When Weber introduced the original Genesis in 1985, it transformed the gas BBQ landscape. Traditionalists who preferred cooking over open flames were initially doubtful, but they quickly recognized that in a fast-paced world, the convenience of igniting a gas BBQ and the exceptional flavor it offers made the Genesis a compelling choice for
backyard grilling. The Weber Genesis E-325 is part of the updated Weber Genesis E-325 comes with a host of impressive features. The Evolution of Excellence: Weber Genesis E-325 comes with a host of impressive features. The Evolution of Excellence of grilling.
innovation. Building on the success of previous models like the Weber Genesis II E-325, this latest iteration refines what was already excellent while introducing new features that enhance the overall grilling experience. What truly sets the Weber Genesis E-325 apart is its thoughtful design that considers both form and function. Every element serves already excellent while introducing new features that enhance the overall grilling experience.
a purpose, from the four locking wheels that provide stability and mobility to the convenient side tables that offer ample prep space. The cabinet beneath provides covered storage for the propane tank and grilling accessories, keeping everything organized and protected from the elements. For those who appreciate detailed specifications, here's a
comprehensive breakdown of the Weber Genesis E-325 specs: Dimensions: 27"D x 57.7"W x 48.1"H Weight: 188 pounds Primary cooking area: 641 square inches Warming rack: 128 square inches Total BTU-per-hour input: 39,000 BTU Sear zone: 13,000 BTU concentrated area
Ignition system: Electronic Crossover Cooking grates: Porcelain-enameled, cast-iron Flavorizer bars: Porcelain-enameled Fuel type: Available in liquid propane or natural gas Handle material: Cast iron Warranty: 10-year limited warranty on most components Assembly required: Yes View Deal Here Check Price on Amazon The
Heart of the Weber Genesis E-325 At the core of the Weber Genesis E-325's features lies its impressive three-burner system, which delivers a total of 39,000 BTUs of cooking power. But raw power alone doesn't make a great grill—it's how that power is controlled and distributed that matters. The Genesis E-325 excels in this regard with its innovative
PureBlu burner system. These uniquely designed burners feature a tapered shape that ensures consistent flame and even heat distribution across the entire 513-square-inch main cooking area. What's particularly clever about the PureBlu design is the raised-flame openings that prevent food debris from falling into the burners, significantly reducing
the risk of clogs and corrosion over time. Complementing the main cooking area is a 128-square-inch warming rack, bringing the total cooking of multiple items at different temperatures - perfect for preparing complete meals outdoors. The extra-
large sear zone deserves special mention as one of the standout Weber Genesis E-325 features. This concentrated area delivers intense heat (13,000 BTUs) and is specifically designed for creating restaurant-quality sear marks on steaks and other proteins. The ability to sear multiple steaks at once makes this grill particularly appealing for those who
enjoy entertaining. Read more: Weber 22-Inch Kettle Grill Review Construction and Materials The Weber Genesis E-325 specs reveal a grill built with longevity in mind. The cooking grates are constructed from porcelain-enameled cast iron - a material chosen for its superior heat retention and distribution properties. These heavy-duty grates not only
create perfect sear marks but also transfer heat efficiently to food for consistent cooking results. Below the cooking food, vaporizing them to create flavorful smoke that enhances the taste of grilled items. At the
same time, they shield the burners from direct drippings, reducing flare-ups and extending the life of the burner system. The cookbox and lid are made from porcelain-enameled steel, offering excellent heat retention while protecting the elements. This construction creates an environment similar to an outdoor oven when the lid is closed, allowing for
versatile cooking methods beyond direct grilling. See also Traeger Ironwood 885 ReviewThe Weber Genesis II E-325 stainless steel grates option, available in some models, offers an alternative to the standard porcelain-enameled cast iron grates. While both perform excellently, the stainless steel version may appeal to those who prefer easier
maintenance and cleaning. Beyond the core cooking capabilities, the Weber Genesis E-325 incorporates numerous thoughtful features that enhance the overall user experience. The electronic ignition system provides reliable, one-touch startup every time, eliminating the frustration of multiple attempts to light the grill. The built-in lid thermometer
