One of the most common problems faced by many users is when their devices get disabled due to a forgotten password. Sadly, the IMEI number cannot help you unlock a disabled device. To do that, you need a third-party tool that is reliable and has a high success rate in unlocking devices.Wondershare Dr.Fone is a popular tool for unlocking phones without a password. It's a versatile software solution that can help in various scenarios, such as a forgotten password, PIN, or pattern lock. This tool works for thousands of devices from all smartphone brands. Here's a guide on how to unlock your phone without a password using Wondershare Dr.Fone: Unlock iPhone/iPad Lock Screen Without Password.Simple, click-through, process.Unlock screen passwords from all iPhone and iPad.No tech knowledge required, everybody can handle it.Supports the latest iOS version fully!Step 1: Launch Wondershare Dr.Fone and Choose Screen UnlockInstall and launch Wondershare Dr.Fone on your computer and connect to your smartphone. Now, click Toolbox from the left bar and choose Screen Unlock." Decide on your device type, which can be either "Android" or "iPhone. To unlock an Android device, opt for "Unlock Android Screen," and for iOS devices, select "Unlock iOS Screen."Step 2: Select the Relative Screen Unlock ModeWhen unlocking an Android device, you will need to select your device brand next. Afterward, choose Remove without Data Loss for a Samsung device and 100% Remove Screen Lock for any other brand. As for an iOS device, click Start and put your device into Recovery ModeNow, for Samsung devices, provide the details such as "Brand," "Device Name," and "Device Model. Here, agree to the warning, tap Next, and enter the "000000" code in the dialogue box for confirmation. For other Android brands, put your device into Recovery Mode and follow the on-screen instructions.As for the iOS device, when in Recovery Mode, Wondershare Dr.Fone will detect the device model, and you need to choose a system version to download it.Step 4: Complete the Screen Unlock ProcessPut your Samsung device into Download Mode using the on-screen instructions. As soon as the Android device is in Download/Recovery Mode, the unlocking process will automatically start. Wait for it to complete, and tap "Done" when finished.For your iOS device, once firmware is downloaded and verified, click Unlock Now. Put the 000000 code in the dialogue box and click confirm to initiate the unlocking process.Unlock iOS Device Now Unlock iOS Device Nowsafe & secure Everyone wants to have an iPhone with all its stunning features under control. Apple introduces many innovative options millions of people hunt for year after year. And those users who care about ecology or wish to save money by getting a second-hand smartphone should learn about IMEI Unlock check, which is a must step before purchase. A reliable and fast iPhone unlock check will ensure your phone has no limitations and will serve you well for many years ahead. When we speak of Apple iPhones, there could be several types of lock users can come across. And you can check iPhone IMEI unlock status to get important information about the devices. If you wonder, 'Is my iPhone Unlocked or Locked?" You are in the right place. Your smartphone can potentially have SIM lock and Find My iPhone Activation Lock issues. Both things are not pleasant. The handset with SIM lock cannot connect to any network besides the original carrier it is locked to. In other words, if an international customer purchases an AT&T locked iPhone, they will not be able to connect to any mobile network outside the U.S. And the devices with Find My Activation Lock have a locked screen that requires the Apple ID and password to get past. Without login credentials, such a gadget is also useless because its features and functions are blocked. An unlocked iPhone has no limits and no restrictions. You can use it without any lock screens, and it can get signals from all networks worldwide with a correct SIM inserted. Using the IMEI number unlock check service, you can know the status of the smartphone in question. The remote unlock check tool sends your request to the servers and delivers an instant answer. The IMEI Unlock lookup service is the quickest way to get answers to such questions as: Is the iPhone Factory Unlocked; Is the iPhone locked by a network provider in a particular country; Is FMI Activation Lock enabled or turned off; Other details about a handset. It is crucial to check unlock iPhone information before buying or reselling a second-hand device. It is the easiest way to protect yourself and a potential buyer from getting a surprised 'brick' instead of a working smartphone. These are the primary reasons why to check iPhone IMEI unlock status: Or you can open the Settings app on an iOS device, go to General and find the About menu. Here you can get down till you see your 15-digit code. Here is how the checking works: Ensure that the device has no 'Locked' SIM and can be connected to a network of your choice anywhere you go; Learn whether Find My Activation Lock is on or off to understand if you need this device or not; Take a decision based on facts the online unlock lookup service provides remotely and instantly. Using iPhone unlock check tool is easy