Are you a working professional who wants to build his career in project management? Or are you an experienced project manager who wishes to attest his knowledge and experience? If yes, then you must be planning for PMP certification. Due to the fact, that this is the major step to get recognition in the market and attests to your knowledge in
project management. Now before gearing up for the PMP exam, generally PMP certification aspirants wonder about two questions i.e. PMP passing score, PMP exam pass rate, and interpretation of PMP exam results. This will help you
 to understand about PMP certification exam, PMP passing score, and PMP exam pass rate in detail. Before diving into the details of the PMP passing score and PMP exam pass rate, let us first talk about PMP certification. PMP benefits a globally recognized, most popular, and valuable credential for project managers in the industry.
This certification shows that you have the experience, training, and competency to lead and direct the project. This recognition is seen through expanded marketability to employers and a higher salary. PMP certification is worldwide recognized regardless of industry, profession, or geographical scope of operation. Besides, as per the Project
Management Institute survey, this PMP certification positively impacts project manager salaries by an average of 25% more than their noncertified professionals. PMP certification holds the global standards of excellence for validating the skills and the knowledge essential in a project management team. It further ensures that PMP certified
individuals speak and understand the global language of project management. Moreover, PMP certification helps you to expand your network by connecting your network by the property your

per prerequisites of PMP certification mentioned below. You need to attend project management training from a recognized training institute and earn 35 PDUs or contact hours. Once you fulfil both PMP certification requirements, then you need to attend project management training from a recognized training institute and earn 35 PDUs or contact hours. Once you fulfil both PMP certification requirements, then you need to attend project management training institute and earn 35 PDUs or contact hours.
projects 35 Contact Hours 1 You need to attend 4 year Degree Course You need to have 3 years leading the project with 4500 Hours 35 Hours of project with 4500 Hours 35 Hours of project with 4500 Hours 35 Hours of project with 4500 Hours 36 Hours 1 Hours 
pertaining to project management must have been gained within the last 8 consecutive years prior to your submission of application. Now, let us first talk about the PMP exam. This exam is conducted by the Project Management Institute (PMI). PMP
Exam contains 180 questions. There are 230 minutes to complete the exam. The PMP exam is to monitor the performance of these questions. There are 230 minutes to complete the exam is to monitor the performance of these questions.
and validate them for inclusion in the future exam database. These questions are randomly placed. You have to attempt all the questions with the same sincerity. PMP exam is a closed book exam. Hence, you cannot
refer to any material during the exam. You will be given 4 hours to finish the PMP exam. Remember that there are no scheduled breaks during the examination. If you need then you are allowed to take the break but your exam clock continues to count down. Before the PMP exam has started, you will get 15 minutes to go through the tutorial followed
by a survey. It is not mandatory and this time is not included in the exam time of 4 hours. Main points to remember for PMP Exam are: This exam is just not a test of the information of the main reference book i.e. PMBOK GuideYou cannot pass the exam by only focusing on real-world experience. PMP training in project management which is aligned to
the PMBOK Guide plays a vital role in passing the PMP Exam. Furthermore, this exam has been designed to objectively assess and measure project management knowledge. Besides, certified PMP exam Content Outline to ensure that an
appropriate number of questions are placed in the PMP Exam. The basis of the PMP Exam is the blueprint contained in each project management process group. Questions in the PMP exam are generally based on PMBOK Guide and Code of Ethics and Professional
Responsibility. Hence, PMP aspirant needs to demonstrate his proficiency in 5 domains. The below table represents the percentage of QuestionsInitiating13%Planning24%Executing31%Monitoring and Controlling25%Closing7%PMP Passing