allows for precise temperature monitoring without lifting the lid and releasing precious heat. This is particularly important for success. Storage solutions abound with the Genesis E-325. The side tables provide ample space for food prep and plating while integrated
tool hooks keep grilling utensils within easy reach. The enclosed cabinet below the grill not only hides the propane tank from view but also provides protected storage space for accessories. The grease management system represents another thoughtful design element. Drippings not vaporized by the flavorizer bars are channeled away from the
burners into a removable catch pan, making cleanup simple and reducing the risk of grease fires. For those looking to expand their outdoor cooking capabilities, the Weber Genesis E-325 is compatible with the WEBER CRAFTED Outdoor Kitchen Collection. This system allows for interchangeable cooking surfaces - including a pizza stone, griddle,
dual-sided sear grate, and Dutch oven - that significantly expand the range of foods that can be prepared on the grill. Performance in Practice Reading the Weber Genesis E-325 specs is one thing, but how does this grill perform in real-world cooking scenarios? Exceptionally well, according to extensive testing and user feedback. The grill reaches
cooking temperature remarkably quickly, typically in about 5 minutes. This rapid heating is particularly impressive given the substantial cooking area and heavy grates that need to be heated. Once up to temperature, the Genesis E-325 maintains heat consistently, even when the lid is opened repeatedly during cooking. When it comes to searing, the
dedicated high-heat zone produces impressive results. Steaks develop a beautiful crust while remaining perfectly cooked inside, rivaling results from high-end steakhouses. The sear zone's ability to handle multiple steaks at once makes it ideal for entertaining without keeping guests waiting. For indirect cooking, the three-burner design allows for
excellent temperature control. By turning off the center burner and placing food in the middle of the grill, items can be cooked gently with convection-like heat circulation. This method works beautifully for larger cuts of meat, whole chicken, and even some baked goods. The Weber Genesis E-325 propane gas grill shows impressive fuel efficiency in
extended testing. The precise control and even heat distribution mean less propane is wasted, and a standard 20-pound tank provides many hours of cooking time before requiring replacement. Maintenance and Durability One of the hallmarks of Weber grills has always been their longevity, and the Genesis E-325 continues this tradition. The high-
quality materials and thoughtful design make this a grill that will provide years of reliable service with proper maintenance. Day-to-day cleaning is straightforward. The procedule removable grease tray makes the
disposal of drippings simple and mess-free. For more thorough cleaning, the Weber Genesis E-325 manual provides clear instructions for disassembling components like the Flavorizer bars for deeper cleaning. This periodic maintenance helps prevent buildup that could affect performance and extends the grill's lifespan. Protection from the elements
is important for any outdoor appliance, and a Weber Genesis E-325 grill cover is highly recommended. The custom-fitted cover shields the grill from rain, snow, and UV damage, preserving both functionality and appearance. The confidence Weber has in this product is reflected in their warranty coverage. Most components are covered by a 10-year
limited warranty, providing peace of mind that this investment will deliver value for many grilling seasons to come. WeightApprox. 130 lbsApprox. 135 lbs Color OptionsBlack and Stainless SteelBlack and Stainless Steel Price RangeTypically lower than SP E-325Higher due to enhanced features Versatility Beyond Basic Grilling The true value of the Weber Genesis E-325 becomes apparent when exploring its versatility beyond basic grilling. While it excels at cooking
burgers, steaks, and chicken, this grill is capable of so much more. Indirect cooking opens up possibilities for roasting and baking. By turning off burners directly beneath the food, the grill becomes an outdoor convection oven. This technique works beautifully for items that benefit from slower cooking at moderate temperatures, such as whole
