the day before (today is 4/9/15), but trying to get the last 50 upgrades is a real pain now.that's it for now will follow up with end game when i get there. Angel Investors increase all of your profits by 2% each
(This bonus can be increased with some upgrades). So 1 angel Investor will give you an overall profit increase of +2\%, 2 angels = +4\% overall profit and so on. There is a catch to Angel Investors. They only give a benefit once you have reset the game, or
used an Angel Claim, which allows you to claim all your available Angels without resetting. These can be obtained in the Shop for 20 Gold, as well as a few other ways. Angels are the most important element to strategize for both claiming and sacrificing. It is suggested that you claim them when the amount you've gained is at least the amount you've
started with after your last reset (before spending any), and if it's your first claim, it's suggested to wait until they accumulate to 100 or more. Angel Upgrades You can also buy upgrades with angels to further boost your profits, but spend them wisely, because you will lose the profit bonus from the angels you spend, and the upgrades & managers
must be rebought after each reset. Unspent angels, on the other hand, persist and accumulate between resets, so any angels you claim by resetting will help you from then on, no matter how many additional times you reset. Angel upgrades & managers that cost more than 1% of your current angels will give a confirmation prompt, and those that cost
15% or more give a more severe warning. In most cases, non-all profit upgrades should not be bought when they give the confirmation prompt. updates that allow players to access a bonus "planet" with new unique businesses, managers, and upgrades. They are usually only playable for about 2 - 4 days. Players who complete these events in the allotted time are rewarded with unique suits, badges, MegaBucks, Gold, and time warps. Players can gain points through completing goals that can
be seen by pressing the goals button on the right-hand side of the screen. They will consist of making / stockpiling / spending cash, owning / buying investments, and watching ads. Complete a Goal, a chime plays, letting you know that a Goal has been
completed. Sometimes, Golden Goals appear. Only one Golden Goals are much harder but reward at least 2,000 points. They only have 3 hours before they expire. If you fail to complete it before it expires, you will have to remove it, and you get no points. For users who want to complete
events, it's recommended to allow AdCap to send you messages in reminder that there is still one available to try to complete while idling. An ideal strategy for the goals that tell you to buy more investments, you can restart your business and claim angels and buy a certain amount of investments until you see an exclamation mark or hear the
completed goal sound indicating that you finished that specific goal. Now, for most users viewing this guide may ask themselves: "I've not been playing for long and am just now able to access events. Is there any point in playing these so soon? Won't the people with the best suits and badges always win?" My response to this is, you should certainly
still play. The first thing to remember is that the goals a beginner is set are far easier to complete than those offered to an experienced player with better suits and badges. Developing an effective event strategy is more important than having the
very best outfit or badge. You can score heavily regardless of the state of your inventory and what you choose to wear during the event. Tips on the best way to play events are variable, and it is recommended to voice what you think is ideal and what isn't to others to gather a broad opinion on how to do your best. Top 5). A strong suggestion I have is to join late to events, as you're more likely to be put with less competitive users. Although, always pace yourself, if you feel the event will take you more than a day to finish, then start earlier. There are 12 rewards you can win in each event, depending on the number of points needed, which also varies depending
on each event. Most events require around 100,000 points for the top in-event reward, but it ranges from 85,000 - 120,000. These rewards given at the end of the event, which is determined by your final position on the
leaderboard. After you've claimed all rewards in the event, you can still keep playing to earn points for the leaderboard is answered in the FAQ section. Suits and Badges are special items which boost a part of the game when worn. Some of them can be purchased with MegaBucks, and some can
be obtained from events. Only one piece in each slot can be worn at a time, located in the Career menu. All blue, gold, white, green, and teal suits can be purchased in the Shop (Steam only). Suits can also be obtained from vaults (mobile only). Suits can also be obtained from vaults (mobile only).