 ScoreThere is a common belief that 61% is the PMP passing score however it is not an official score announced by PMI. In actuality, there is no fixed PMP passing score will vary. Moreover, it depends upon the difficulty level of the question you will
get in the PMP exam. Besides, each question does not have equal weightage. If you are lucky enough to get easy questions in the PMP aspirant who will get relatively more difficult questions. As a result, it becomes even more inconclusive to determine how much
PMP aspirants need to score in order to pass the exam. The best rule is to not worry about the PMP passing score. We recommend PMP aspirants to study well and practice exams consistently to build your confidence and make yourself
pass the PMP exam confidently.PMP Exam Pass RateWhat was the past rate before?In earlier times till 2005, PMI has set the PMP passing score as 68.5%. This means PMP aspirants need to correctly answer 137 questions out of 200 questions. After some time, PMI drastically increased the PMP passing score to 80.6% (This means you need to score
141 out of 175 questions correctly). Further then PMI observed that there was a reduction in the number of candidates at this score considerably. Then in 2 months time period, they revised the PMP passing score. It means that PMP aspirants need to answer 106 or more out of 175
questions correctly. Further in the year 2007, PMI changed the criteria for passing the PMP exam. It started declaring results through proficiency level for each domain in test results rather than percentages in each domain. PMI adopted a more scientific approach by using the sound psychometric analysis to determine the PMP passing score. PMI
 makes use of subject matter experts across the globe that cross-references the data of how candidates have actually performed to make sure that level of difficulty on each PMP exam is justified. What is the PMP exam performed to make sure that level of difficulty on each PMP exam is justified. What is the PMP exam is justified. What is the PMP exam performed to make sure that level of difficulty on each PMP exam is justified. What is the PMP exam performed to make sure that level of difficulty on each PMP exam is justified. What is the PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam performed to make sure that level of difficulty on each PMP exam 
the PMP candidate is 'Proficient' or 'Moderately Proficient' or 'Below Proficient' in each of the 5 domains. Now, you will not get to know the numerical percentage you have scored in each of the five Process Groups, compared to average global rankings of other exam takers and
certified project management professionals. It further ensures that the exam is fairly done to provide project management statistics and overall industry knowledge assessments on a global level. The PMP exam pass rate is the total number of people who passed the exam divided by the total number of students sat for the exam. PMP Exam Pass Rate =
(Number of People Passed the PMP Exam)/ (Number of People Sat for the PMP Exam
has not given any clear indication that what will be the combination of proficiency levels which lead to overall PMP exam pass rate. Incase PMP candidates
achieve 'Proficient' in 4 domains and 'Moderately Proficient' in 1 domains, then you have reached the PMP exam pass rate. If PMP candidate achieves 'Proficient' in 3 domains and 'Below Proficient' in 2 domains, then there is a
high probability that you will pass the PMP examIncase PMP candidate achieves 'Moderately Proficient' in 1 domain then most probably you will pass the PMP examIf PMP candidate achieves 'Below Proficient' in 3 domains regardless of what you have achieved in the other 3 domain then most likely you won't be
able to reach the PMP exam pass rateIncase PMP candidate achieves 'Moderately Proficient' in 2 domains, then it is very likely that you will not reach the PMP exam pass rate. Below find the sample of PMP
Exam Report, we get once we pass the PMP passing score or PMP examination Source: Master of Project AcademyYou can see Donald Wheeler's full PMP passing score was 61%. Now PMI doesn't declare the percentage you score in each of 5
domains. In fact, PMP exam results are based on proficient', 'Moderately Proficient', or 'Below Proficient', or 'B

historical passing score & percentage, current passing score is?No one knows what the PMP passing score is.Yes! That's true.