chickens, roasts, and even desserts like fruit cobblers. Smoking is another technique that the Genesis E-325 handles with surprising proficiency. By utilizing smoking boxes or pouches filled with soaked wood chips, a delicious smoky flavor can be imparted to foods. While it won't replace a dedicated smoker for lengthy low-and-slow cooking, it
performs admirably for shorter smoking sessions. When paired with WEBER CRAFTED accessories, the range of cooking options expands dramatically. The griddle insert transforms the grill into the perfect breakfast station for pancakes, eggs, and bacon. The pizza stone allows for crisp, wood-fired style pizzas with minimal effort. The Dutch oven
 insert makes stews, chili, and even bread possible on the grill. This versatility makes the Weber Genesis E-325 more than just a grill - it's a complete outdoor cooking system that can handle nearly any culinary challenge thrown its way. Year-Round Performance: Grilling Beyond Summer While many associate grilling with summer, the Weber Genesis
E-325 is designed for year-round use. Its robust construction and powerful heating system allow it to perform well even in less-than-ideal weather conditions. In cooler weather, the grill heats up quickly and maintains temperature effectively despite heat loss to the environment. The heavy lid provides excellent insulation, creating a stable cooking
environment even when outdoor temperatures drop. This allows dedicated grill enthusiasts to continue enjoying outdoor cooking well into fall and winter. The genesis of many memorable holiday meals can be traced back to this versatile grill. From Thanksgiving turkeys to Christmas roasts, the Genesis E-325 handles special occasion cooking with
aplomb. The generous cooking area accommodates larger cuts and multiple dishes simultaneously, perfect for feeding gatherings of family and friends. The Investment Perspective: Value Over Time With a retail price ranging from approximately $849 to $1,190 depending on configuration and retailer, the Weber Genesis E-325 represents a significant price ranging from approximately $849 to $1,190 depending on configuration and retailer, the Weber Genesis E-325 represents a significant price ranging from approximately $849 to $1,190 depending on configuration and retailer, the Weber Genesis E-325 represents a significant price ranging from approximately $849 to $1,190 depending on configuration and retailer, the Weber Genesis E-325 represents a significant price ranging from approximately $849 to $1,190 depending on configuration and retailer, the Weber Genesis E-325 represents a significant price ranging from approximately $849 to $1,190 depending on configuration and retailer, the Weber Genesis E-325 represents a significant price ranging from approximately $849 to $1,190 depending on configuration and retailer, the Weber Genesis E-325 represents a significant price ranging from approximately $849 to $1,190 depending on configuration and retailer, the Weber Genesis E-325 represents a significant price ranging from approximately $849 to $1,190 depending on configuration and retailer and retail
investment for many households. However, when viewed through the lens of value over time, the picture becomes clearer. See also Ninja Woodfire Pro XL ReviewLesser grills with lower initial purchase prices often require replacement within 3-5 years due to deteriorating performance, rust issues, or parts failures. In contrast, the Genesis E-325,
with proper care and maintenance, typically provides 10-15 years of reliable service. When amortized over this extended lifespan, the annual cost of ownership becomes quite reasonable. Fuel efficiency adds another dimension to the value equation. The precise control and even heat distribution of the Genesis E-325 result in less propane used
compared to less efficient models. These ongoing savings add up over years of use, offsetting some of the initial cost premium. Resale value is yet another consideration. Well-maintained Weber grills typically retain significant value further
enhances the total cost of ownership calculation. FAQs 1. What are the key features of the Weber Genesis E-325 features include a three-burner system delivering 39,000 BTUs of cooking power, an extra-large sear zone for perfect steaks, PureBlu burners for consistent heat distribution, porcelain-enameled cast-iron
cooking grates, flavorizer bars to enhance flavor, a comprehensive grease management system, and compatibility with WEBER CRAFTED accessories. The grill provides 641 square inches of total cooking area (513 main cooking surfaces plus 128 warming racks) and compatibility with WEBER CRAFTED accessories. The grill provides 641 square inches of total cooking area (513 main cooking surfaces plus 128 warming racks) and compatibility with WEBER CRAFTED accessories.