as a breeze. All needed is the unique smartphone identifier, which can be found in the Settings - General - About section on the handset, or through a combination of *#06# you can dial. Knowing the ID code, you should enter it into the field that states, 'Enter IMEI number'. After this, press the big green button to 'Check IMEI.' Wait for the status delivery, and you will know all the facts about the device. If Carrier Lock says 'Locked', that iPhone is locked by a mobile network and limited to it only; If iCloud FMI Status is 'On', the handset will require the correct Apple ID and password to let you use its features; to disable FMI, you will still need those iCloud login credentials. Perform IMEI unlock check to learn the actual status of the iPhone. Make sure it is not locked by a carrier or Apple security tools before you choose to own it. IMEI.org proposal to check online IMEI for the most popular device ever made! Note: The device may be unlocked only with the user's authorization. Imagine having a big house, with all the keys but you have no idea how to unlock all the doors and access all the rooms. It's the same feeling you get when you have a phone and its IMEI number and do not know how to unlock it. Learning how to unlock phone free with IMEI number is a game-changer and the knowledge can be useful in different situations. The good part is you dont have to spend a dime to unlock phone free with IMEI number. In this blog, we will be diving into the details of this hassle-free process, so you know exactly what to do when you are stuck with a locked phone. Lets get right into it. Why Can You Unlock Phone Using IMEI Number? For a proper understanding of how to unlock Your Phone with IMEI number for any Android phone for that matter. You must know what an IMEI number is and the perks that come with using it to unlock your phone. An IMEI (International Mobile Equipment Identity) is a unique 15-digit code that acts like your phone's fingerprint, identifying its origin, brand, and model. When you connect to a cellular network, the IMEI gives you more flexibility. You can use any SIM card from any carrier, potentially increase resale value, and enjoy greater travel convenience. While IMEI helpsprevent theft and misuse of stolen phones, it's recommended to use additional security measures. Where Can You Find IMEI Number? To figure out how to unlock phone with IMEI number, you first need to know where and how to find it. Here we dont use much efforts in telling how to find IMEI numbers on iPhone, instead, we focus on Android phones. Finding your IMEI number on or in your Android phone is an easy process which we will be explaining in a bit. Follow these simple steps to locate or find your phone IMEI number: Procedure 1: Navigating through phone settings Step 1:Select About phone from the options in the phone settings. Step 2: The IMEI number of the phone will be displayed among other IMEI information. Procedure 2:Checking the battery compartment of back of the phone or the original packaging Step 1: For Android phones with removable batteries, the IMEI number can be found when the battery is removed. Step 2:You can also find the phone IMEI number by checking the original packaging of the phone. Procedure 3:Dialingspecial codes Step 1:Open phone on your Android phone. Step 2:dial *#06#**on the dial pad. Step 3:Details of your Android phone including the IMEI number will pop up on the screen. Follow any of these procedures and the steps to find your phone IMEI number, and unlockyour phone with an IMEI number with less stress. How to Unlock Phone Free with IMEI Number? Android phones have so many capabilities, only if the users can unlock phone using IMEI number.So, we are going to look at how to use IMEInumbers to unlock phones to maximize the benefits. Unlocking the phone using an IMEI number can be done via the following means: 1Unlock Phone with IMEI Number By Carrier Unlocking a phone with an IMEI number by the carrier is a reliable but time-consuming process to unlock a phone. This is so because of the conditions that are required to be met and fulfilled before contacting the carrier. Some of such requirements include Providing the owner's phone number Providing the IMEI number Provide answers to the security questions set in the carrier account Providing the exact phone version. On meeting the above requirements, you can then move on to contacting the carrier, follow these steps to do so: Step 1:Find out how to contact your original carrier, this is made easy with the use of live chat. Obtain the contact information and get in touch with the customer service. Step 2:You have to provide valid reasons for wanting to unlock your phone as not all carriers support unlocking their products. Step 3:Once your request to unlock your phone is approved, the carrier agent will unlock your phone. You will receive the code for IMEI to unlock your phone for free. Step 4:Follow the instructions given by the carrier agent, enter the provided code, and unlock your phone. Cons It is time-consuming Some carriers can be adamant about processing your request Finding contact information of carriers can be a daunting task most times. 