 PMP passing percentage or score is. Or they might not! There may not be a definite score for passing or failing in the PMP test. For a very long time, PMI has kept the passing criterion of credential exams under wraps. They have given out little information. There are several opinions, many inferences, plentiful rumors and some lies regarding the PMP
test passing criteria. But no one, except for PMI, knows what the PMP passing criterion is. In the Internet chatter, you might find people claiming 61% (or 62%) to be the passing score. But this is just a popular opinion - it has little relevance. Popular opinion is the greatest lie in the world. Thomas CarlyleFacts About PMP Passing ScoreBrief HistoryFact
II passed my Exam in the year 2005. In those days, there was a definite passing percentage - it was 68.5%. The PMP aspirants were required to mark 137 questions and 25 pilot questions) to get the coveted PMP certification. Shortly after I completed my certification, PMI changed the passing
percentage to 60.6% (106 correct questions). Fact IIIn the year 2006, PMI stopped publishing the passing score was 60.6%. Fact IIIn the year 2007, PMI changed the test passing criterion. Since then, the passing criterion is little obscure. The exam score report does not contain
percentage of correct or incorrect questions. It contains something equivalent to grades were called proficient, and below proficient on each of the five tested domains. Refer to the next section for more details about the grading
system. Facts I - III are historical facts. They have very little relevance today. Let's us understand the current scenario. Current Scenario four performance
rating categories viz. above target, needs improvement. Fact VThere is little clarity on how grading was done historically or how it is done today. But we know for sure that you can pass the exam even if you score 'Below Target' in one of the domains. I have seen many people who got below target in one of the domains but still
 different domains viz. Initiating, Planning, Executing, Monitoring & Controlling, and Closing. You can refer to my article on PMP Exam Changes in January 2016 for details about these 5 domains. Since 2007, PMI has been grading the candidates on each of these 5 domains. Upon completion of the computer-based examination, each candidate receives
a printed copy of the test results. In addition to the overall pass/fail status, the exam report contains candidate's performance grade for each domain. The grades are provided to both passing and failing candidates are provided to both passing and failing candidates. These were assigned based on the number of questions answered correctly within the domain. It provides a direction about candidates'
strengths and weaknesses. The exam results report contains: A pass/fail result that is generated based on the overall performance of the candidate. A performance of the five tested domains. You can download a sample exam report used to grade for each of the five tested domains. You can download a sample exam report used to grade for each of the five tested domains.  WAWisconsinMadison, WIMadison, WIMilwaukee, WI A very long time ago PMP exam passing score was 61% but no one knows if there is a concrete score at least 75% in the practice tests in order to feel confident about succeeding
in the actual exam. Most probably PMI is using a percentile mechanism for awarding the certificate. However, it is also possible that there is some minimum percentage marks, which PMI has chosen not to disclose to anyone. We just know that PMI follows a grading system but no one knows how this grading is done. In the current system, exam
 takers are given a grade on a four point scale for three different domains of the PMP exam. Let us understand what this grading system is in this article. You will also find some historical facts related to passing score in this article. You will also find some historical facts related to passing score for the PMP exam is not disclosed by the PMI (Project
Management Institute). After the last exam update that happened in January 2021, PMI tweaked the grading system to reflect the exam changes. Here is a quote from PMP Handbook: "The passing score for all PMI exams is determined by sound psychometric analysis."
many different disciplines - to help determine how many questions you must answer correctly to pass the exam." The quoted sentence above means that no two candidates will have the same grade. Since two candidates have different set of
 questions, some candidates may get easier questions than others. So, it is not fair to set same passing score for everyone. Hence, the psychometric analysis helps the PMI to evaluate the final score for each candidate and ensures that their is a fair mechanism for passing the exam. There are 180 questions in the PMP exam, which come from three
 different domains. These domains are described in detail in Exam Content Outline. The percentage of questions coming from each domain is mentioned in the table below. Domain Name Percentage of Items on Test I. People 42% II. Business Environment 8% Total 100% You can read our article on the syllabus of the new PMP exam to
 understand the utility of PMP Exam Content Outline. The result of PMP exam is given on a score report. The score report grades the candidates for each of the three domains. It gives a grading on a 4 point scale called performance rating categories. These are: Above Target: Your performance exceeds the minimum requirements for this exam. Target:
Your performance meets the minimum requirements for this exam. Additional preparation is recommended before re-examination. Needs Improvement: Your performance is far below target and fails to meet the minimum requirements
for this exam. Additional preparation is strongly recommended before re-examination. Calculate "your" Return on Investment*We respect your privacy and we will not send any spam emails. PMP Passing Score Till 2020 The scoring mechanism in 2020 was similar to what we have now. Only thing is that, instead of three domains, the candidates were domains, the candidates were now.
 tested on five domains. The percentage of questions that used come from these five domains is mentioned in the table below. Domain Name Percentage i. Initiation 13% ii. Planning 24% iii. Executing 30% iv. Monitoring and Controlling 25% v. Closing 8% Total 100% The domains and questions coming from these domains were mainly are based on
the PMBOK Guide 6th edition and PMI Code of Ethics. PMP Certification Test Grading System Till 2018 Till 2018, the grading system was based on proficiency — Proficient, Moderately Proficient, PMI used to define these levels of proficiency levels. Each domain (as explained in previous section) was assigned one of three levels of proficient, PMI used to define these levels of proficiency.