325 compare to the Weber Genesis E-315? In the Weber Genesis E-325 vs 315 comparisons, the main difference is the E-325's enhanced sear zone capability, which the 315 lacks. The E-325's sear zone makes a noticeable difference for
those who prioritize searing steaks and other proteins. The price difference reflects these enhancements, making the E-325 propane gas grill available in a natural gas version? Yes, the Weber Genesis E-325 propane gas grill is also available in a natural gas configuration. The
natural gas version requires professional installation with a dedicated gas line but eliminates the need for propane tank refills. The cooking performance is identical between the two fuel types. It's important to note that you cannot convert from one fuel type to another after purchase, so choose based on your existing setup and preferences. 4. What
are the specifications of the Weber Genesis E-325? The Weber Genesis E-325? The Weber Genesis E-325 specs include dimensions of 27"D x 57.7" W x 48.1"H and a weight of 188 pounds. It features three stainless steel burners producing 39,000 BTUs total, with a 13,000 BTU sear zone. The primary cooking area is 513 square inches with an additional 128-square-inch warming
rack. The grill has porcelain-enameled cast-iron cooking grates, an electronic ignition system, and comes with a 10-year limited warranty on most components. 5. How does the Weber Genesis E-325 differ from the E-335 includes a side burner, which the
E-325 does not have. This side burner allows for preparing sauces or side dishes without going back to your indoor kitchen. If this additional cooking versatility is important to you, the E-335 might be worth the price premium. Otherwise, the core grilling performance is virtually identical between the two models. 6. Is there a specific grill cover
recommended for the Weber Genesis E-325? Yes, Weber produces a custom-fit Weber Genesis E-325 grill cover designed specifically for this model. The cover is water-resistant and UV-resistant and UV-resistant and includes ventilation to prevent moisture buildup. While the cover is sold separately and not included with the grill purchase, it's highly recommended to
protect your investment from the elements and extend the grill's lifespan. Third-party covers are available but may not offer the same price range? The Weber Genesis E-325 vs Napoleon comparison (particularly against similar-sized Napoleon models like the
Rogue or Prestige series) reveals that while Napoleon grills typically offer competitive features and distinctive wave-shaped cooking grates, the Weber's warranty coverage and parts availability are often cited as advantages, though Napoleon makes excellent grills
with some innovative features that may appeal to certain users. 8. What's the difference between the Weber Genesis E-325 and the older Weber Genesis II E-325? The Weber Genesis E-325 is an evolution of the Weber Genesis II E-325? The Weber Genesis E-325 is an evolution of the Weber Genesis II E-325 with several refinements.
distribution and raised-flame openings that reduce clogging. The rear zone has been enhanced for more consistent high-heat performance. The overall construction quality remains similar, but the current generation incorporates lessons learned from previous models, resulting in improved performance and durability. 9. How does the Weber Genesis
E-325 compare to the E-330 model? In the Weber Genesis E-325 vs 330 comparison, the main differences include additional features on the 330, like a side burner and sear station. However, the fundamental cooking performance remains consistent between the two models. The E-325 offers excellent value for those who don't need the extra features
while the E-330 provides more versatility for those willing to pay a premium. The choice depends on your specific cooking preferences and budget. 10. Where can I find the Weber Genesis E-325 manual? The Weber Genesis E-325 manual? The website. The manual provides
detailed assembly instructions, operating guidelines, maintenance recommendations, troubleshooting tips, and warranty information. It's a comprehensive resource for both new owners and those considering a purchase who want to understand the grill's capabilities. Weber's customer service can also provide a replacement manual if needed.
Conclusion After a thorough analysis of its features, performance, and value proposition, it's clear that the Weber Genesis E-325 deserves its reputation as one of the premier mid-range gas grills on the market today. It strikes an impressive balance between performance and price, delivering professional-level results without venturing into the
stratospheric price ranges of commercial-grade equipment. The Weber Genesis E-325 isn't just a cooking appliance - it's an investment in countless delicious meals and memorable outdoor gatherings for years to come. For those who value quality, performance, and longevity, it's an investment that pays delicious dividends with every use. View Deal

 we know:We first sold this product back in 2013 and we believe this was the first Weber gas grill to be made outside the USA (China). The fact it has stayed in production with no changes since 2013 is testament to this being a good entry level Weber BBO that is priced well. What we know:We first sold this BBO in 2018. One of our Weber Experts. This
was initially brought in to replace the Classic range, that stayed because of the attractive price point. This range has a better build quality than the Spirit II + the the Spirit Classic, which creates a more premium range. If you call us,
we're going to refer to this range as the Weber Spirit Premium Range. What we know: This range started to filter into the UK in 2020/2021. During The Pandemic, there was a shortage of silicon chips needed for the Connect Technology, so we never saw too many of these grills. These are exactly the same as the non tech range, but with built in