you need! Many badges are gained from a specific event and will boost the event it's from, but there are also many badges that boost one or all businesses on Earth, The Moon and Mars, and also standalone badges you can gain from Vaults which may boost anything or any event, such as the "Sneak-Kings" that add a 75% boost to the profit caster in
the Black & Blue Friday event. The trophy badges gained from coming in certain tiers in events are not equippable but they look STUNNING in your inventory. It's common when people win giveaways for any badge of choice to select the Portrait of Wealth badge as it is otherwise impossible to get and is the only tycoon badge in the game. But, the
 badge does not stack and increase its boost past the original 50% speed boost, which is why it's also common that people request the Hotdog Amuse Bouche, which is found in Vaults and the Capitalist Cakeday event. It may seem confusing when you've watched an ad to multiply your profits, but they barely increased. This is due to the way multipliers
 (other than upgrades & unlocks) work. Any profit multipliers from badges, suits, the shop, ads, and the short bonus that can be activated in Mars and some events all stack additively with each other. For example, a x12 gold multiplier and a x4 ad bonus would add to make a total of x16, not multiply to make a total of x48. Speed bonuses from Suits
and Capitalist Connections multiply with profit and speed multipliers, but add with themselves, since they are a separate type of bonus. Flux Capitalors multipliers with profit and speed multipliers. Unlike speed multipliers (which reduce the cycle
time for businesses), Flux Capitalors make the timer for businesses decrease at a faster rate than normal. You've probably seen the word "Vaults" thrown all over this guide but may be wondering what they are. Vaults are a mobile-exclusive item that can be purchased from the second tab in the shop. There are 4 different vaults, and 2 different types
There are Item Vaults and Connection Vaults. Connection Vaults give Capitalist Connections for whatever planet or event you're on Mars, it'll drop Mars connections (BUT you can select which one you want to get outside that planet or event by hitting the drop-down menu and
selecting buy on the bottom in the collection menu). Mini Item Vault - A Vault that can be purchased for 200 MegaBucks that drops time warps, free angel claims, and low rarity Suits & Badges (Entrepreneur, Executive and rarely Mogul). You would usually purchase these after you have bought every possible thing to buy with MegaBucks, since this
 will ultimately become their only purpose. Big Item Vault - A Vault that can be purchased for 50 Gold that drops time warps, free angel claims, and high rarity Suits & Badges (Mogul, Magnate and rarely Tycoon). Mini Connection Vault - A Vault that can be purchased for 10 Gold that drops 3 - 9 random Capitalist Connections. Big Connection Vault - A Vault that can be purchased for 10 Gold that drops 3 - 9 random Capitalist Connections. of your managers on Earth are gold, you get a ×25 Profit Boost for all your profits. If you exceed 10 of a manager, it gets converted into 5 MegaBucks. You also get rewards for your total connection progress for each planet / event: at 25% you get a Time Warp Express; 50% a 1-Day Time Warp; 75% an Angel Claim; and 100% 50 Gold. Capitalist
Connections will not be removed from you after an event ends, and you can purchase them outside an event from the Shop if you wish. Spending gold on Connections is inefficient, as buying multipliers & Flux Capitalors from the shop is much more beneficial. However, long-term completionists may seek to obtain all of the connections. Reddit and itself

October 31, 2019-February 28, 2020 (event #146 - mobile event #166) Average amount for all events (Exact and Rounded to the nearest whole number) (This excludes Cashella, Gates of Heck, and Making It Rain since those events don't have added unlocks). (This excludes Cashella, Gates of Heck, and Making It Rain since those events don't have added unlocks).
= 33 (33.21) Average: 1946/19 = 102 (102.42) (This excludes Cashella, Gates of Heck, and Making It Rain since those events don't have added upgrades). (This also counts capitalist cakeday as 3 events since there are 3 versions). Average: 1501/19 = 79 (79.00) N/A Multiplier info[] all multipliers act the same as on other
planets with the key difference being that they're not permanent and will only last till that specific event ends. Use your gold wisely Event info for mobile[] The information in this section is for Live Rich and Profit, The Root of All Evil, The Excellent Adventure, Profit-A-bowl, Live Your Profits, and Saturday Morning Fever. For the 6 events above, most
of the mobile exclusive "all profits" upgrades are spaced apart so they cost about 4x the previous upgrades and unlocks fly by in most events making them speed up gameplay to the point of having 1,000x or more angels per reset for a while. This also makes completion come very quickly after getting to the mobile
exclusive unlocks and upgrades. This is a common occurrence in all events with them. (Gates of Heck, Cashella, and Making it Rain don't have any added unlocks or upgrades as these events weren't available between October 31, 2019 and February 28, 2020 when unlocks and upgrades were being added to events).