2Unlock Phone with IMEI Number By Online IMEI Unlocking Service Android users who are interested in usingIMEI numbers to unlock phoneswould turn toonline services for a solution. There are many on the market that claim they can unlock phones with IMEI number. We have found several third-party IMEI unlocking services.And we will look at a few: IMEI Now: This is a third-party IMEI unlocking service provider that employs a 100% secure and legal method while unlocking phones allowing users to use any SIM card. They initially set out to unlock only iPhones, but it now provides IMEI unlocking services to all phone users. Official Sim Unlock: With a quick and easy-to-use phone unlocking system, they can unlock any eligible device carrier in any country. This is another online IMEI unlocking service provider that renders IMEI unlocking services for users all across the world. UnlockBase: unlockbase provides a smooth online IMEI unlocking service with guaranteed 100% safety for devices and customer information. Furthermore, they boast of fast delivery in the last decade with a money-back guarantee. Cons These online services may be phishing websites that are trying to steal your information. Being on the waitlist for these online sites can be exhausting. The purchase of a subscription might be made mandatory to access their service. In the case of a forgotten password, such third-party sites or platforms will be of no help. How to Unlock Android Phone Screen without Passwords? More Related Articles Home Lifestyle Your Mobile Phone Device via PTA In This Post: PTA Device Verification System What is an IMEI Number? Via SMS Via Website Via App The Pakistan Telecommunication Authority (PTA) has been striving hard to curb the smuggling of illegal phones in Pakistan and to ensure the use of legal devices on all mobile networks. For this purpose, a Device Identification, Registration and Blocking System (DIRBS) was launched in 2019. Through this automated system you can easily get your mobile phones registered and verified with PTA. Similarly, if you are planning to purchase a mobile phone in Pakistan and want to know whether it is stolen or legally registered you can take help from PTAs Device Verification System (DVS). Let us explore the different ways to verify mobile phone without leaving the comforts of your home. Check the authenticity of your mobile phone devices In order to check whether your mobile phone is registered and recognised by PTA, you need to verify your IMEI number through any of the three easy ways suggested by the telecommunication authority. If you are buying a new phone in Pakistan, then dont forget to first go through the mobile verification system introduced by PTA. If you dont have a clue about how to verify your phone through PTA Device Verification System, then continue reading the piece. PTA Device Verification System Via SMSPTA Device Verification System Via Downloading DVS App Let us discuss these simple ways of device verification system in Pakistan. But first, lets check out what an IMEI number is and how a mobile phone can be verified through it. The full form of IMEI is International Mobile Equipment Identity. Through this number you can verify mobile phone as it is unique for every mobile phone without leaving the comforts of your home. IMEI number is a 15 digit long number. You can easily find out your IMEI number by checking your mobile phones box. It is printed on the boxes of your mobile phone devices. There are different ways you can find out IMEI number. If you are an iPhone user, then check the back of your phone and you will find the IMEI number written there. On the other hand, the android devices that come with a removable back cover, you can easily find the IMEI underneath the battery of your phone. Once you have the IMEI number, you now need simple steps to verify your mobile phone device. The PTAs SMS based verification system involves few simple steps: Fetch your IMEI number using the above-mentioned methodsOnce you have the IMEI number, compose a new message in your mobile phoneType the IMEI numberSend it to 8484 which is the officially approved PTA number to verify your mobile phone deviceWithin a few seconds, you will receive the verification whether your phone is compliant with PTA or notYou will receive a verification message both in English and Urdu If you are looking for ways other than SMS to verify your mobile phone devices, then log on to the PTA Device Verification System website. You will find an empty field where you can enter your IMEI number. Once you have entered the 15-digit IMEI number, then click on Check and you will get the results for your PTA mobile registration then and there. You have to enter your IMEI number in the empty field Credit: DIRBS Website You can also access the PTA Device Verification System via the PTA mobile verification app. Download the PTA Device Verification SystemThe app is available for free at all the leading app storesGo to the device verification system of your appEnter your 15 digit IMEI numberYou can also scan the IMEI number using the mobile phone app Once you have entered the IMEI number, click on Check and you will get the results for your PTA mobile registration. Check out our extensive guide on how to check your IMEI number. We have also covered in detail about the PTA mobile registration system in Pakistan.