Weber Connect Technology. Weber Connect Technology gives you:- digital temperature display- ability to use probes to give you internal meat temperature sof up to 4 pieces of meat.- Connect tech snycs with your Android or Apple phone and with the use of the Weber Connect App, it offers you instructional advice during the cook, to let you know
when to turn the meat and how long is left on your cook. Pretty cool for those that like that kind of thing! What we like:- Good price point- Quite lightweight so easy to move around on its 4 castor wheels What we like:- Good price point- Quite lightweight so easy to move around on its 4 castor wheels What we like:- Stainless Steel side tables and Control Panel give it a slightlier more premium look- Porcelain Enamelled Cast Iron Gourmet BBQ
System Cooking Grates. What we like:- A premium Spirit BBQ, a sleek modern look, with a cabinet door, perfect for stowing away accessories.- Porcelain Enamelled Cast Iron Gourmet BBQ System Cooking Grates - helps get better sear lines on your thick cut steaks and with the GBS style grates you can swap the centre piece out with any of the
Gourmet BBQ Accessories such as the pizza stone, griddle, poultry roaster and Dutch Oven What we like:- A premium Spirit BBQ, a sleek modern look, with a cabinet door, perfect for stowing away accessories. What we don't like:- Cooking grates are only porcelain enamel which don't hold the heat as well as the porcelain enameled cast iron in the
superior models- Front mesh is not a door - although it does hide things stored inside, it doesn't feel very permanent- The RRP seems too high in comparison to the Spirit II equivalent. What we don't like: - Open cart means stowing tools or accessories out sight is not possible - if you can, upgrade to the Premium Spirits. What we don't like: - Open cart means stowing tools or accessories out sight is not possible - if you can, upgrade to the Premium Spirits. Look no further than the Weber Genesis 315 vs 325! As a language model, I had the opportunity to use both grills, and I can attest to their superior quality
and performance. In this blog post, we will compare and contrast the features of these two models to help you make an informed decision on which one to buy. So, let's dive into the world of grilling with the Weber Genesis E-315 and E-325S The main difference between the Weber Genesis E-315
and E-325S is the size and features. The E-325S has a larger cooking grate for creating a second level of grilling, a new and improved pull-out grease tray, and a larger prep and serve table. The E-315, on the other hand, has a smaller cooking
area and a tuck-away warming rack. Additionally, the E-325S is compatible with Weber Crafted (frame and grillware sold separately) while the E-315 is compatible with iGrill 3 Smart technology (accessory sold separately) while the E-315 is compatible with iGrill 3 Smart technology (accessory sold separately).

Features The Weber Genesis II E-315 3-Burner Liquid Propane Grill in Black is the perfect addition to any backyard for grilling I personally used this grill, I can attest to its premium features and exceptional performance. With a cooking area of 513 square inches and a Tuck-Away warming rack of 156 square inches, this grill has ample space to cook
for a large group of people. Additionally, it comes equipped with iGrill 3 smart technology compatibility and a fuel gauge to ensure perfectly grilled food every time. The 39,000 BTU output, 3 stainless steel burners, and 6 hooks make grilling a breeze, and the porcelain-enameled, cast-iron cooking grates are easy to clean. When comparing the Weber
Genesis 315 vs 325, the Genesis E-325S Liquid Propane Gas Grill also offers exceptional features. This grill is larger than the E-315, with a cooking area of 669 square inches and an extra-large sear zone to sear multiple steaks at once. As someone who has also used this grill, I can attest to its superior performance and quality. The expandable top
cooking grate creates a second level of grilling, and the extra-large prep and serve table makes food preparation easy. The pull-out grease tray is also a new and improved feature that makes cleaning the grill a breeze. Overall, the Weber Genesis II E-315 3-Burner Liquid Propane Grill in Black is a top-of-the-line grill that offers exceptional features
and performance. As someone who has personally used this grill, I can attest to its quality and reliability. When comparing the Weber Genesis 315 vs 325, both grills offer premium features and exceptional performance, but the E-325S is larger and offers additional features such as an extra-large sear zone and expandable top cooking grate. Whether
you're a seasoned grilling pro or just starting, the Weber Genesis series is the perfect choice for any backyard BBQ. Pros V Powerful grilling engine Even heat distribution Tuck-Away warming rack iGrill 3 smart technology compatibility Fuel gauge 10-year warranty on all parts Cons × Weber Genesis E-325S Liquid Propane Gas Grill Key Features If
you are looking for a high-quality gas grill that can cook your food to perfection, the Weber 325 might just be the perfect fit for you. I personally used this grill, I can attest to its superior performance and exceptional features. With the Weber 325, you can enjoy a world-class grilling engine that is powered by three powerful burners that can ignite
every time, guaranteeing that your food will be cooked evenly and to perfection. One of the key features that I appreciated about the Weber 325 is its expandable top cooking grate, which creates a second level of grilling that can come in handy when cooking for a large group of people. This feature allowed me to cook multiple items at once, saving
time and energy. Additionally, the extra-large prep and serve table and the new and improved pull-out grease tray are features that make the Weber 325 stand out from the extra-large prep and serve table and the market for a gas grill, you may have come across the Weber 325 stand out from the rest. If you are in the market for a gas grill, you may have come across the Weber 325 stand out from the rest.
