I still haven't found my resolution. It is noted that in File Explorer, I can no longer preview pdf files in the navigation pane, though Word documents ARE able to be previewed. This also affects my ability to print, as I use to be able to select multiple pdf files and send to the printer. PDF files dno longer work this way, though it WILL work that way with Word.I did not download or isntall any new Adobe version, and this has been going on for several months.I did try opening pdf files with Abobe vs. the one with REader. AND just tried to do this setting(Go to Edit > Preferences > Enhanced Security > Uncheck 'Enable Protected mode at start up' Turn off the protected mode and uncheck Enhanced Security >)Unsucessful. Be kind and respectful, give credit to the original source of content, and search for duplicates before posting. Learn more Could it be that these fields are written with a font that isn't embedded and so when you try to edit the field it is forced to Arial. I see from the list of fonts an ArialMT that is not embedded.I see what you mean. But I am not usually dealing with forms from Word, so I'm sorry not too good at answering.I do see that the text is not set as default text, but rather as filled from the form. It is not visible in the default data but rather appears as if the form is filled by a previous user. (clearing/resetting the form deletes the content) Be kind and respectful, give credit to the original source of content, and search for duplicates before posting. Learn more
