Wind River is a 2017 Western noir murder mystery that follows an FBI agent and a local tracker as they team up to unravel a grisly killing. Set amidst a stark, snowy backdrop, the film is as forceful as the elements it portrays and shows a not off seen side of the country. The spectacular surroundings also add a lot to the mysterious nature of their
film, with natural beauty juxtaposed with the ugly central crime. Are you curious about where 'Wind River' was filmed? We've got you covered. Wind River Filming Locations The film is set in Wyoming, and filming took place in the state as well as in neighboring Utah. So important is the film's backdrop that the landscape was described by the film's
writer and director, Taylor Sheridan, as an antagonist character in itself. Filming took place from March 12, 2016, until April 25, 2016, and the crew apparently had trouble filming some of the snow scenes near the end of the schedule with the advent of spring, forcing them to go to higher and higher altitudes. Here are the specific locations that were
used to bring the movie to life. Summit County, Utah The film was extensively filmed in Summit County, Utah, where many of the mountainous scenes were shot on location. The production used Park City, as their base, though principal photography was largely done
outdoors in natural surroundings to give the film its characteristic wild and mountainous backdrop. The Summit County Sheriff's Office. The Wasatch Back Region, which covers multiple counties of Utah, including Summit County and is on
the eastern side of the Wasatch Range of the Rocky Mountains, was used extensively for shooting the film's many mountain scenes. Other Locations in Utah Wasatch Rounty, which shares part of the Wasatch Back region, was also extensively used for filming outdoor mountainous scenes. The movie's climactic scene, set on Gannett Peak, actually used
Hidden Peak as a stand-in for filming. At 10,971 feet above sea level, Hidden Peak is one of the higher peaks of the region and is located in the community of Snowbird in Salt Lake County, Utah. Fremont County, Wyoming The essential Wyoming Dackdrop for the film was lensed in Fremont County. The Lander city limits sign seen near the beginning
of the film was filmed on location in the city of Lander. The film's namesake, a Native American Reservation that stretches over 3000 square miles across multiple counties, including Fremont and Hot Springs, was also used for filming, though locations in Utah were largely used as a stand-in for the reservation. The scene depicting the sign for the
reservation was filmed at the reservation itself, in Wyoming. Some establishing shots were also seemingly filmed at the Wind River Indian Reservation. Find out more about our reviews policy. Wind River is the name of a Native American reservation in the Wyoming wilds. It's also a description of the unforgiving terrain, a central
character in Taylor Sheridan's superb mystery. In these sub-zero temperatures, flesh blackens with frostbite in minutes, and hunter Cory Lambert (Jeremy Renner) dresses like a stormtrooper on Hoth. "It could be sunny for an hour," he says of the weather. "Then you're in hell again." Indeed, we are. While out on the reservation tracking a mountain
lion, Lambert finds the body of local girl Natalie (Kelsey Asbille), raped and battered. Crucially, it was the cold that killed her, after she ran, barefoot, for miles from her assailant. "How do you gauge someone's will to live, especially in these conditions?" asks Lambert. He's been here before - his daughter was found in similar circumstances - but this
time he's drawn into the centre of the investigation. Local police chief Ben (Graham Greene) doesn't have the manpower to cover such a huge, inhospitable area. "I'm used to no help," he huffs. You may like The FBI agent assigned to the case, meanwhile, is the tough but painfully underprepared Jane Banner (Elizabeth Olsen), channelling a touch of
Clarice Starling. "The body's five miles on a snowmobile," Lambert tells her. "You'll be dead before you get there." Sheridan wrote Hell or High Water and Sicario, two of the best US thrillers of recent years, and has a powerful sense of how loss and the landscape carve themselves into his characters. In Wind River, everyone is adrift. "Locals" such as
Lambert are viewed with suspicion by the Native Americans; Banner is treated with outright contempt by all but our hero; and the younger generation fill the voids of poverty and hopelessness with drink and drugs. As a limited man wrapped in a grief that won't pass, Renner is on his best form since The Hurt Locker. "I'd like to tell you it gets easier,"
he tells the girl's grieving father (Gil Birmingham). "It doesn't." Olsen and Greene are excellent, as usual; there's a bold, almost mystical score from Nick Cave and Warren Ellis; and Sheridan's script is alternatively tough and tender. The film may take its time to get going, but each character has an arc, however brutal, and the action scenes, when
they come, are spiked with sudden, shocking bloodshed. One raid has Banner, half-blinded by Mace, taking on a trailer full of addicts - as depressing as it is thrilling. A Mexican stand-off is not just a flashpoint, but a metaphor for abject lawlessness: it's kill or be killed, sometimes both. In comparison with the merciless violence of the climax, the
closing scenes are a touch meandering. But perhaps this is a necessary catharsis, given the intensity of what's gone before. Despite the parade of predators - mountain lions, wolves, black spiders scuttling across the ice - it's man that's the real animal here; raping, killing, taking revenge with grim impunity. Even the good guys beat confessions from