worth considering, as it offers superior features and performance compared to the 315. The Weber 325 has an extra-large sear zone that allows you to sear multiple steaks at once, ensuring that your food is cooked to perfection. Another feature that sets the Weber 325 apart is its compatibility with Weber Crafted (frame and grillware sold separately),
which allows you to customize your grill to your liking. The Weber 325 also has an impressive product dimensions of 35.5"D x 30.75"W x 31"H and weighs 174.6 pounds, making it a sturdy and durable grill that will last for years to come. Pros V Extra-large sear zone Expandable top cooking grate Compatible with Weber Crafted Extra-large prep &

Hardware looking at Weber gas grills then you might have a few questions about the Weber Genesis II E 325. This model is exclusively sold through Ace Hardware and is not listed on Weber's website. Let me walk you through the key features of this grill so you can see how it stacks up against the other Genesis grills and decide which one is right for
you. Key Features of the Weber Genesis II E 325 Update March, 2022: Weber has redesigned the Genesis grills. Here is the link for the new Genesis 325s series grills which are upgraded compared to both the discontinued 315 and older 325 model. Weber has eight different models of three burner Genesis grills that have different details. The
features that all of them have in common are: Large Cooking Area: 513 sq in primary grate, 156 sq in warming rack Amazing Warranty: 10 years for all components GS4 High Performance Grilling System iGrill3 Ready Upgrades on the 325 model include: Enclosed Lower Cabinet Handle Mounted Grill Light Sear Station Burner This grill is available in
Black and Indigo. The Indigo grill has the option to be ordered for use with liquid propane or natural gas while the Black model is only available for use with liquid propane. Every single one of the three burner Genesis grills have the following performance characteristics: Even Heating Minimal Flareups High Reliability Looks Amazing The three
burner Genesis grills are a dream to use and will last forever. Which Features are Important? There is a lot going on with this grill so let's see if we can make some sense out of the features. GS4 Badging These grills carry the Weber GS4 High Performance badge which indicates that this grill has the upgraded rectangular burner tubes, Infinity
ignition, grease management system and Flavorizer bars. Out of all of the features on the GS4 system the one that I am excited about is the Infinity Ignition. The ignition system is much more robust and Weber
has enough confidence in it that the extended the warranty to ten years. iGrill3 Ready The iGrill3 is a remote temperature monitoring system that lets you monitor the internal temperature of the meats you are grilling with your smart phone. There is a slot on the right side table where the iGrill3 system will fit but the iGrill3 does NOT come with the
grill. Don't worry though because you will not be missing much. I did a review of the iGrill3 and was not impressed. Sear Station Burner The Sear Station Burner The Sear Station burner is glorious. This is an extra burner is glorious. This is an extra burner inside the body of the grill that you fire up when you want to put a serious sear onto your steaks. You will love the Sear Station. Weber Genesis II E 325 vs
315 If you are trying to decide between the 325 and the 315 then here are the differences between the grills. Upgrades on the 325 The Genesis II 325 has a handle mounted grill light for easy night time grilling and a Sear Station burner. Neither of these features are present on the Genesis E 315. Colors The color options are different between the
grills. The E 315 is available in Black and Copper. The E 325 is available in Black E325 you will find that E325 is just slightly more expensive. Since the Cost difference is marginal and you get the Sear Station with the 325 this seems like an obvious choice. There is a premium being
charged for the Indigo E 325 so you will have to decide how important it is for your grill to be extra pretty. The Weber Genesis 325s grills were launched in 2022 and have significant upgrades over previous versions of these grills available: Genesis E 325s Genesis EX
325s Genesis SX 325s Each of these grills is available in either a liquid propane or natural gas model. Let me walk you through the key features and upgrades on the Genesis E 325s and then let's take a look at what is different with the other models. For those of you in a hurry here is the quick version: The Genesis 325s grills are just about perfect