as: Proficient - indicates performance is above the average level of knowledge in this chapter. Below Proficient - indicates performance is above the average level of knowledge in this chapter. Proficiency Levels and Performance Rating Categories
are the rating scales for evaluating the result of the PMP exam. Till 2018, the focus was more on Proficiency, which involved three levels of rating categories are similar in nature; it just that proficiency rating categories have a 4
point scale while the proficiency levels have 3 point scale for the evaluation. PMP Passing Score used to be 68.5% i.e. a candidate has to get 120 right answers out of a total 175 (175 regular questions and 25 pilot
questions) to pass the exam. After that, PMI increased the passing criteria from 68.5% to 80.57%. This meant that candidates had to correctly answer 141 questions out of 175 to pass the exam. Due to this major change in assessment, it is possible that passing rate of the exam would have dropped drastically. A little later in 2007, PMI again changed
 the qualification score to 60.5%, which meant that a candidate had to score 106 questions correctly to pass the exam. In the latter half of 2007, PMI again changed the passing criteria by removing a definite passing percentage for the exam. In the latter half of 2007, PMI again changed the passing criteria by removing a definite passing percentage for the exam. They migrated to proficiency levels system that is explained in the previous section. Frequently Asked
Questions 1. Does a score of 61% means that I will pass the exam? No. PMI does not disclose any passing percentage. 61% is a historical score, which has long been removed. PMI has completely changed the pattern of evaluation. 2. Is there a fixed score for passing the PMP exam? Many individuals believe that there is a fixed score for everyone. No
one knows if there is one. There could be a fixed score or percentile. It could also be based on some complex statistics. 3. Can I pass the exam if I score below target in one domain? Yes, you can pass the PMP exam is judged by their overall
 performance in the exam. Some people have passed with below target scores. 4. Do all questions in the PMP exam carry equal weight? Yes. Although PMP exam tests your proficiency on different type of questions, all questions in the PMP ECO. How to Succeed in the PMP Credential Test?
 PMP exam is one of the most prestigious certification exam. You must not delay your PMP certification because of the uncertainties. With each passing day you are potentially losing a 16% increase in your salary. PMP
certification extremely valuable in the professional world. There is a high demand for this credential in the industry. On the flip side, PMP is a hard exam but you can easily crack the exam by enrolling into a good training program. Our PMP training program contains a lot of study material that will help you to pass the exam in your first attempt. You
can buy our training program at a very reasonable cost. Our PMP program is priced as low as USD 149 in USA. Our training is unmatched in the industry. It will enable you to pass the PMP exam in your first attempt and, in case you are unsuccessful, we will refund 100% training fee. Conclusion If you have done your preparation well and your score
in the practice tests is good then you are all set to take the exam. Instead of focusing on a particular score, you should build a strong base by doing regular exercises. Don't worry or panic about how the scoring is done. Just concentrate on your privacy
and we will not send any spam emails. You can invest in our PMP simulator to practice questions and feel confident about passing the exam. Our simulator has very difficult PMP exam style mock questions again and again
till you fully understand the concepts. Over To You What is your strategy to study for the PMP exam? How are you going to ensure that you will be successful in the PMP exam? The PMP certification is a valuable asset for project management and sets you apart as competent and skilled professionals in your field.
excellence in project management and provides a competitive edge in today's dynamic business environment. This is the most frequently asked question by PMP aspirants on blogs and forums. Everybody has his or her idea of what
a passing score is. However, if you are asking me, my answer is that nobody knows except the PMI. The PMP passing score was open knowledge at one time, but now it is a closely guarded secret. Before we proceed, please note that the PMP certification exam consists of 180 questions, 15 of which are pretest questions whose results are not added to
your final score. These questions are included to validate the exam pattern for future tests. Before 2021, the PMI added three more question types: Multiple choice with multiple responses Fill in the blanks Answer selection Put simply; the exam is
 more challenging now. The PMP passing score was 61% until November 30, 2005, meaning 106 correct answers out of 175 scorable questions got you your certification. The PMI changed the passing score to 81% in July 2005. Consequently, the number of professionals succeeding dropped drastically. After a few days, the PMI reverted the passing
percentage to 61% and showed scores for each domain in the exam result reports. However, after 2005, the PMI stopped publishing the passing percentage, so no one knows the new number. Still, many sites and forums claim that 61% is still the PMP exam passing score. The PMI changed the format of the exam results again in 2007. The percentage, so no one knows the new number.