their suspects. Out here, Sheridan seems to be saying, no one has jurisdiction, not even God, and he fled the scene years ago. Who can blame him? Elizabeth Olsen and Jeremy Renner star in Wind River. Courtesy of Lionsgate Entertainment An exciting feature-film debut by writer-director Taylor Sheridan, whose hugely original screenplay for Hell or High Water was nominated for an Oscar last year, Wind River more than lives up to the promise of a gifted filmmaker who is fast becoming a rising
star to closely watch. It's one terrific, offbeat and heart-pounding thriller set in the frozen wilderness of a Wyoming Indian reservation that never ceases to surprise, enthrall and pump the adrenaline with an energy that stuns. WIND RIVER ** 1/2 (3.5/4 stars) Directed by: Taylor Sheridan Written by: Taylor 
Elizabeth Olsen and Gil Birmingham Running time: 107 mins. Sheridan wastes no time starting off with a bang as Fish and Wildlife agent Cory Lambert (Jeremy Renner, more rugged than usual and a far cry from the youthful sensitivity he showed when he first appeared on the scene as Jeffrey Dahmer) tracks and blasts a pack of wolves preying on
local livestock in a scene that will mortify animal lovers who think wolves are as friendly as German shepherds. Minutes later, he finds the body of a native American teenager half-frozen in the bloody snow. It's clearly more than the work of wolves with a hardy appetite. Suspecting a homicide beyond his jurisdiction, Cory calls for outside assistance
and the FBI sends pretty but tough rookie agent Jane Banner (Elizabeth Olsen) to investigate. The elaborate puzzle that unfolds in a realistic pattern of intricately plotted mystery is tracked on snowmobiles and punctuated by so much violence and danger that before the crime is solved nobody is safe, least of all the stars. Sheridan has a rare talent for
writing deceptively understated but fully developed characters rooted in reality. And he has a marvelous way of moving actors into and out of every scene with minimal blocking and maximum motivation that takes its time to play out. His work method is to yell "Action!" and then let the actors lead him in the direction of where they feel the action
should occur. You get the feeling you are discovering each hidden corner of a dark room before they can reach for a flashlight. In Wind River, every player, large or small, displays maximum sensitivity to the needs of each scene. Renner and Olsen have never been better, and veteran native American actor Gil Birmingham is especially moving as the
doesn't always make it easy on the viewer. Pieces of the puzzle are difficult to connect, and there's a rampaging flashback of the brutal gang rape of the dead girl by a crew of oil riggers that is too graphic for even seasoned viewers to swallow without a belt of brandy. But location shooting in Utah enhances the ravaged majestic beauty of the frontier,
and no director has captured the loneliness of man versus nature in the American wilderness with this much anxiety and fear since William Wellman's Across the Wide Missouri. With this remarkable and unconventional film, Sheridan paints a touching picture of both the disgraceful, dismissive way America has treated native Americans in the halls of
justice, and the silent American wasteland where the reigning evil is man, luck is all there is in the hope for survival, and sometimes even luck doesn't stand a chance. Wind River is a 2017 Western noir murder mystery that follows an FBI agent and a local tracker as they team up to unravel a grisly killing. Set amidst a stark, snowy backdrop, the film
is as forceful as the elements it portrays and shows a not off seen side of the country. The spectacular surroundings also add a lot to the mysterious about where 'Wind River' was filmed? We've got you covered. Wind River Filming Locations The film is set

Suggest an edit or add missing contentYou have no recently viewed pages Taylor Sheridan isn't afraid to embrace genre. His Wind River plays
more like an unusually well-made episode of CSI: Wyoming than the highly anticipated directorial effort from the screenwriter of Hell or High Water (which may well have been last year's best-written film). Set in the desolate, snow-covered Wind River reservation, it follows the efforts of expert marksman and haunted tough guy Cory Lambert (Jeremy
Renner) and tenderfoot FBI agent Jane Banner (Elizabeth Olsen) as they investigate the death of a local teenage girl found frozen in the middle of nowhere. It's a solid mystery setup: The girl, who may have been raped, appears to have been raped, appears to have been raped, appears to have been raped from something, and our heroes need to find out not just who's responsible for her murder but
what terrified her so. Sheridan's feel for psychology and setting are in fine evidence here. Wind River's landscapes are forbidding and beautiful. Cory, whose ex-wife also lives on the reservation, once lost a teen daughter in similar circumstances, and he can empathize with the girl's anguished, nearly suicidal parents. Because the film pays such
attention to grief and atmosphere, I can forgive it some of its more frustratingly conventional plotting choices. Not to mention some of the casting: Renner feels out of place as the white-clad (and just plain white) Man's Man Who Is One With Nature. For her part, Olsen does her best as Young Beautiful FBI Agent Out of Her League. And while it's