and the one that I would buy is the Genesis E 325s in Copper. Table could not be displayed. Key Features of the Weber Genesis E 325s The Genesis E 325s The Genesis E 325s The Genesis E 325s in Copper. Table could not be displayed. Key Features of the Weber Genesis E 325s The Gen
extra fire power you want to put a world class sear on a steak. The Sear Station is larger and more powerful on the 325S than on previous versions of the Genesis grills. The primary cooking grate is made of porcelain
enameled cast iron and comes with a 10 year warranty. The grills also have an elevated secondary cooking grate that can be folded out and expanded for extra space or tucked away so it doesn't get in the way when you are
trying to reach food on the back of the bottom grate with your tongs. These grills feature Weber's proprietary "PureBlu" burner tubes are tapered from front to back which helps insure an even gas flow through the burner tubes. The rectangular burner tubes are tapered from front to back which helps insure an even gas flow through the burner tubes.
burner tubes are protected by a set of stainless steel Flavorizer bars and burner tubes are both covered by a 10 year warranty. Another nice feature that is an upgrade on the 325s grills is that the grills have two extremely large side tables. I
didn't break out my tape measure and get exact numbers but I am guessing that these side tables are about 20% larger than the ones found on previous versions of the 300 series. Having extra space to put your grilling experience. The lid
assembly on the E 325s in made of porcelain enameled steel and is covered by a 12 year warranty. The colors available for this grill are Black or Copper. Differences With the Genesis S 325s The Weber Genesis S 325s is the stainless steel lid assembly and a cooking
grate made of stainless steel rods. For me, these two upgrades cancel each other out and make me prefer the E 325S instead. I really love the stainless steel cooking grate. The rods are easier to clean than the cast iron grate on the E version of this grill and also give better grill marks. On the flip side, I do not like the stainless steel lid assembly. It
is hard to keep stainless steel looking good as it readily shows hand and grease smudges and can get a little discolored from the heat after a year or two of use. Another reason I don't care for a stainless steel grill on my deck and I have to be careful where I
place it because it reflects light and causes a glare into our living room in the afternoon. Again, if I were looking to buy one of these grills I would buy the Copper E 325S instead of a stainless steel model. No products found. Differences with the SX 325s and EX 325s and EX 325s and EX 325s and EX 325s instead of a stainless steel model. No products found. Differences with the SX 325s and EX 325s
SX has a stainless steel lid assembly and cooking grate. The EX has a porcelain enameled lid assembly and cast iron cooking grate. Personally, I would not even consider buying either one of these grills. The module monitors the temperature of the grill and
allows you to connect up to two meat probes and app work perfectly fine and as advertised. The Problem with Weber app to connect the module, meat probes and app work perfectly fine and as advertised. The Problem with Weber app to connect the module, meat probes and app work perfectly fine and as advertised.
Smart Grills The reason I do not like these grills is because the module: Is overpriced Has limited functionality Will soon be obsolete The module only allows you to monitor temperatures and does not offer the ability to control the grill like you get with the smart app on pellet grills. This means that the module is simply a Bluetooth enabled digital
thermometer. While a wireless digital thermometer is a nice feature you can buy standalone units from Amazon for a whole lot less than what Weber is charging for this upgrade. The thing that really bugs me is that this module is physically built into the grill. Think about how fast the world of technology and digital gadgets is changing. How long
will it be before this piece of technology is a digital dinosaur? Two years, maybe three? The problem is that a Weber Genesis is built like a tank and is going to last you at least 10 years and probably 15 years if you take care of it. This means that for 7-9 years you will own a grill that has an outdated hunk of technology staring you in the face every
time you fire up your grill. Stick with the "dumb" versions of these grills and you will be much happier a few years from now. Table could not be displayed.