 was removed and replaced with proficiency levels for each domain: proficient, moderately proficient, or below proficient. Again, in August 2017, the report card format was changed. It now shows the target level for each domain: Above Target, Below Target, and Needs Improvement. However, they still do not reveal the passing score for the
PMP exam. As you can see, the PMP exam report format has undergone many changes, and the current passing score is unknown. The PMP exam has 180 questions from three different domains are described in detail in Exam Content Outline. The percentage of questions from three different domains are described in detail in Exam Content Outline.
Content Outline for further details. The result of the PMP exam is given on a PMP exam is given on a PMP exam score report grades the minimum requirements for
this exam. Target: Your performance meets the minimum requirements for this exam. Below Target and fails to meet the minimum requirements for this exam. Additional preparation is recommended before re-examination. Needs Improvement: Your performance is far below target and fails to meet the
minimum requirements for this exam. Additional preparation is strongly recommended before re-examination. Aim for more than 70% in your practice exams if you want to pass the exam. Additionally, in January 2021, the PMI migrated the exam to the new exam 
 candidates are complaining that the test is hard. The passing score or difficulty level might have increased. Also, don't be distracted by the pre-test questions from the real ones. Therefore, assume all 180 questions are scorable. Since
the PMP certification is highly in demand for project professionals and the passing score is secret, there will be many rumors about the passing score is different for every professional who takes
it, and a psychometric analysis determines this. According to the PMI: "The passing score for all PMI exams is determined by sound psychometric analysis. PMI uses subject matter experts - project professionals from around the world and many different disciplines - to determine how many questions you must answer correctly to pass the exam." The
above paragraph shows that the passing score depends on the questions received. Many experts, including me, believed this in the past. However, in the latest version of the PMP Handbook, PMI has clarified that each question carries a single mark. According to the PMP Handbook, PMI has clarified that each question carries as ingle mark.
 calculated by totaling the points you earned. The number of questions you answer correctly places you within one of the performance rating categories you see on this report. This is another misconception. I have seen many test result reports with one below target, and the exam takers passed. You will likely pass the PMP exam if you are above target
 in the other two domains. But, if you get "on target" for one domain and "below target" for one domain, you may fail the test. The PMP exam preparation, you must review the PMP Exam Content Outline. The PMP passing score is a mystery, and only the
 PMI knows it. Therefore, you should not worry too much about the exact percentage for the PMP exam, I advise you to aim for over 70% in the PMP practice exams. If you can cross this threshold, you will most likely see a
congratulatory message. Prepare well before you attempt the exam. Have you attempted the PMP exam? What do you feel about your PMP exam score? Please share your thoughts in the comments section. I have given you my observations based on my knowledge. I do not take responsibility for the correctness of any information in this blog post. Do
your due diligence before reaching any conclusion.  View Disclaimer Every candidate studying for the PMP test has wondered what the passing score is. Obtaining the PMP certification is a difficult task. You must go through a number of steps before taking the computer-based test. You can use the "PMP" title with your name and signature if you complete this test. Let's clarify PMP passing score in
2025 in this blog article, from its history, certain misconceptions to the current situation. What is the PMP passing score? PMP Passing score while there are many questions about the PMP passing score, the fact is that the PMI does not have an official score set or specified. The Project Management Institute (PMI) is tight-lipped regarding the
 passing score for the PMP exam. The passing score for the PMP test used to be 61% in the past. After 2005, however, the PMI stopped defining and publishing an exact passing score for the PMP test report format has undergone several revisions since then, but it still does not include an actual passing score. Although some sources claim
 that a score of 61% is still considered a confirmed success rate for the PMP test, finding an official reference stating the exact pass percentage is frequently difficult. How the PMP score is calculated? While PMI hasn't revealed the actual PMP exam passing score required, we're breaking down all we know about the PMP passing score 2021,
 including how to calculate it and how to check your own. "The passing score for all PMI exams is completely decided by sound psychometric analysis" according to the PMI. To decide how many questions you must answer correctly to pass the test, PMI consults subject matter experts - project professionals from all over the world and from a variety of