always nice to see the great Graham Greene, here playing the reservation's sheriff, it would have been even nicer had the creators of this movie ostensibly about Native Americans allowed him room for a bigger role. In Hell or High Water, Sheridan reimagined (and, along the way, reinvented) genre archetypes (the aging lawman, the outlaw on the
run, the faithful partner, etc.) with such vigor that the movie became largely about them and their interactions, giving the whole thing a mythical kick. Here, the archetypes are largely functional in delivering a familiar thriller narrative — satisfying, though ultimately forgettable. Where is Wind River filmed? The director chose to shoot the movie in a real setting to show the real blizzardy conditions that the people of Wyoming, Utah actually live in. In the trailer of the movie, you can see the shots of never-ending land filled with snow and also how the people manage to live a normal life in extreme winter settings. Here is a scenic shot from the film: The
crew had to carry the filming equipment on snowmobiles and snowcats to the shoot location from the production base that was set up in Park City studios. Since Park City, Utah is a terrain, regular cars couldn't climb up and were unsuitable for travel. The crew had to constantly cover up the tyre tracks during filming in order to maintain the
authenticity of the movie. Once they completed filming, the crew had to engage in some composting to keep the area in 'virginal' conditions were so bad during the filming of Wind River that the lead actor Elizabeth Olsen suffered from snow blindness during the shoot. The discovery of the

anteprima il 21 gennaio 2017 al Sundance Film Festival. Una pellicola basata su differenti storie vere, ponendo attenzione sul dramma delle riserve per nativi americani. Giunto in sala il 4 agosto dello stesso anno negli USA e quasi un anno dopo in Italia. La pellicola è stata girata quasi totalmente nella Wind River Indian Reservation. Ciò vuol dire che
l'ambientazione è totalmente realistica, considerando come la sceneggiatura faccia riferimento proprio a questo luogo. Si tratta della settima riserva più grande degli Stati Uniti, unica del Wyoming a ospitare nativi americani (Shoshone e Nord Arapaho). Si trova nel Wind River Basin, circondata tutt'intorno da alti monti. Nello specifico si tratta della
montagne Absaroka, Owl Creek e della catena montuosa Wind River. Giungere in questi luoghi vuol dire fare un salto indietro nel tempo. È facile sentirsi catapultati nel vecchio west, considerando i panorami tutt'intorno, la densità abitativa decisamente inferiore rispetto a quanto siamo normalmente abituati, i costumi e i piatti tipici. Basti pensare
alle ricette a base di carne di bisonte. Questa potrebbe essere affiancata da un po' di Soda Bread, la cui ricetta è propria degli indiani d'America. Le precedenti generazioni mescolarono farina e una sorta di soda recuperata nella cenere del legno. Oggi è possibile gustarlo in differenti varianti, al burro o alle noci. La riserva non è l'unica location del
film. Taylor Sheridan, Jeremy Renner, Elizabeth Olsen e il resto del cast sono stati inoltre impegnati presso Park City, nello Utah. Il regista ha voluto a tutti i costi restituire un elevato tasso di realismo, mostrando esattamente le difficili condizioni nelle quali gli abitanti del Wyoming e dello Utah si ritrovano a vivere. Tutto ciò ha un impatto enorme
sulla loro quotidianità. Sono state coinvolte differenti aree, come Hidden Peak, sfruttando mezzi da neve per trasportare tutte le attrezzature necessarie per il film. In nessun caso le normali auto sarebbero servite a qualcosa, considerando il tipo di terreno. Durante tutti i giorni delle riprese vi erano degli addetti alla copertura delle tracce delle ruote
nella neve, così da nascondere il passaggio dei mezzi della crew. Le condizioni climatiche furono così estreme durante le riprese che Elizabeth Olsen soffrì di snow blindness, ovvero di una temporanea perdita della vista. Una delle scene più difficili da girare è stata quella del ritrovamento del cadavere. In quella fase ci si avvicinava alla primavera, il
che ha costretto la produzione a spostarsi molto in alto nelle Rocky Mountains, così da poter trovare ancora delle fitte coltri di neve. Mountain Huts, Rustic, Camper, Colonial, Neglected Following the scorching intensity of "Hell or High Water," Taylor Sheridan presents us with the chilling and suspenseful thriller "Wind River." Released in 2017, this neo-western crime thriller features an outstanding cast, including Jeremy Renner, Elizabeth Olsen, Gil Birmingham, Jon Bernthal, and
Julia Jones. On the Wind River Indian Reservation in Wyoming, the movie unfolds the narrative of a wildlife officer, Cory Lambert (Jeremy Renner), who stumbles upon the corpse of a young woman within the reservation. The investigation of this case is assigned to FBI agent Jane Banner (Elizabeth Olsen), who recruits Lambert for his tracking skills.
Together, they must navigate the desolate winter landscape and confront the local crime syndicate to solve the mystery. The film has received critical acclaim for exploring social issues, such as violence against Indigenous women and law enforcement agencies lack of proper response. On Metacritic, it has a weighted average score of 73 out of 100,
based on 44 critics' reviews indicating "generally favorable reviews." In his review for Variety, Owen Gleiberman characterized Wind River as a crime drama with a humanistic touch, noting its skillful execution over sheer excitement.