disciplines. This indicates that the exam's set of questions determines the passing score for the PMP certification may not be fair to all candidates. The psychometric analysis is a scientific method for determining a candidate's passing score for the PMP test based
on the difficulty of the questions they faced throughout the exam. How to check your PMP score? PMI now provides a PMP Test Report at the end of the exam, which breaks down your result into performance rating areas rather than presenting your actual numerical score. According to PMI, "every question which is scored on the test is worth one
 point, and your final score is derived by adding all of the points you've earned on the exam". The number of questions you properly answer places you in one of the report's performance ratings: above target, target, below target, and needs improvement, which is further described as
 follows: Above Target: Performance that goes above and beyond the basic minimum Target; The goal is for the performance to satisfy the minimal criteria. More planning is needed Needs Improvement: Performance is below target, and more preparation is
order to sit for the test with confidence, you should aim for a 75 percent or above on your practice examinations. Learn more about the PMP exam A Brief History of PMP Passing Score Changes Until November 30, 2005, the PMP passing score was 61 percent, which means
 The PMI, however, stopped publishing the passing percentage after 2005, so no one knows what the current statistic is. Despite this, several websites and forums say that a score of 61 percent is still required to pass the PMP test. In 2007, the PMI altered the format of the exam results once more. For each domain, the % was replaced by competency
 levels: proficient, moderately proficient, or below proficient. The report card format was revised once again in August 2017. Each domain now has a target level: Above Target, Below Target, and Needs Improvement. However, they have yet to publish the PMP test passing score. As you can see, the PMP test report format has undergone
several revisions, and no one knows what the current passing score is. What should you aim for on your PMP exam now? If you desire to pass the exam, I recommend aiming for a score of more than 70%, or 126 questions out of 180. The PMI also moved the test to the new exam topic outline in January 2021, which included Agile and Adoptive projects to pass the exam.
management methodologies. The applicants are complaining about how difficulty level has increased. Also, don't get overwhelmed with the pretest questions from the actual ones, you should aim to answer more than 126
questions correctly. Assume that all 180 questions are scored. Rumors About the PMP Exam Passing Score Because the PMP certification is in high demand among project managers and the passing score is kept secret, there will inevitably be numerous stories concerning the passing score. Let's clarify a few things on a few rumors. Rumor #1: The
passing score for PMP is already fixed. Many experts believe that everyone's PMP passing score is the same. This isn't correct. Every professional who takes the PMI reports that: "A sound psychometric analysis determines the passing score for all PMI
examinations. To decide how many questions you must answer correctly to pass the test, PMI consults subject matter experts - project professionals from all over the world and from a variety of disciplines." The passing score is determined by the set of questions received, as shown in the previous paragraph. Rumor #2: Each question carries a
different level of importance. In the past, many specialists, including myself, thought this. However, PMI emphasized in the PMP Handbook that each guestion on the exam is worth one point, and your ultimate score is
determined by adding together all of your points. You are assigned to one of the performance rating categories on this report based on the number of questions you properly answer. Rumor #3: Achieving a below-target level in any domain indicates that you will fail in the long run. This is another misunderstanding. We've seen a lot of test result
reports with one or two questions that were below target, yet the exam takers still passed. You will most likely pass the PMP test if you obtain "on target" for one domain and "below target" for another. The PMP passing score is a secret known only to the PMI. As a result, you
shouldn't be overly concerned with the precise percentage. A passing score is determined by the number of questions asked throughout the exam. Although we do not know the passing percentage for the PMP test, we recommend that you study thoroughly before taking it and strive for a score of at least 70%. We believe that if you can get through
this point, you will most likely receive a celebratory message. After knowing how the PMP exam is scored, you can learn How to pass the exam easier. We hope you find the information provided above to be helpful. However, we do not confirm the accuracy of any
information provided in this blog article. Do your study before jumping to any conclusions, and study hard for the PMP ractice Exam. To download the free PMP Practice Test, visit our website for your IOS or Android device.
